PROTECTING CHILDREN AGAINST CORPORAL PUNISHMENT**AWARENESS-RAISING CAMPAIGNS**

Council of Europe Research has shown that the vast majority of children throughout Europe have experienced some form of corporal punishment. This publication considers how to raise public awareness against the use of corporal punishment, drawing on case studies of three successful public education campaigns in the UK, Poland and the United States. Issues considered include how to plan a campaign, target groups, and conducting media campaigns and local activities. It also includes three model questionnaires aimed at support services for children and families, for children and for professionals.

HOME THEATER DESIGN**DRUNK STONED BRILLIANT DEAD****THE WRITERS AND ARTISTS WHO MADE THE NATIONAL LAMPOON INSANELY GREAT**

Abrams From its first issue in April, 1970, the National Lampoon blazed like a comet, defining comedy as we know it today. To create Drunk Stoned Brilliant Dead, former Lampoon illustrator Rick Meyerowitz selected the funniest material from the magazine and sought out the survivors of its first electrifying decade to gather their most revealing and outrageous stories. The result is a mind-boggling tour through the early days of an institution whose alumni left their fingerprints all over popular culture: Animal House, Caddyshack, Saturday Night Live, Ghostbusters, SCTV, Spinal Tap, In Living Color, Ren & Stimpy, The Simpsons—even Sesame Street counts a few Lamponers among its ranks. Long before there was The Onion and Comedy Central news shows, there was the National Lampoon, setting the bar in comedy impossibly high! A very similar title, differing only in the subtitle, was used for the 2015 documentary film, Drunk Stoned Brilliant Dead: The Story of the National Lampoon, for which Rick Meyerowitz designed the poster, as he also did for the 1978 film National Lampoon's Animal House.

CO-VERIFICATION OF HARDWARE AND SOFTWARE FOR ARM SOC DESIGN

Elsevier Hardware/software co-verification is how to make sure that embedded system software works correctly with the hardware, and that the hardware has been properly designed to run the software successfully -before large sums are spent on prototypes or manufacturing. This is the first book to apply this verification technique to the rapidly growing field of embedded systems-on-a-chip(SoC). As traditional embedded system design evolves into single-chip design, embedded engineers must be armed with the necessary information to make educated decisions about which tools and methodology to deploy. SoC verification requires a mix of expertise from the disciplines of microprocessor and computer architecture, logic design and simulation, and C and Assembly language embedded software. Until now, the relevant information on how it all fits together has not been available. Andrews, a recognized expert, provides in-depth information about how co-verification really works, how to be successful using it, and pitfalls to avoid. He illustrates these concepts using concrete examples with the ARM core - a technology that has the dominant market share in embedded system product design. The companion CD-ROM contains all source code used in the design examples, a searchable e-book version, and useful design tools. * The only book on verification for systems-on-a-chip (SoC) on the market * Will save engineers and their companies time and money by showing them how to speed up the testing process, while still avoiding costly mistakes * Design examples use the ARM core, the dominant technology in SoC, and all the source code is included on the accompanying CD-Rom, so engineers can easily use it in their own designs
