The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Transportation, Energy, and Environment How Far Can Technology Take Us? [Amer Council for an Energy](#) This book examines the potential for technological improvements in highway vehicles, railroads, and aircraft to move the U.S. transportation system toward greater sustainability. The book assesses state-of-the-art and emerging technologies for reducing air pollution, greenhouse gas emissions, and other energy-related impacts of fuel consumption. *Mechanix Illustrated Side Impact and Rollover Popular Science Car and Driver Pre-Incident Indicators of Terrorist Incidents The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct* [DIANE Publishing](#) This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. *Illustrations. Electric and Hybrid Cars A History, 2d ed.* [McFarland](#) This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.
