Product Stewardship in Action

The Business Case for Life-cycle Thinking

Routledge *Product Stewardship in Action* describes how and why leading companies are taking responsibility for the environmental impact of their products and packaging. Product stewardship, often referred to as "extended producer responsibility" or EPR, is the idea that everyone that benefits commercially from a product, including manufacturers, distributors and retailers, has a shared responsibility to minimize its environmental impacts. Written primarily for a business audience, it draws on the knowledge and experience of industry practitioners and other experts to provide a structured approach to product responsibility within firms. This will help those new to the field, as well as more experienced practitioners, to develop an effective response to stakeholder concerns about the environmental impacts of their products and packaging. Unlike other resources on product stewardship and EPR, which tend to focus on the design or evaluation of public policy, this book highlights the business case for action. It argues that companies can achieve "shared value" — both public and commercial value — when they take a proactive and knowledge-based approach to the life-cycle management of their products. *Product Stewardship in Action* focuses on product stewardship as an effective business strategy rather than a philanthropic exercise. To be effective it needs to be based on a good understanding of product impacts and stakeholder concerns, and the risks and opportunities that these present to the business. The most effective responses will be those that address material issues in the product life-cycle while supporting the achievement of other corporate goals and priorities.

Energy Efficiency in Household Appliances and Lighting

Springer Science & Business Media Household appliances encompass a large variety of equipment including the cold appliances (refrigerators and freezers), the wet appliances (washing machines, dishwashers and dryers), the space conditioning appliances (heaters, air conditioners, heat pumps, fans, boilers), the water heaters, the cooking appliances, a wide array of consumer electronics (such as TVs, VCRs, HiFi systems) and miscellaneous small appliances (such as vacuum cleaners, irons, toasters, hairdryers and power tools). Household appliances save a large amount of domestic labour to perform the household tasks, as well as provide comfort conditions and convenience to the household occupants. The European Community SAVE Programme has promoted the efficient use of energy, in particular in domestic appliances. SAVE has sponsored a variety of studies to characterise the use of the main household appliances and lighting and to identify cost-effective technical options to improve the energy efficiency, as well as to identify the strategies to promote the penetration of efficient equipment in the market place. National energy agencies, independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job. While the energy efficiency of the main household appliances has been improved, at the same time it was possible in most cases to improve the appliance performance, reliability and quality of service.

Sussex Drive

A novel

Random House Canada A startlingly funny and deeply satisfying satirical novel that makes the Canadian political scene accessible from the female perspective, behind the scenes at the top of the hill. Torn from the headlines, *Sussex Drive* is a rollicking, cheeky, alternate history of big-ticket political items in Canada told from the perspectives of Becky Leggett (the sublimely capable and manipulative wife of a hard-right Conservative prime minister) and just a wink away at Rideau Hall, Lise Lavoie (the wildly exotic and unlikely immigrant Governor General)—two wives and mothers living their private lives in public. Set in recent history, when the biggest House on their turf is shuttered not once, not twice, but three times, Becky and Lise engage in a fight to the death in a battle that involves Canada's relationship to the United States, Afghanistan and Africa. The rest of the time, the women are driving their kids. From Linda Svendsen's sharp and wicked imagination comes a distaff Ottawa like no other ever created by a Canadian writer, of women manoeuvring in a political world gone more than a little mad, hosting world leaders, dealing with the challenges of minority government, and worrying about teen pregnancies and their own marriages. As they juggle these competing interests, Becky and Lise are forced to question what they thought were their politics, and make difficult choices about their families and their futures—federal and otherwise.

Pioneers, Hidden Champions, Changemakers, and Underdogs

Lessons from China's Innovators

MIT Press An insider's view of China's under-the-radar, globally competitive innovators. Chinese innovators are making their mark globally. Not only do such giants as Alibaba and Huawei continue to thrive and grow through innovation, thousands of younger Chinese entrepreneurs are poised to enter the global marketplace. In this book, Mark Greeven, George Yip, and Wei Wei offer an insider's view of China's under-the-radar, globally competitive innovators. The authors, all experts on Chinese innovation, distinguish four types of innovators in China: pioneers, large companies that are globally known; hidden champions, midsize enterprises that are market leaders in their niches; underdogs, technology-driven ventures with significant intellectual property; and changemakers, newer firms characterized by digital disruption, exponential growth, and cross-industry innovations. They investigate what kinds of innovations these companies develop (product, process, or business model), their competitive strategies, and key drivers of innovation. They identify six typical ways Chinese entrepreneurs innovate, including swarm innovation (collectively pursuing opportunities) and rapid centralized decision making. Finally, they look at how Chinese innovators are going global, whether building R&D networks internationally or exporting disruptive business models. The book includes many examples of Chinese innovators and innovations, drawn from a range of companies—from pioneers to changemakers—including Alibaba, Haier, Hikvision, Malong Technology, Weihua Solar, Mobike, and Cheetah Mobile. Greeven, Yip, and Wei offer an essential guide to what makes China a heavyweight competitor in the global marketplace.
