### The Official History of the UK Strategic Nuclear Deterrent

#### Volume II: The Labour Government and the Polaris Programme, 1964-1970

**Routledge** Volume II of *The Official History of the UK Strategic Nuclear Deterrent* provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

## Tea Plantation Workers of Assam and the Indian National Movement, 1921-1947

Primus Books Tea Plantation Workers of Assam and the Indian National Movement, 1921-1947 studies the various phases of workers' politics in the tea plantations of Assam and deliberates upon the role of nationalist leaders in moulding the fate of these workers. The struggles of the tea plantation workers were a manifestation of the strength of their protests against the varied forms of exploitations of the tea planters. Their struggle occurred at the time of the formation of the indigenous bourgeoisie and continued despite the nationalist leadership not providing sufficient support to them. There remained a deep incongruity between the interests of the workers and the interests of the nationalist leadership which largely determined the fate of the material conditions of the labourers in deeper aspects.

## Globalization and Standards

### Issues and Challenges in Indian Business

**Springer** The changes following more than two decades of economic reforms and globalization of the Indian economy - at state, corporate sector, and consumer level - raise interesting questions on the ways in which the stakeholders will continue to engage on the world stage, politically, socially and economically. One key feature of global trade over this period has been the growing importance of not only product standards but, importantly, labor, environmental, food safety and social standards. Being essentially a non-tariff barrier, standards have often become critical to market access and essential to sustained competitiveness. This has a clear impact on the manner in which both global and Indian business is conducted now and in the future. It also underlines the need for a new area of enquiry that addresses the following questions: How are the Indian public and private actors - the state, domestic firms, local consumers and society - influencing and being influenced by such standards? Do standards really matter in an overwhelmingly informal production sphere, with consumers deeply segmented on the basis of a highly skewed distribution of income and with the rural population becoming further marginalized? We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors, both public and private. How have they been able to drive these processes and what are their implications for larger concerns with inequalities and the conditions of the poor? How does the omnipresent informality influence compliance, encourage multiple standards and affect the chances of addressing institutional dysfunctionality? What role does regulation play? These are some of the issues dealt with in the book, which has chapters focusing on aspects of specific sectors such as microfinance, pharmaceuticals, automobiles, tea trading, the role of the state and changing consumer influence. We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors, both public and private. How have they been able to drive these processes and what are the consequences of these changes for the Indian economy, other emergent economies and for the rest of the developing world? In particular, what are their implications for the wider Indian society, especially on concerns with informality, inequalities and the conditions of the poor? How does informality in its omnipresent form influence compliance, encourage multiple standards and chances of addressing institutional dysfunctionality? What role does regulation play? These are some of the issues dealt within the book wherein chapters focus on aspects of specific sectors, trading, role of the state and changing influence of the consumer.

### Conceptualizing the Regulatory Thicket

### China's Financial Markets after the Global Financial Crisis

**Routledge** This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China's financial market after the global financial crisis. The book provides an in-depth analysis of China's contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China's banks into more market-oriented institutions and increased public sector growth. However, China's financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China's financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese

government achieves its political and economic objectives. More fundamentally, according to the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China's financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.

## Hav

**New York Review of Books A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.**

## Medical Anthropology

### A Biocultural Approach

**Oxford University Press, USA Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.**

### CELSO SALLES - Autobiography - 2nd Edition.

It is the first of 12 books that the author will incorporate into his Collection called Africa. A story that begins with a lot of faith and prayer, attributes that have accompanied the 62 years of life of Celso Salles, completed on May 28, 2021. In his thoughts that making history is better than accumulating fortunes, in the pages from this book you can read a summary of what those 62 laps around the sun have been like. There was still a lot to be contacted, which Celso Salles will naturally be putting in the other issues, so that he can transmit in printed format a large series of important information already available in digital format on most of the main platforms existing in the world.**
