#### VOICES FROM THE OPEN SOURCE REVOLUTION

---

"O'Reilly Media, Inc." **Freely available source code, with contributions from thousands of programmers around the world: this is the spirit of the software revolution known as Open Source. Open Source has grabbed the computer industry's attention. Netscape has opened the source code to Mozilla; IBM supports Apache; major database vendors have ported their products to Linux. As enterprises realize the power of the open-source development model, Open Source is becoming a viable mainstream alternative to commercial software. Now in Open Sources, leaders of Open Source come together for the first time to discuss the new vision of the software industry they have created. The essays in this volume offer insight into how the Open Source movement works, why it succeeds, and where it is going. For programmers who have labored on open-source projects, Open Sources is the new gospel: a powerful vision from the movement's spiritual leaders. For businesses integrating open-source software into their enterprise, Open Sources reveals the mysteries of how open development builds better software, and how businesses can leverage freely available software for a competitive business advantage. The contributors here have been the leaders in the open-source arena: Brian Behlendorf (Apache) Kirk McKusick (Berkeley Unix) Tim O'Reilly (Publisher, O'Reilly & Associates) Bruce Perens (Debian Project, Open Source Initiative) Tom Paquin and Jim Hamerly (mozilla.org, Netscape) Eric Raymond (Open Source Initiative) Richard Stallman (GNU, Free Software Foundation, Emacs) Michael Tiemann (Cygnus Solutions) Linus Torvalds (Linux) Paul Vixie (Bind) Larry Wall (Perl) This book explains why the majority of the Internet's servers use open-source technologies for everything from the operating system to Web serving and email. Key technology products developed with open-source software have overtaken and surpassed the commercial efforts of billion dollar companies like Microsoft and IBM to dominate software markets. Learn the inside story of what led Netscape to decide to release its source code using the open-source mode. Learn how Cygnus Solutions builds the world's best compilers by sharing the source code. Learn why venture capitalists are eagerly watching Red Hat Software, a company that gives its key product -- Linux -- away. For the first time in print, this book presents the story of the open-source phenomenon told by the people who created this movement. Open Sources will bring you into the world of free software and show you the revolution.**

## RACE ON THE LINE

---

### GENDER, LABOR, AND TECHNOLOGY IN THE BELL SYSTEM, 1880-1980

---

**Duke University Press** Race on the Line is the first book to address the convergence of race, gender, and technology in the telephone industry. Venus Green—a former Bell System employee and current labor historian—presents a hundred year history of telephone operators and their work processes, from the invention of the telephone in 1876 to the period immediately before the break-up of the American Telephone and Telegraph Company in 1984. Green shows how, as technology changed from a manual process to a computerized one, sexual and racial stereotypes enabled management to manipulate both the workers and the workplace. More than a simple story of the impact of technology, Race on the Line combines oral history, personal experience, and archival research to weave a complicated history of how skill is constructed and how its meanings change within a rapidly expanding industry. Green discusses how women faced an environment where male union leaders displayed economic as well as gender biases and where racism served as a persistent system of division. Separated into chronological sections, the study moves from the early years when the Bell company gave both male and female workers opportunities to advance; to the era of the “white lady” image of the company, when African American women were excluded from the industry and feminist working-class consciousness among white women was consequently inhibited; to the computer era, a time when black women had waged a successful struggle to integrate the telephone operating system but faced technological displacement and unrewarding work. An important study of working-class American women during the twentieth century, this book will appeal to a wide audience, particularly students and scholars with interest in women's history, labor history, African American history, the history of technology, and business history.

## CUTTING THE CORD

---

### THE CELL PHONE HAS TRANSFORMED HUMANITY

---

**Rosetta Books** One of Time Magazine's Top 100 Inventors in History shares an insider's story of the cellphone, how it changed the world—and a view of where it's headed. While at Motorola in the 1970s, wireless communications pioneer Martin Cooper invented the first handheld mobile phone. But the cellphone as we know it today almost didn't happen. Now, in Cutting the Cord, Cooper takes readers inside the stunning breakthroughs, devastating failures, and political battles in the quest to revolutionize—and control—how people communicate. It's a dramatic tale involving brilliant engineers, government regulators, lobbyists, police, quartz crystals, and a horse. Industry skirmishes sparked a political war in Washington to prevent a monopolistic company from dominating telecommunications. The drama culminated in the first-ever public call made on a handheld, portable telephone—by Cooper himself. The story of the cell phone has much to teach about innovation, strategy, and management. But the story of wireless communications is far from finished. This book also relates Cooper's vision of the future. From the way we work and the way children learn to the ways we approach medicine and healthcare, advances in the cellphone will continue to reshape our world for the better.

**52 FUNERAL SERMONS**

---

Createspace Independent Pub **For most of us, one of the most rewarding, yet difficult tasks, is preparing messages to preach and teach. We are honored by God to stand before our congregation each week, and we want to give them the very best, but with the press of the many demands of ministry, sometimes that is difficult to do. And if you're like me, you prefer writing your own sermons because you have a special connection with your congregation that is hard to reach through a message someone else has written. In other words, no one knows your people like you do! Our new Pulpit Outline Series gives you a starting point - a sermon title, a deductive sermon outline; and a relevant illustration you can use however you like. In this edition, rather than an outline, we have given you full manuscript messages that can be edited to suit your purposes. We invite you to make these messages your own, because only you know the people God has called you to preach to. And we are so honored that you've invested in this unique third volume in the Pulpit Outline series - 52 Funeral Sermons. We have put together the most tasteful, relevant, and Biblical messages possible. May God Bless You as You Share His Word!**
