Youth policy manual for Arab countries

How to develop a national youth strategy

Council of Europe The EU-CoE youth partnership stems from the close relations that the Council of Europe and the European Commission have developed in the youth field over the years since 1998. The overall goal is to foster synergies between the youth-oriented activities of the two institutions. The specific themes are participation/citizenship, social inclusion, recognition and quality of youth work. What is youth policy, and what major elements should a national youth policy strategy include? How can young people be consulted and otherwise involved in developing youth policy? How do institutions such as the European Union, the Council of Europe and the United Nations address youth policy, and how can this work be concretely linked to the efforts of a national government to develop a youth policy agenda? How is youth policy organised in specific countries of the Middle East and North Africa (MENA) region? These are some of the essential questions addressed in this publication. The Youth policy manual should be considered a source work, a tool and a helpful guide both for policy makers in the youth field and for non-governmental organisations and other stakeholder groups who advocate improved youth policy at the national level. This manual proposes one possible model for how a national youth policy strategy can be developed. It is a revised version of the Youth policy manual (2009) and takes into account relevant specificities of the MENA region.

Manual of Tests and Criteria

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

Manual of Brazilian Portuguese Linguistics

Walter de Gruyter GmbH & Co KG This manual is the first comprehensive account of Brazilian Portuguese linguistics written in English, offering not only linguists but also historians and social scientists new insights gained from the intensive research carried out over the last decades on the linguistic reality of this vast territory. In the 20 overview chapters, internationally renowned experts give detailed yet concise information on a wide range of language-internal as well as external synchronic and diachronic topics. Most of this information is the fruit of large-scale language documentation and description projects, such as the project on the linguistic norm of educated speakers (NURC), the project "Grammar of spoken Portuguese", and the project "Towards a History of Brazilian Portuguese" (PHPB), among others. Further chapters of high contemporary interest and relevance include the study of linguistic policies and psycholinguistics. The manual offers theoretical insights of general interest, not least since many chapters present the linguistic data in the light of a combination of formal, functional, generative and sociolinguistic approaches. This rather unique feature of the volume is achieved by the double authorship of some of the relevant chapters, thus bringing together and synthesizing different perspectives.

eDemocracy

Public Online Engagement by the European Commission

diplom.de Inhaltsangabe:Abstract: Research on electronic democracy is still limited to a number of institutions, researchers and academics. Nevertheless, interest in the topic grows and new trends and best practices arise. The aim of this thesis was to elaborate on the founding principles of eDemocracy, to build a model for designing eDemocracy initiatives and to examine the current status quo of eDemocracy projects within the European Commission. This thesis is divided into two parts: a theoretical part and an empirical part. In order to build a solid foundation of the core principles of eDemocracy the thesis links reform mechanisms, which were developed under the New Public Management efforts, to economical and institutional theories that scientifically support the necessity for new ways of governance. It becomes clear that the evolution of eDemocracy is an outcome of diverse political and economical influences and that eDemocracy can substantiate efforts to re-invent governmental work processes. The first part of this thesis is based on an extensive literature research from various academic disciplines, including Economics, Institutional Theory, Information Technology and Political Studies. Sources for the theoretical part come from academic literature, academic journals and documents retrieved from the World Wide Web. The theories examined and the conclusions drawn upon these theories serve the purpose to gain a deeper understanding for the need to reform the

public sector and to improve its outcomes. Further, those findings allow us to incorporate eDemocracy into the eGovernment and eGovernance efforts, which are aimed to digitize governmental work processes. The model developed in part one acts as a benchmark for the examination of current public online engagement efforts on a European-wide level. The European Commission's web site, <http://europa.eu.int>, is scrutinized, in order to examine the current level of design and operability of the Commission's efforts in engaging the public in decision- and policy-making. For the evaluation of the success of these efforts, insights gathered from a personal interview with officials from the Interactive Policy Making team of the European Commission are incorporated. Additionally, online documents on the European Commission's official web site are examined that substantiate the Commission's intent to promote eDemocracy efforts and to make online engagement tools more accessible and more effective in the [...]

Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Envoy to Moscow

Memoirs of an Israeli Ambassador, 1988-92

Psychology Press On 3 January 1991, Aryeh Levin raised the flag over the Israeli consulate in Moscow for the first time in 24 years. Mr. Levin's sojourn in a hostile Russian capital from 1988 to the presentation of his credentials in 1991 takes place against a background of earthshaking events. His four-year tenure is a struggle to establish Soviet-Israeli relations on a solid footing and to facilitate the immigration of almost half a million Russian Jews. It is also a battle against misconceptions and narrow-mindedness on both sides. Mr. Levin's story is inextricably entwined with the process of reform and eventual collapse of the Soviet Union. An intimate knowledge of Russian and Middle Eastern politics gained from years of service in military intelligence and in the Israeli Foreign Ministry, and his fluent command of Russian, make Mr. Levin an acute observer of the workings of the Soviet system and the

Russian character. His memoir provides candid portraits of leading public figures, both Russian and Israeli, including Mikhail Gorbachev, Boris Yeltsin, Eduard Shevardnadze, Shimon Peres, David Levy and Yitzhak Shamir.
