Detailed example pictures taken by the author in fifteen countries demonstrate both good and bad technique. Many pictures include links to the full-size image so you can zoom in to see every pixel. Most photography books use stock photography, which means the author didn't even take them. If an author can't take his own pictures, how can he teach you? In this book, Tony Northrup (award-winning author of more than 30 how-to books and a professional portrait, wildlife, and landscape photographer) teaches the art and science of creating stunning pictures. First, beginner photographers will master: Composition, Exposure, Shutter speed, Aperture, Depth-of-field (blurring the background), ISO, Natural light, Flash, Troubleshooting blurry, dark, and bad pictures, Pet photography, Wildlife photography (mammals, birds, insects, fish, and more), Sunrises and sunsets, Landscapes, Cityscapes, Flowers, Forests, waterfalls, and rivers, Night photography, Fireworks, Raw files, HDR, Macro/close-up photography. Advanced photographers can skip forward to learn the pro's secrets for: Posing men and women. including corrective posing (checklists provided), Portraits (candid, casual, formal, and underwater), Remotely triggering flashes, Using bounce flash and flash modifiers, Using studio lighting on any budget, Building a temporary or permanent studio at home, Shooting your first wedding, High speed photography, Location scouting/finding the best spots and times, Planning shoots around the sun and moon, Star trails (via long exposure and image stacking), Light painting, Eliminating noise, Focus stacking for infinite depth-of-field, Underwater photography, Getting close to wildlife, Using electronic shutter triggers, Photographing moving cars, Photographing architecture and real estate.*

## Mastering Canon EOS Flash Photography, 2nd Edition

**Rocky Nook, Inc.** *In this updated, second edition of the authoritative, bestselling Mastering Canon EOS Flash Photography, photographer NK Guy brings the book fully up to date, with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio-enabled Canon Speedlite 600EX-RT and Canon Speedlite Transmitter ST-E3-RT, as well as the other Speedlites that have released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX, and 600EX. And this is the first book to cover Canon's new, affordable master unit—the Speedlite 430EX III-RT flash! Digital cameras and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light, flash today is used for a host of creative and nuanced applications, including supplementing daylight, designing complex scenes lit by multiple light sources, and simply creating beautiful, controllable light for portraiture. With LCD screens on DSLRs, the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However, flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer-in-the-headlights look from built-in automatic flash, but it is a far cry from beautiful light. Creating natural-looking images is not nearly as straightforward. Mastering the properties of light and the ability to manipulate, craft, and direct it is a lifelong endeavor. Those diving into Speedlights need some help. Manuals are terse and the terminology is confusing—this is where Mastering Canon EOS Flash Photography comes in. This is the complete book on the subject, guiding you through Canon's Speedlite system, from off-camera portable flash to professional studio lighting. It covers the fundamentals of flash metering technology, discusses key lighting concepts, and documents a wide range of Canon and third-party equipment. Universal*

flash accessories, studio gear, and radio triggers are all thoroughly covered. The book is lavishly illustrated with diagrams that demonstrate important functions and lighting arrangements, and inspiring photos that show sophisticated flash techniques. Though tailored for users of Canon EOS cameras, owners of other camera systems will find much valuable information as well. So, whether you're just getting started with flash, or you've picked up the bug for off-camera lighting from such popular websites as *Strobist.com*, or you're making the leap into advanced studio work, *Mastering Canon EOS Flash Photography* is your in-depth resource. Includes a foreword by David Hobby, noted photojournalist and founder of *Strobist.com*.
