RADAR INSTRUCTION MANUAL

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. DEALS, STEALS, AND MY LIFE AT THE GOLD & SILVER

[Hachette Books](#) In Las Vegas, there's a family-owned business called the Gold & Silver Pawn Shop, run by three generations of the Harrison family: Rick; his son, Big Hoss; and Rick's dad, the Old Man. Now License to Pawn takes readers behind the scenes of the hit History show Pawn Stars and shares the fascinating life story of its star, Rick Harrison, and the equally intriguing story behind the shop, the customers, and the items for sale. Rick hasn't had it easy. He was a math whiz at an early age, but developed a similarly uncanny ability to find ever-deepening trouble that nearly ruined his life. With the birth of his son, he sobered up, reconnected with his dad, and they started their booming business together. License to Pawn also offers an entertaining walk through the pawn shop's history. It's a captivating look into how the Gold & Silver works, with incredible stories about the crazy customers and the one-of-a-kind items that the shop sells. Rick isn't only a businessman; he's also a historian and keen observer of human nature. For instance, did you know that pimps wear lots of jewelry for a reason? It's because if they're arrested, jewelry doesn't get confiscated like cash does, and ready money will be available for bail. Or that WWII bomber jackets and Zippo lighters can sell for a freakishly high price in Japan? Have you ever heard that the makers of Ormolu clocks, which Rick sells for as much as \$15,000 apiece, frequently died before forty thanks to the mercury in the paint? Rick also reveals the items he loves so much he'll never sell. The shop has three Olympic bronze medals, a Patriots Super Bowl ring, a Samurai sword from 1490, and an original Iwo Jima battle plan. Each object has an incredible story behind it, of course. Rick shares them all, and so much more--there's an irresistible treasure trove of history behind both the Gold & Silver Pawn Shop and the life of Rick Harrison.

RECOMBINANT GENE EXPRESSION PROTOCOLS

[Humana Press](#) The current explosive progress in molecular biological research can be definitively traced to the development of molecular cloning technology. The ability to insert specific gene sequences into cloning vectors and their subsequent expansion is the cornerstone of modern molecular biology. A direct practical outcome of molecular cloning technology is its application to express specific recombinant genes. Currently, recombinant gene products are used in a wide spectrum of applications, including gene therapy, production of bioactive pharmaceuticals, synthesis of novel biopolymers, in agriculture and animal husbandry, and so on. A fundamental requirement for successful recombinant gene expression is the design of the cloning vector and the choice of the host organism for expression. *Recombinant Gene Expression Protocols* grows out of the need for a laboratory manual that provides the reader the background and rationale, as well as the practical protocols for the preparation of "expression constructs" and their introduction into appropriate host cells and/or organisms. The chapters in this book are grouped by their expression hosts, including *E. coli*, yeast, mammalian cells, nonmammalian eukaryotes such as plants, *Xenopus*, and insects, as well as in transgenic organisms. In-depth information is presented on the important characteristics of expression cloning vectors and the various methods for efficiently introducing expression constructs into target cells and/or organisms. Throughout *Recombinant Gene Expression Protocols*, the authors have consistently striven for a balanced presentation of both background information and actual laboratory details.

Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. BRITISH GUNMAKERS OF THE 21ST CENTURY

In the nineteenth century there were thousands of British gunmakers plying their trade the length and breadth of the land building all qualities of gun and rifle. Gunmakers have dwindled to a very small number today but the nature of the trade has changed from volume production to exclusive best guns only. British gunmakers have embraced the new technology on offer and by using a combination of CNC machining and new steels allied to traditional gunmaking skills, they are building superb quality guns and rifles to the highest standards. Unlike their competitors, British guns are not entirely built by machine and there is a large element of hand craftsmanship in every example built. Not content to rest on their historical laurels, they have introduced new designs and brought their creations right up to date for twenty-first century requirements. Guns and rifles are all built to the exact specifications of the customer and no two are alike. Each gun is individually made yet designed to embrace modern requirements such as high pheasants, steel shot and so on. This book shows the great variety of guns and rifles on offer entirely built in Great Britain today and how British gunmakers still continue to lead the world in best quality guns and rifles.
