**SWARM INTELLIGENCE**

---

---

**FOCUS ON ANT AND PARTICLE SWARM OPTIMIZATION**

---

*BoD - Books on Demand In the era globalisation the emerging technologies are governing engineering industries to a multifaceted state. The escalating complexity has demanded researchers to find the possible ways of easing the solution of the problems. This has motivated the researchers to grasp ideas from the nature and implant it in the engineering sciences. This way of thinking led to emergence of many biologically inspired algorithms that have proven to be efficient in handling the computationally complex problems with competence such as Genetic Algorithm (GA), Ant Colony Optimization (ACO), Particle Swarm Optimization (PSO), etc. Motivated by the capability of the biologically inspired algorithms the present book on "Swarm Intelligence: Focus on Ant and Particle Swarm Optimization" aims to present recent developments and applications concerning optimization with swarm intelligence techniques. The papers selected for this book comprise a cross-section of topics that reflect a variety of perspectives and disciplinary backgrounds. In addition to the introduction of new concepts of swarm intelligence, this book also presented some selected representative case studies covering power plant maintenance scheduling; geotechnical engineering; design and machining tolerances; layout problems; manufacturing process plan; job-shop scheduling; structural design; environmental dispatching problems; wireless communication; water distribution systems; multi-plant supply chain; fault diagnosis of airplane engines; and process scheduling. I believe these 27 chapters presented in this book adequately reflect these topics.*

### **SUPRANATIONALISM, ETHNOREGIONALISM, RELIGION, AND NEW NATIONALISM**

---

*Cambridge University Press How 'European' are Europeans? Is it possible to balance national citizenship with belonging to the European Union overall? Do feelings of citizenship and belonging respond to affiliations to regions, religions or reactionary politics? Unlike previous volumes about identity in Europe, this book offers a more comprehensive view of the range of identities and new arguments about the political processes that shape identity formation. The founders of European integration promised 'an ever closer union'. Nationalists respond that a people should control their own destiny. This book investigates who is winning the debate. The chapters show that attitudes toward broader political communities are changing, that new ideas are gaining ground, and that long-standing trends are possibly reversing course.*

*Taylor & Francis This volume contains the invited lectures, invited symposia, symposia, papers and posters presented at the 2nd European Cognitive Science Conference held in Greece in May 2007. The papers presented in this volume range from empirical psychological studies and computational models to philosophical arguments, meta-analyses and even to neuroscientific experimentation. The quality of the work shows that the Cognitive Science Society in Europe is an exciting and vibrant one. There are 210 contributions by cognitive scientists from 27 different countries, including USA, France, UK, Germany, Greece, Italy, Belgium, Japan, Spain, the Netherlands, and Australia. This book will be of interest to anyone concerned with current research in Cognitive Science.*

## **ENCYCLOPEDIA OF PSYCHOLOGICAL ASSESSMENT**

---

*SAGE 'once you let a clinical psychologist lay hands on this book, it is quite difficult to get it back again' - Martin Guha, Librarian, Institute of Psychiatry, London The Encyclopedia of Psychological Assessment is a landmark reference work and constitutes a definitive resource for academics, practitioners and students working in any field of applied psychological science. Psychological assessment is a key component of psychological work. Devices of scientific assessment are necessary for adequate describing, diagnosis, predicting, explaining or changing the behaviour of all subjects under examination. This double-volume collection offers complete coverage to facilitate action in each of these areas and will consequently be invaluable to psychologists in any applied setting. The two volumes of the Encyclopedia of Psychological Assessment contain a series of 235 entries, organized alphabetically, and covering a variety of fields. Each entry includes a general conceptual and methodological overview, a section on relevant assessment devices, followed by links to related concepts in the Encyclopedia and a list of references. The Encyclopedia of Psychological Assessment provides: - A comprehensive network for psychological assessment as a conceptual and methodological discipline, and as a professional activity - An overview of the complexity of assessment, which involves not only testing, but also a*

