Sensory Marketing Research on the Sensuality of Products Routledge What is sensory marketing and why is it interesting and also important? Krishna defines it as "marketing that engages the consumers' senses and affects their behaviors." In this edited book, the authors discuss how sensory aspects of products, i.e., the touch, taste, smell, sound, and look of the products, affect our emotions, memories, perceptions, preferences, choices, and consumption of these products. We see how creating new sensations or merely emphasizing or bringing attention to existing sensations can increase a product's or service's appeal. The book provides an overview of sensory marketing research that has taken place thus far. Talking Heads' Fear of Music Bloomsbury Publishing USA It's the summer of 1979. A fifteen-year-old boy listens to WNEW on the radio in his bedroom in Brooklyn. A monotone voice (it's the singer's) announces into dead air in between songs "The Talking Heads have a new album, it's called Fear of Music" - and everything spins outward from that one moment. Jonathan Lethem treats Fear of Music (the third album by the Talking Heads, and the first produced by Brian Eno) as a masterpiece - edgy, paranoid, funky, addictive, rhythmic, repetitive, spooky and fun. He scratches obsessively at the album's songs, guitars, rhythms, lyrics, packaging, downtown origins, and legacy, showing how Fear of Music hints at the directions (positive and negative) the band

would take in the future. Lethem transports us again to the New York City of another time - tackling one of his great adolescent obsessions and illuminating the ways in which we fall in and out of love with works of art.
