International Practices to Promote Budget Literacy

Key Findings and Lessons Learned

World Bank Publications Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for

demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Shadow Banking

Scope, Origins and Theories

Routledge Shadow banking – a system of credit creation outside traditional banks – lies at the very heart of the global economy. It accounts for over half of global banking assets, and represents a third of the global financial system. Although the term ‘shadow banking’ only entered public discourse in 2007, the importance and scope of this system is now widely recognised by the international policy-makers. There is, however, much less consensus on the origins of the shadow banking system, what role it plays in global political economy and the optimal approach to regulating this complex segment of finance. This volume addresses these questions. Shadow Banking is the first study to bring together the insights from financial regulators, practitioners and academics from across the social sciences. The first part traces the evolution and ongoing confusion about the meaning of ‘shadow banking’. The second section draws major lessons about shadow banking as posed by the financial crisis of 2007–09, providing comparative analyses in the US and Europe, and attempts to establish why shadow banking has emerged and matured to the level of a de facto parallel financial system. Finally, the third part goes beyond current regulatory concerns about shadow banking and explains why it is ‘here to stay’. This volume is of great importance to political economy, banking and international political economy.

The Routledge Handbook of State-Owned Enterprises

Routledge State-owned enterprises make up roughly 10 percent of the world economy, yet they are woefully understudied. This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation. The authors provide a detailed explanation of the theory that underpins the expansion of state-owned enterprises in the 21st century. Each chapter delivers an overview of current knowledge, as well as identifying issues and relevant debates for future research. The authors explain how state-owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states. New modes of governance and regulation have been invented to make sure they act in the public interest. This handbook brings together a wealth of international scholars, offering multiple theoretical perspectives to help shape a brave new world. It will be of interest to teachers and students of Economics, Public Administration and Business, academics, established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs, as well as practitioners and decision makers in international organizations.

Asian America

Sociological and Interdisciplinary Perspectives

John Wiley & Sons Asian Americans are the fastest growing minority population in the country. Moreover, they provide a wonderful lens on the experiences of immigrants and minorities in the United States more generally, both historically and today. In this timely new text, Pawan Dhingra and Robyn Magalit Rodriguez critically examine key sociological topics through the experiences of Asian Americans, including social hierarchies (of race, gender, and sexuality), work, education, family, culture, identity, media, pan-ethnicity, social movements, and politics. With vivid examples and lucid discussion of a broad range of theories, the authors demonstrate the contributions of the discipline of sociology to understanding Asian Americans, and vice versa. In addition, this text takes students beyond the boundaries of the United States to cultivate a comparative and global understanding of the Asian experience, as it has become increasingly transnational and diasporic. Bridging sociology and the growing interdisciplinary field of Asian American studies, and uniquely placing them in dialogue with one another, this engaging text will be welcome in undergraduate and graduate sociology courses such as race and ethnic relations, immigration, and social stratification, as well as on ethnic studies courses more broadly.

The Routledge Companion to Non-Market Strategy

Routledge It is commonplace for today's transnational enterprises to undertake political risk analysis when choosing foreign markets and creating entry strategies. Despite this, non-market elements of corporate strategy are less well researched than the traditional market-based perspectives. Providing comprehensive and leading edge overviews of current scholarship, this Companion surveys the current state of the field and provides a basis for improving our understanding of the non-market environment, encouraging new insights to improve strategies for enhancing a firm's performance and legitimacy. With a foreword by David Baron, the international team of contributors includes Jean-Philippe Bonardi, Bennet Zelner, and Jonathan Doh, who combine to create a book that is essential reading for students and researchers in business, management, and politics, including those interested in business regulation, environmental policy, political risk and corporate social responsibility.

