BRAKE DESIGN AND SAFETY

THE ARTISTIC TURN

A MANIFESTO

Leuven University Press **The Orpheus Institute has been providing postgraduate education for musicians since 1996 and introduced the first doctoral programme for music practitioners in Flanders (2004). Acting as an umbrella institution for Flanders, it is co-governed by the music and dramatic arts departments of all four Flemish Colleges, which are strongly involved in its operation. Throughout the Institutes various activities (workshops, master classes, seminars, interviews, and associated events) there is a clear focus on the development of a new research discipline in the arts: one that addresses questions and topics that are at the heart of musical practice, building on the unique expertise and perspectives of musicians and constantly dialoguing with more established research disciplines. Within this context, the Orpheus Institute launched an international Research Centre in 2007 that acts as a stable constituent within an ever growing field of enquiry. The Orpheus Research Centre in Music [ORCiM] is a place where musical artist can fruitfully conduct individual and collaborative research on issues that are of concern to all involved in artistic practice. The development of a discipline-specific discourse in the field of artistic research in music is the core mission of ORCiM. This Subseries of The Collected Writings of the Orpheus Institute, will explicitly 'zoom in' on studies that take artistic practice as their point of departure and deal with questions and challenges that arise from that practice. It is this kind of research, in all its variety, which the Orpheus Research Centre in Music promotes and which the Subseries is designed to present. The contributions within the Subseries extend the possibilities and understanding of musical practice and act as a springboard for future research in this young but fascinating area. The emergent field of artistic research remains controversial, and is accepted with varying degrees of enthusiasm in academic institutions. The challenges and opportunities presented by this discipline may be better understood by re-emphasising the centrality of the artist through a fresh paradigm-an 'artistic turn'. The aim is to create a field of meaning that may illuminate the most promising, though correspondingly problematic, aspects of artistic research; the essential ineffability of artistic creativity, and the consequent insufficiency of verbal and written accounts. The discourse articulated charts a constellation of ideas that outlines the new disciplines and points to its manifold and open-ended possibilities.**
