Yet, such projects actually have a long but little-known history, dating back to the 1920s. This groundbreaking new book reveals the key role that these local health programs—and the nurses who ran them—influenced how Americans perceived both their personal health choices and the well-being of their communities. **Nursing with a Message** transports readers to New York City in the 1920s and 1930s, charting the rise and fall of two community health centers, in the neighborhoods of East Harlem and Bellevue-Yorkville. Award-winning historian Patricia D'Antonio examines the day-to-day operations of these clinics, as well as the community outreach work done by nurses who visited schools, churches, and homes encouraging neighborhood residents to adopt healthier lifestyles, engage with preventive physical exams, and see to the health of their preschool children. As she reveals, these programs relied upon an often-contentious and fragile alliance between various healthcare providers, educators, social workers, and funding agencies, both public and private. Assessing both the successes and failures of these public health demonstration projects, D'Antonio also traces their legacy in shaping both the best and worst elements of today's primary care system. **History taking and physical examination of the Adult** Pearson **South Africa** **Bates' Visual Guide to Physical Assessment** This package contains the following items: 9780781795753 **Bickley Bates' Visual Guide to Physical Assessment** 9781609133597 **Bickley VitalSource e-Book for Bates' Guide to Physical Evidence-based Physical Diagnosis** Saunders Clinical reference that takes an evidence-based approach to the physical examination. Remediation in Medical Education A Mid-Course Correction Springer Science & Business Media Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development. Nurses Making Policy From Bedside to Boardroom Springer Publishing Company "There is a plethora of policy books on the market, but none illustrate the steps in the policy process better than this one. The high caliber editors and contributors, all of whom have been involved in policy work, bring years of experience to illustrate the key points... This publication is timely as the shift in healthcare requires input from all health professionals, but especially nurses who are at the frontline of healthcare change and delivery. This outstanding resource will help motivate many more nurses to get involved in the policy process... Weighted Numerical Score: 93 - 4 Stars!"--Doody's Medical Reviews Written by those in the know-exceptional nurse leaders in practice, education, and politics-this is a practical, "how-to" book written to help advanced students and nurse leaders develop health policy skills to advocate for patients from the bedside to the larger political arena. Co-published with the American Nurses Association (ANA), the book examines the pivotal role of nurses' involvement in health policy and describes the requisite steps for facilitating policy change-from understanding the political system through activating a plan and beyond. It features the voices of a wide variety of nurse leaders who discuss policy work both locally and nationally through descriptive case histories. The book discusses those qualities and skill sets that are needed for advocacy at the bedside and other arenas where health policy is determined. It examines the political system and opportunities for nurse involvement, and clarifies the process of identifying issues that need a policy solution. Because citing research is an integral component of health policy solutions, the book describes how research can be used to strengthen policy initiatives. The book guides the reader step by step through the process of creating a work plan and describes the resources needed to accomplish policy change. Activating an action plan and strategies for working with the media are covered, along with the process of taking a leadership role, evaluating outcomes, using policy to eliminate health inequities, and maintaining and expanding momentum. Woven throughout the book are the major themes of ethics, leadership, safety, and the quest for quality of care. The text provides information and perspectives relevant to the American Association of Colleges of Nursing (AACN) doctor of nursing practice (DNP) Essentials, and includes multimedia electronic links to resources (podcasts, online articles, social network resources, and key political websites) that promote policy research and leadership development. KEY FEATURES: Delineates the steps to becoming a policy advocate in organizational, educational, and political settings Written by noted nurse leaders who describe policy work locally and nationally Presents competencies for nursing policy work derived from the AACN DNP Essentials Focuses throughout on themes of ethics, leadership, quality, and safety Facilitates web use for policy research and development Ancillary materials from the editors are available Prominent Families of New York Being an Account in Biographical Form of Individuals and Families Distinguished as Representatives of the Social, Professional and Civic Life of New York City Fundamental Skills and Concepts in Patient Care Textbook of fundamentals for beginning students. for Children Birth Through Age 8 A Unifying Foundation [National Academies Press](#) Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children. *Hutchison's Clinical Methods, An Integrated Approach to Clinical Practice With STUDENT CONSULT Online Access*,²³ *Hutchison's Clinical Methods* [Elsevier Health Sciences](#) *Hutchison's Clinical Methods*, first published over a century ago, is the classic textbook on clinical skills. It provides an outstanding source of learning and reference for undergraduate medical students and postgraduate doctors. It seeks to teach an integrated approach to clinical practice, so that new methods and investigations are grafted onto established patterns of clinical practice, rather than added on as something extra. The text is organised so that both system-related and problem-oriented chapters are included. Particular emphasis is placed on the importance of the doctor-patient relationship, the essential skills needed for clinical examination, and for planning the appropriate choice of investigations in diagnosis and management. Provides a comprehensive account of the traditional methods of patient history-taking and examination but updated with a full account of the role of modern investigative techniques. A book for students of all ages and all degrees of experience. The most comprehensive account of clinical methods on the market. This long established textbook of clinical method has been thoroughly revised, with fewer chapters, so as to concentrate on the basic principles of history and examination in all the various clinical settings which medical students need to master. A new chapter concentrates on the assessment of patients presenting as emergencies. A new editorial team on this 23rd Edition maintains the highest standards of content and presentation.