The Oxford Handbook of China Innovation

Oxford University Press "The Oxford Handbook of China Innovation provides a contemporary and authoritative view of the role of innovation in China's extraordinary emergence. The Handbook consists of chapters written by over sixty experts from universities and research institutions worldwide, who describe and analyze this phenomenon with criticism, discussion of policy issues, and views about further development. It focuses on the microeconomic factors in China's growth, of which the critical force has been the steady drive for innovation. It identifies the many factors instrumental in the development of innovation and evaluates those that are specific to China's context, and those applicable to other nations. The scope of topics is comprehensive, covering China's development policies, the place of innovation in national priorities, the components of the national innovation system and the resources required for their effective deployment. These include the institutions and policies that provide incentives and support to technological development, including people, financial mechanisms, private ownership, rule of law and culture. The issue of foreign influence is also addressed, including the evolution of policy towards inward foreign direct investment and knowledge transfer and China's goals for outward foreign direct investment. The chapters include discussion of the capabilities and strategies of world-class Chinese innovators, together with emerging issues such as environmental remediation, green energy, digital innovation, open innovation, mass innovation and China's future science and technology policy. As China emerges as a contender for global leadership in many fields, the Handbook provides a foundation for informed conjecture regarding the challenges ahead"--

Entrepreneurship in Transition Economies

Diversity, Trends, and Perspectives

Springer This book presents a state-of-the-art portrait of entrepreneurship in the transition economies of Central and Eastern Europe (CEE) and the Commonwealth of Independent States (CIS) as well as Georgia and Ukraine. Based on new empirical evidence, it highlights major trends in, characteristics and forms of entrepreneurship common to countries in transition. The contributions cover topics such as levels of opportunity-based entrepreneurship, incentives for innovation, dominance of large-scale international corporations, the role of family businesses, and opportunities for grass-roots entrepreneurship. The first part of the book focuses on theoretical considerations regarding the establishment of sustainable entrepreneurial ecosystems and private business. In turn, the second part offers cross-border studies of entrepreneurial environments and activities, while the third and fourth present case studies on the current state and unique characteristics of entrepreneurship in various countries of the CEE and CIS as well as Georgia and Ukraine. Finally, the last parts discuss the role of institutions and policy recommendations.

India: Preparation for the World of Work

Education System and School to Work Transition

Springer This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market - because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.

The Routledge Companion to Global Female Entrepreneurship

Routledge The literature in female entrepreneurship has witnessed significant development in the last 30 years, with the research emphasis shifting from purely descriptive explorations towards a clear effort to embed research within highly informed conceptual frameworks. With contributions from leading and emerging researchers, The Routledge Companion to Global Female Entrepreneurship brings together the latest international research, concepts and thinking in the area. With a strong international dimension, this book will facilitate comparative discussion and analysis on all aspects of female entrepreneurship, including start-ups, socio-economic influences, entrepreneurial capital and minority entrepreneurship. Reflecting the subject's growing importance for researchers, academics and policy makers as well as those involved in supporting women's entrepreneurship through training programmes, networks, consultancy or the provision of venture capital, The Routledge Companion to Global Female Entrepreneurship will be an invaluable reference resource.

