# Adapting the United Nations to a Post-Modern Era

## Lessons Learned

**Springer** This volume addresses the central theme of adjusting the United Nations system in light of, firstly, the broadening definition of security, secondly, a perceived shift from modernity to post-modernity; and finally, the contemporary debate about reform, adaptation and institutional learning in multilateral institutions during transnational periods. The UN has not been successful in learning appropriate lessons that could facilitate requisite changes to its structure and operations. Thus the authors in this study focus on the lessons learned from the organizations' recent performance in collective security, preventative diplomacy, preventative deployment, peacekeeping, peacemaking, peace maintenance, and international legal, environmental and trade regulation.

## A New Deal for the World

**Harvard University Press** In a work of sweeping scope and luminous detail, Elizabeth Borgwardt describes how a cadre of World War II American planners inaugurated the ideas and institutions that underlie our modern international human rights regime. Borgwardt finds the key in the 1941 Atlantic Charter and its Anglo-American vision of "war and peace aims." In attempting to globalize what U.S. planners heralded as domestic New Deal ideas about security, the ideology of the Atlantic Charter--buttressed by FDR's "Four Freedoms" and the legacies of World War I--redefined human rights and America's vision for the world. Three sets of international negotiations brought the Atlantic Charter blueprint to life--Bretton Woods, the United Nations, and the Nuremberg trials. These new institutions set up mechanisms to stabilize the international economy, promote collective security, and implement new thinking about international justice. The design of these institutions served as a concrete articulation of U.S. national interests, even as they emphasized the importance of working with allies to achieve common goals. The American architects of these charters were attempting to redefine the idea of security in the international sphere. To varying degrees, these institutions and the debates surrounding them set the foundations for the world we know today. By analyzing the interaction of ideas, individuals, and institutions that transformed American foreign policy--and Americans' view of themselves--Borgwardt illuminates the broader history of modern human rights, trade and the global economy, collective security, and international law. This book captures a lost vision of the American role in the world.

### A New Vision of History

**Diamond Pocket Books Pvt Ltd** The present work tries to present a new vision of history. The traditional thinking about history as a mere record of past events needs a re-examination, if we intend to find out the real significance, worth and use of story. According to the author, history should be understood as a struggle between spiritual and non-spiritual or constructive and destructive forces for ascendancy. If the non-spiritual forces become dominant, the world is thrown in the cockpit of suffering and sorrow; but if the spiritual forces become dominant the world experiences peace and prosperity. Every individual can play his sterling role in this conflict. The work presents a rationale of human happiness and prosperity through history. It deserves a perusal by every educated reader. Dr. R.N. Vyas holds the degrees of M.A., Ph.D., D. Litt, LLB and Sahitya Ratna. He is a retired Professor and Head of the Department of a major postgraduate college of Indore, Devi Ahilya University. ## Renaissance Humanism, from the Middle Ages to Modern Times

**Routledge** Starting with an essay on the Renaissance as the concluding phase of the Middle Ages and ending with appreciations of Paul Oskar Kristeller, the great twentieth-century scholar of the Renaissance, this new volume by John Monfasani brings together seventeen articles that focus both on individuals, such as Erasmus of Rotterdam, Angelo Poliziano, Marsilio Ficino, and Niccolò Perotti, and on large-scale movements, such as the spread of Italian humanism, Ciceronianism, Biblical criticism, and the Plato-Aristotle Controversy. In addition to entering into the persistent debate on the nature of the Renaissance, the articles in the volume also engage what of late have become controversial topics, namely, the shape and significance of Renaissance humanism and the character of the Platonic Academy in Florence.

## The Nine Veils

# The Reputation of God and Our Struggle for Identity

Wipf and Stock Publishers From the Author: My God is kind, compassionate, merciful, and he loves me. Yet, there are questions that arise; there are accounts of God that seem contradictory to my simplicity, and there are accusations against God that can leave me struggling for an explanation. At times I've been confused by the concept of God's love and the reality of life, and there often existed a dichotomy between the two. I wrote this book after numerous conversations with friends who, regardless of their spiritual journey have experienced similar thoughts, or have simply ignored some of the hard questions of life and faith. Common societal thinking in many areas is moving towards a position where people regard God as an outdated fairy-tale with a sinister undertone leading to apathy or resentment towards God. This is far removed from my notion of a living and loving God who is kind, compassionate and merciful. Embarking on my personal journey of discovering God's reputation, I have a hunch that I'm not alone. I need to explore God and find comfort with the answer. Would you join me on this journey of discovery? Maybe all the dots haven't been joined, and some of the joined dots remain open to interpretation, yet the line I've used to join the dots is what I know of the underlying nature and character of God.

## Egoism and the Attack on American Education

**iUniverse** Few Americans would disagree that serious problems plague their country's education system. But what is the real reason for this serious malady? According to author and long-time teacher Rick Tobin, the usual suspects-beleaguered teachers, overcrowded classrooms, lack of funds, etc.-aren't to blame. Tobin believes that critics of the educational system have totally missed the point and that educational reform is aimed in the wrong direction. In his view, academic failure is the direct result of a loss of faith in American democracy. Current teaching objectives and the laws governing schools are failing to emphasize moral responsibility and personal accountability-fundamental aspects of the ethical framework that form the basis of American democracy and American education. These problems stem from what Tobin terms a prevailing "egoist" culture in America that largely ignores moral character building and downplays the need for individual accountability. He contends there are millions of Americans who fall within nine "classes" of people who are largely responsible for our educational mediocrity. Rick Tobin doesn't mince words

in this candid expose, in which he also offers solutions for remedying our educational woes.

## David E. Lilienthal

### The Journey of an American Liberal

Univ. of Tennessee Press "Over the course of a career that stretched from the early 1920s through the late 1970s, David E. Lilienthal became a larger-than-life symbol of American liberalism. A founding director of the Tennessee Valley Authority who later served as the first chairman of the Atomic Energy Commission, he shared in the great triumphs of the New Deal and Fair Deal eras, as well as in the disappointments that came with the West's attempts to spread its values abroad. This book, the first full biography of Lilienthal, explores the public and private dimensions of the man and, in so doing, illuminates the promise and limitations of the American liberal dream in the twentieth century." "As a public figure, Lilienthal was controversial: outspoken, articulate, charismatic, and sometimes ruthless in pursuit of his goals. Yet, in his work with the TVA and the AEC, he displayed a strong commitment to administrative responsibility and openness in governmental policy making and was instrumental in promoting a sense of public service and purpose in both agencies. After 1950, Lilienthal became an active internationalist, striving to create models for development in Third World venues as widely separated as Central Asia, the Middle East, and Latin America. Through his visionary Development and Resources Corporation, he established extensive ties with leaders of every stripe, including the Shah of Iran, various Latin American presidents, and, in his own country, Lyndon B. Johnson." "The Lilienthal story is one of paradoxes and contradictions in human nature, of an enormous ego yoked with good intentions and a humane spirit. As this book demonstrates in compelling detail, the liberal dream that Lilienthal embodied worked at home but not abroad. In contrast to his victories on the domestic front, Lilienthal's efforts in overseas arenas often failed tragically - born as they were of an inability to understand that the political, economic, and social realities of an Iran or a Vietnam were far different from those of his own land."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
