GROWING LEADERS WITHIN

A PROCESS TOWARD TEACHER LEADERSHIP

Rowman & Littlefield **Growing Leaders Within: A Process toward Teacher Leadership will aid school administrators in the task of growing and empowering teacher leaders. The goal of growing teacher leaders is to grow a school culture of shared decision-making and collaborative leadership. It is through this transformation that teacher leaders help school administrators to create a laser focus on student success. The underpinnings of the book are based on academic research resulting in a seven-step process to growing teacher leaders, which is distinctive from other books about teacher leadership. Schools may have several teacher leader candidates, but it is the responsibility of the school administration to ensure that the right individuals are chosen to become part of the school's leadership team. The role of teacher leadership can be diminished**

if the wrong individuals are selected. In response to this, the book offers school administrators a research-based, pragmatic growth process that ensures the right teachers are chosen to enter the leadership ranks at any school. Growing and empowering teachers to be leaders is now critical in all schools.

ASTRONOMY, GRADES 6 - 12

OUR SOLAR SYSTEM AND BEYOND

Mark Twain Media Reinforce good scientific techniques! The teacher information pages provide a quick overview of the lesson while student information pages include Knowledge Builders and Inquiry Investigations that can be completed individually or as a group. Tips for lesson preparation (materials lists, strategies, and alternative methods of instruction), a glossary, an inquiry investigation rubric, and a bibliography are included. Perfect for differentiated instruction. Supports NSE and NCTM standards.

TOWARD DEFINING AND IMPROVING QUALITY IN ADULT BASIC EDUCATION

ISSUES AND CHALLENGES

Routledge This volume revisits, problematizes, and expands the meaning of quality in the context of adult basic education. Covering a wide range of relevant topics, it includes contributors from the realms of both policy and practice and encompasses both the major instructional areas-reading, writing, and mathematics-as well as larger issues of literacy, learning, and adulthood. Each chapter focuses on what improving quality in the field might look like through the particular lens of the author's work. As a whole, the broad scope of topics and ideas addressed will raise the level of discussion, knowledge, and practice regarding quality in adult basic education. In this book, the term adult basic education refers to the broad range of services for adults who wish to improve their literacy and language skills, including beginning and intermediate writing, writing and numeracy, preGED, GED/Adult Secondary Education, and ESL instruction that takes place in a range of contexts including schools, community-based programs, and workplace development programs. The volume is organized

around three themes: *Accountability, Standards, and the Use of Documentation and Research; *Program Structures and Instruction; and *Rethinking Our Assumptions and Concepts. Coming at a time of increasing pressure to standardize, to be accountable, and to improve outcomes, and when calls for evidence-based practice are fueling stakeholders' interest in the relationship between research and practice at all levels of the system, *Toward Defining and Improving Quality in Adult Basic Education* is particularly timely for scholars, graduate students, and professionals in the field of adult basic education.

MODULE A

INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS

Cengage Learning **INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS** shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master concepts, problem solving, and communication skills. It modifies the rule of four, integrating algebraic techniques, graphing, the use of data in tables, and writing sentences to communicate solutions to application problems. The authors have developed several key ideas to make concepts real and vivid for students. First, the authors integrate applications, drawing on real-world data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Second, they emphasize strong algebra skills. These skills support the applications and

enhance student comprehension. Third, the authors use an eyeball best-fit approach to modeling. Doing models by hand helps students focus on the characteristics of each function type. Fourth, the text underscores the importance of graphs and graphing. Students learn graphing by hand, while the graphing calculator is used to display real-life data problems. In short, **INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS** takes an application-driven approach to algebra, using appropriate calculator technology as students master algebraic concepts and skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

CRIME SCENE INVESTIGATIONS

REAL-LIFE SCIENCE ACTIVITIES FOR THE ELEMENTARY GRADES

Jossey-Bass Turn your elementary students into super sleuths with the 60 exciting lessons and worksheets in this unique resource! All provide complete teacher background information and reproducible activity sheets that challenge students to observe carefully, organize and record data, think critically, and conduct simple tests to solve crimes ranging from theft and dog-napping to vandalism and water pollution. Organized into four sections covering Inquiry & Technology...Earth Science...Life Science...and Physical Science.