High-Growth Firms

Facts, Fiction, and Policy Options for Emerging Economies

World Bank Publications Remarkably, a small fraction of firms account for most of the job and output creation in high-income and developing countries alike. Does this imply that the path to enabling more economic dynamism lies in selectively targeting high-potential firms? Or would pursuing broad-based reforms that minimize distortions be more effective? Inspired by these questions, this book presents new evidence on the incidence, characteristics, and drivers of high-growth firms based on in-depth studies of firm dynamics in Brazil, Côte d'Ivoire, Ethiopia, Hungary, India, Indonesia, Mexico, South Africa, Thailand, Tunisia, and Turkey. Its findings reveal that high-growth firms are not only powerful engines of job and output growth but also create positive spillovers for other businesses along the value chain. At the same time, the book debunks several myths about policies to support firm dynamism that focus on outward characteristics, such as firm size, sector, location, or past performance. Its findings show that most firms struggle to sustain rapid rates of expansion and that the relationship between high growth and productivity is often weak. Consequently, the book calls for a shift toward policies that improve the quality of firm growth by supporting innovation, managerial skills, and firms' ability to leverage global linkages and agglomeration. To help policy makers structure policies that support firm growth, the book proposes a new ABC framework of growth entrepreneurship: improving Allocative efficiency, encouraging Business-to-business spillovers, and strengthening firm Capabilities. This book is the third volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers. 'Policy makers often get carried away by the disproportionate contributions of high-growth firms to job and output growth and commit to pursuing policies targeting the potential 'stars.' This book separates fact from fiction underpinning such interventions through a comprehensive analysis of high-growth firms across a range of developing countries, making a compelling argument that public policy to pick prospective winners is neither possible nor desirable. Policy makers would be wise to consult its arguments and policy advice when designing the next generation of policies to support the growth of firms.' William R. Kerr Professor of Business Administration, Harvard University; author of *The Gift of Global Talent: How Migration Shapes Business, Economy and Society* 'How to ignite and sustain high firm growth has eluded both economic analysis and thought leaders in policy and business. Through its meticulous and thoughtful analysis, this important new book provides a tractable framework to guide policy to harness the growth and productivity potential of firms in the developing-country context.' David Audretsch Distinguished Professor and Director of the Institute for Development Strategies, Indiana University

India Banking and Finance Report 2021

SAGE Publishing India India Banking and Finance Report 2021 presents a lucid yet rigorous discussion on the key facets of the Banking and Financial sector in India. Written primarily by the faculty of National Institute of Bank Management (NIBM), Pune, the report covers a wide spectrum of issues ranging from contemporary macro-financial perspectives against the backdrop of the ongoing pandemic to leadership concerns in Indian banks. The list of subjects included is topical, comprising corporate governance challenges, mergers and acquisitions, problems and prospects of the Bad Bank, latest risk management concepts and frontiers, sectoral studies, digital transformation and leadership paradigms. The report seeks to highlight the emerging challenges and opportunities in the banking and financial sector, glean important lessons from the past, and in some cases speculate on the way forward. It emphasizes on a blend of internal strategies, regulatory reforms and public policy initiatives. The report will stimulate enlightened dialogues on the theoretical, empirical and practical aspects of bank management in India.

The Oxford Handbook of Sovereign Wealth Funds

Oxford University Press Sovereign Wealth Funds (SWFs) represent both an increasingly important - and potentially dominant - category of alternative investor, and a novel form for governments to project their interests both home and abroad. As such, they represent both economic actors and embody power vested in the financial and diplomatic resources they can leverage. Although at times they have acted in concert with other alternative investors, their intergenerational savings function should, in theory at least, promote more long-termist thinking. However, they may be impelled in towards greater short termism, in response to popular pressures, demands from predatory elites and/or unforeseen external shocks. Of all the categories of alternative investment, SWFs

perhaps embody the most contradictory pressures, making for diverse and complex outcomes. The aim of this volume is to consolidate the present state of the art, and advance the field through new applied, conceptual and theoretical insights. The volume is ordered into chapters that explore thematic issues and country studies, incorporating novel insights in on the most recent developments in the SWF ecosystem. This handbook is organized into four sections and 23 chapters. The four sections are: Governance of SWFs, Political and Legal Aspects of SWFs, Investment Choices and Structures of SWFs, Country and Regional Analyses of SWFs.

The Economics of Entrepreneurship

Cambridge University Press This second edition of *The Economics of Entrepreneurship* is an essential resource for scholars following the current state of this fast-moving field, covering a broad range of topics in unparalleled depth. Designed to be used both as a textbook for specialist degree courses on the economics of entrepreneurship, and as a reference text for academic research in the field, the book draws on theoretical insights and recent empirical findings to show how economics can contribute to our understanding of entrepreneurship. New topics, such as crowdfunding, entrepreneurship education and microenterprise field experiments, appear for the first time, while existing treatments of topics like regional entrepreneurship, innovation and public policy are considerably deepened. Parker also discusses new empirical methods, including quasi-experimental methods and field experiments. Every section - indeed every page - of the new edition has been updated, resulting in a rigorous scientific account of entrepreneurship today.
