Joseph and Jürgen Buchenau explore the revolution's causes, dynamics, consequences, and legacies. They do so from varied perspectives, including those of campesinos and workers; politicians, artists, intellectuals, and students; women and men; the well-heeled, the dispossessed, and the multitude in the middle. In the process, they engage major questions about the revolution. How did the revolutionary process and its aftermath modernize the nation's economy and political system and transform the lives of ordinary Mexicans? Rather than conceiving the revolution as either the culminating popular struggle of Mexico's history or the triumph of a new (not so revolutionary) state over the people, Joseph and Buchenau examine the textured process through which state and society shaped each other. The result is a lively history of Mexico's "long twentieth century," from Porfirio Díaz's modernizing dictatorship to the neoliberalism of the present day. **Humanizing the Education Machine How to Create Schools That Turn Disengaged Kids Into Inspired Learners John Wiley & Sons** A clear roadmap for the new territory of education Education in the U.S. has been under fire for quite some time, and for good reason. The numbers alone tell a very disconcerting story: according to various polls, 70% of teachers are disengaged. Add to that the fact that the United States ranks last among industrialized nations for college graduation levels, and it's evident there's a huge problem that needs to be addressed. Yet the current education system and its school buildings—with teachers standing in front of classrooms and lecturing to students—have gone largely unchanged since the 19th century. *Humanizing the Education Machine* tackles this tough issue head-on. It describes how the education system has become ineffective by not adapting to fit students' needs, learning styles, perspectives, and lives at home. This book explains how schools can evolve to engage students and involve parents. It serves to spread hope for reform and equip parents, educators, administrators, and communities to: Analyze the pitfalls of the current U.S. education system Intelligently argue the need to reform the current landscape of education Work to make a difference in the public education system Be an informed advocate for your child or local school system If you're a concerned parent or professional looking for a trusted resource on the need for education reform, look no further than *Humanizing the Education Machine*. This illuminating resource provides the information you need to become a full partner in the new human-centered learning revolution. **Apple Pro Training Series Shake 3 Quick-Reference Guide Pearson Educacion** Sometimes you just need to know how to get around a great piece of software fast. Schools Cannot Do it Alone Building Public Support for America's Public Schools Vollmer and Associates Incorporated *Schools Cannot Do It Alone* tells of Jamie Vollmer, businessman and attorney, as he travels through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a practical program to secure the understanding, trust, permission, and support they need to change the system and increase student success.
