DIGITAL TRANSFORMATION OF THE DESIGN, CONSTRUCTION AND MANAGEMENT PROCESSES OF THE BUILT ENVIRONMENT

Springer Nature This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

to the development of new technologies in the fields of engineering, medicine, astronomy and more.

VEHICLE FUEL ECONOMY

DIANE Publishing

FUEL SYSTEMS FOR IC ENGINES

Elsevier This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. POUNDER'S MARINE DIESEL ENGINES AND GAS TURBINES

Butterworth-Heinemann Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines

LOVE BY NIGHT

A BOOK OF POETRY

Andrews McMeel Publishing More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two

points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

INTERNAL COMBUSTION ENGINES

PERFORMANCE, FUEL ECONOMY AND EMISSIONS

Woodhead Publishing This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO₂ emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

INNOVATIONS IN FUEL ECONOMY AND SUSTAINABLE ROAD TRANSPORT

Elsevier This book presents the papers from the Innovations in Fuel Economy and Sustainable Road Transport conference, held in Pune, India, 8-9 November, 2011. Papers examine advances in powertrain, alternative fuels, lightweight vehicles, electric vehicles and hybrid vehicles. An international assembly of senior industry representatives provide insight into research and technological advances in low carbon technology sustainability for road transport, helping towards achieving stringent emissions standards and continual improvements in fuel economy efficiency, all in an expanding Indian market. These technical papers from industry and academia discuss the developments and research of leading organisations. Discusses maximising powertrain performance for a low carbon agenda Provides

MEMOIRS OF A HACK MECHANIC

HOW FIXING BROKEN BMWs HELPED MAKE ME WHOLE

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

LITERATURE REVIEW AND RESEARCH DESIGN

A GUIDE TO EFFECTIVE RESEARCH PRACTICE

Routledge Designing a research project is possibly the most difficult task a dissertation writer faces. It is fraught with uncertainty: what is the best subject? What is the best method? For every answer found, there are often multiple subsequent questions, so it's easy to get lost in theoretical debates and buried under a mountain of literature. This book looks at literature review in the process of research design, and how to develop a research practice that will build skills in reading and writing about research literature—skills that remain valuable in both academic and professional careers. Literature review is approached as a process of engaging with the discourse of scholarly communities that will help graduate researchers refine, define, and express their own scholarly vision and voice. This orientation on research as an exploratory practice, rather than merely a series of predetermined steps in a systematic method, allows the researcher to deal with the uncertainties and changes that come with learning new ideas and new perspectives. The focus on the practical elements of research design makes this book an invaluable resource for graduate students writing dissertations. Practicing research allows room for experiment, error, and learning, ultimately helping graduate researchers use the literature effectively to build a solid scholarly foundation for their dissertation research project.

EUROPEAN COASTS OF BOHEMIA

NEGOTIATING THE DANUBE-ODER-ELBE CANAL IN A TROUBLED TWENTIETH CENTURY

Amsterdam University Press The Danube-Oder-Elbe Canal promised to create an integrated waterway system across Europe, linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean. The fascinating history of this never-completed project, *European Coasts of Bohemia* tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe. Jíra Janác shows how the canal-backers adapted themselves to various political developments, such as the break-up of the Austrian-Hungarian Empire and the integration into the Soviet Bloc, while still managing to keep the canal project alive.

THE KING IN EXILE

THE FALL OF THE ROYAL FAMILY OF BURMA

Harper Collins 'An absorbing read. Exhaustively researched and gracefully written, *The King in Exile* tells a story of compelling human interest, filled with drama, pathos and tragedy... [It] heralds the arrival of a writer of non-fiction who is both uncommonly talented and exceptionally diligent...One of the great merits of [the book] is that it is completely free of jargon and theorizing. It is in essence a family story, centred on five women whose lives were waylaid by history' - Amitav Ghosh in his blog 'The captivity of Burma's last king and the fall of the Konbaung dynasty: a compelling new account' In 1879, as the king of Burma lay dying, one of his queens schemed for his forty-first son, Thibaw, to supersede his half brothers to the throne.

For seven years, King Thibaw and Queen Supayalat ruled from the resplendent, intrigue-infused Golden Palace in Mandalay, where they were treated as demi-gods. After a war against Britain in 1885, their kingdom was lost, and the family exiled to the secluded town of Ratnagiri in British-occupied India. Here they lived, closely guarded, for over thirty-one years. The king's four daughters received almost no education, and their social interaction was restricted mainly to their staff. As the princesses grew, so did their hopes and frustrations. Two of them fell in love with 'highly inappropriate' men. In 1916, the heartbroken king died. Queen Supayalat and her daughters were permitted to return to Rangoon in 1919. In Burma, the old queen regained some of her feisty spirit as visitors came by daily to pay their respects. All the princesses, however, had to make numerous adjustments in a world they had no knowledge of. The impact of the deposition and exile echoed forever in each of their lives, as it did in the lives of their children. Written after years of meticulous research, and richly supplemented with photographs and illustrations, *The King in Exile* is an engrossing human-interest story of this forgotten but fascinating family.