*process of decision-making for answering relevant questions that arise in the different applied fields - A presentation of relevant issues from basic theory (theoretical perspectives, ethics) and methodology (validity, reliability, item response theory) to technology and modes of assessment (tests, instruments and equipment for measuring behavioral operations) - An attempt to unify this diverse field by offering full coverage of all areas from the most traditional, such as clinical, educational and work and organizational psychology, to the most recent applications linked to health, gerontology, neuropsychology, psychophysiology and environmental assessment. The Encyclopedia of Psychological Assessment offers a truly international perspective, both in terms of the selected authors and chosen entries. It aims to provide an integrated view of assessment, bringing together knowledge dispersed throughout several methodological and applied fields, but united in terms of its relevance for assessment. It is an essential purchase for any library with an existing collection or concern with the field of psychological science in general.*

### **IMMIGRATION AND THE TRANSFORMATION OF EUROPE**

---

*Cambridge University Press A new kind of historic transformation is underway in twenty-first-century Europe. Twentieth-century Europeans were no strangers to social, economic and political change, but their major challenges focused mainly on the intra-European construction of stable, prosperous, capitalist democracies. Today, by contrast, one of the major challenges is flows across borders - and particularly in-flows of non-European people. Immigration and minority integration consistently occupy the headlines. The issues which rival immigration - unemployment, crime, terrorism - are often presented by politicians as its negative secondary effects. Immigration is also intimately connected to the profound challenges of demographic change, economic growth and welfare-state reform. Both academic observers and the European public are increasingly convinced that Europe's future will largely turn on how it admits and integrates non-Europeans. This book is a comprehensive stock-taking of the contemporary situation and its policy implications.*

*Springer Exploring the development of the European Union, this book examines the ways in which it has been studied over fifty years from the vantage point of four disciplines, each side of the Atlantic, and both academic and practitioner perspectives. Drawing on contributions by some of the world's leading scholars in the field, it maps the past and present of both the EU and EU studies before setting out a provocative agenda for future work in the area.*

---

### **LAND USE SIMULATION FOR EUROPE**

---

*Springer Science & Business Media Land use change is driven by a variety of forces, including spatial policies formulated at supra-national, national, regional and local levels. The main focus of this book is to contextualise, explain and illustrate a new methodology for simulating land use change in different parts of Europe. It considers some of the more important causal factors and identifies state-of-the-art approaches to modelling human and environmental systems, and for evaluating and visualising alternative scenarios. The last part of the volume presents material from two case studies, one from The Netherlands and one from Portugal, of the implementation of a new simulation model called EuroScanner. Audience: This work will be of interest to researchers and practitioners whose work involves geography, simulation and modelling, environmental planning, spatial decision making, the methodology of social sciences, and economics.*

## **EUROPEANIZATION**

---

### **INSTITUTIONS, IDENTITIES AND CITIZENSHIP**

---

*Rodopi The theme of Europeanization has, in recent years, come to figure prominently in a wide range of social science analyses concerning both the process of European integration and broader patterns of change in contemporary Europe. Yet, though increasingly a staple of academic discourse, no widely accepted definition of the term has emerged. This volume of the European Studies represents one of the first interdisciplinary attempts to examine the manifold uses and possibilities of a Europeanization*

---

problematic. An international team of contributors drawn from the disciplines of Politics, Sociology, History, Anthropology, and Law explore processes of institution-building and identity formation through the optic of Europeanization. Their work offers new insights as regards the development of European integration, pointing particularly to the need for a genuinely interdisciplinary European Studies which encompasses, but is not limited to, the study of the European Union.

**THE RELIGIOUS ROOTS OF CONTEMPORARY EUROPEAN IDENTITY**

---

*Bloomsbury Publishing This volume provides a coherent critical examination of current issues related to the religious roots of contemporary, i.e. post-1990 European identity, by analyzing the components of contemporary European identity, the presence of religion in the development of national identities, manifestation of religious roots in secular society, and the role of religion in further European integration and social inclusion. The book involves a multi and interdisciplinary approach to the theme, by bringing together scholars in history, religious studies, sociology, cultural studies, European studies, and international relations. This rigorously edited volume provides a coherent analysis of the religious roots of Europe's identity today, with particular attention to the secular context of religious communities. Europe is often perceived as secular by most of its citizens, regardless of their creed. Bearing this in mind, the authors build upon their expertise in different fields of arts and humanities to identify some of the key elements of European religious heritage and its manifestation in Europe's identity, be it secular or otherwise perceived. The authors also indicate the role these elements play in further European integration. With this focused approach, the publication identifies a number of similarities across faiths and, more holistically, vis-à-vis Europe. This serves the readers to perceive their own identity in a wider context of shared values, reaching beyond a particular faith or non-religious framework.*

## EUROPEAN POLITICS

---

---

### PASTS, PRESENTS, FUTURES

---

*Routledge This book arises out of a specially commissioned issue of West European Politics marking the journal's 30th anniversary. It examines the profound changes in the European political landscape over the last three decades, including the fall of Communism; progressive European integration; territorial restructuring; public sector reforms at European, national, regional and local levels; changes in democratic participation, protest, elections, political communication, political parties and party competition; and challenges to the welfare state. The book also discusses how political science has responded to these changes in terms of its substantive focus, concepts, methods and theories. Many of the 17 contributions included identify important challenges for the future, including those stemming from EU integration, the reduced electoral accountability of politicians, the problematic legitimization of party government and the sharpening of the edges of the state. Contributors include K. A. Anderson, F. C. Castles, C. Crouch, M. Egeberg, M. Ferrera, H. Goetz, L. Hooghe, E. M. Immergut, R. F. Inglehart, M. Keating, H.-D. Klingemann, H. Kriesi, M. Lodge, J. Lovenduski, P. Mair, G. Marks, Y. Mény, L. Morlino, H. Obinger, V. A. Schmidt, P. C. Schmitter, and G. Smith. This book was published as a special issue of West European Politics.*

## **HYBRID METAHEURISTICS**

---

### **6TH INTERNATIONAL WORKSHOP, HM 2009 UDINE, ITALY, OCTOBER 16-17, 2009 PROCEEDINGS**

---

*Springer The International Workshop on Hybrid Metaheuristics was established with the aim of providing researchers and scholars with a forum for discussing new ideas and research on metaheuristics and their integration with techniques typical of other fields. The papers accepted for the sixth workshop confirm that such a combination is indeed effective and that several research areas can be put together. Slowly but surely, this process has been promoting productive dialogue among researchers with different expertise and eroding barriers between research areas. The papers in this volume give a representative sample of current research in hybrid metaheuristics. It is worth emphasizing that this year, a large number of papers demonstrated how metaheuristics can be integrated with integer linear programming and other operations research techniques. Constraint programming is also featured, which is a notable representative of artificial intelligence solving methods. Most of these papers are not only a proof of concept - which can be valuable by itself - but also show that the hybrid techniques presented tackle difficult and relevant problems. In keeping with the tradition of this workshop, special care was exercised in the review process: out of 22 submissions received, 12 papers were selected on the basis of reviews by the Program Committee members and evaluations by the Program Chairs. Reviews were in great depth: reviewers sought to provide authors with constructive suggestions for improvement. Special thanks are extended to the Program Committee members who devoted their time and effort. Special gratitude is due to Andrea Lodi and Vittorio Maniezzo, who both accepted our invitation to give an overview talk.*

### **PLURALISM AND EUROPEAN PRIVATE LAW**

---

*Bloomsbury Publishing European private law has hitherto tended to be conceptualised firmly around ideas of unity and harmony. Yet the discourse within other areas of European law, notably constitutional law scholarship, visibly adopts pluralist perspectives. This*

*book seeks to bridge the gap between 'public' and 'private' law by looking at European private law from various pluralist positions and by investigating old and new ways in which to understand legal pluralism in general. It fills a gap in the wide literature on legal pluralism, as the first book entirely dedicated to offering an insight into legal pluralism from the vantage point of the private law domain. The book addresses critically issues such as what pluralism really means in private law and what conceptions of pluralism it embodies, including discussion about the outer boundaries of any of the pluralist understandings. Contributions address comparative, critical, historical, theoretical and normative aspects. The book provides an opportunity to engage innovatively with problematic conceptual issues which inform the work of European private law scholars, including the debate on the Common Frame of Reference Project of the European Commission.*
