Molecular Thermodynamics Of Electrolyte Solutions (Second Edition)

World Scientific **Electrolytes and salt solutions are ubiquitous in chemical industry, biology and nature. This unique compendium introduces the elements of the solution properties of ionic mixtures. In addition, it also serves as a bridge to the modern researches into the molecular aspects of uniform and non-uniform charged systems. Notable subjects include the Debye-Hückel limit, Pitzer's formulation, Setchenov salting-out, and McMillan-Mayer scale. Two new chapters on industrial applications — natural gas treating, and absorption refrigeration, are added to make the book current and relevant. This textbook is eminently suitable for undergraduate and graduate students. For practicing engineers without a background in salt solutions, this introductory volume can also be used as a self-study.**

Focus on Solutions

A Health Professional's Guide

John Wiley & Sons **Solution Focused Brief Therapy (SFBT) promotes collaborative work and positive outcomes. It is an approach that can be used in acute hospitals as well as with clients who are seen as outpatients or in the community. Written in an accessible style with over seventy case examples Focus on Solutions shows how SFBT can help people who are suffering from voice or memory difficulties, a stammer, a stroke, HIV, traumatic brain injury or illnesses such as cancer or Parkinson' s disease. The book provides a practical framework as to how individuals, families and groups can begin to work on their strengths by focusing on the solutions rather than the problems in their lives. Focus on Solutions contains many useful ideas for experienced practitioners and those new to solution focused work, which is of growing importance in the health service as well as business and education. Therapists, doctors, nurses or psychologists will find this book an invaluable contribution to the field of reflective practice.**

Expertise

Springer Science & Business Media **New data have come to light through the Solution Focused Brief Therapy Association Archive (hereafter, the Archive). This information is drawn from manuscripts and video featuring one of the SF founders, Insoo Kim Berg, MSW. Archive video examples of Ms. Berg conducting supervision, therapy teams, and case consultation as well as unpublished manuscripts written by her provide unique opportunities to illustrate specific assumptions and techniques rarely seen before. The documents outline Ms. Berg's philosophy, assumptions, and techniques to conduct supervision, and the videos offer in vivo examples of her supervision and team/case consultation style. Together, the Archive materials offer a rich resource for a book that both informs and illustrates SFS.**

Solution-oriented Social Work Practice

An Integrative Approach to Working with Client Strengths

Oxford University Press, USA **Too often in practice, there is a tendency to pathologize clients, requiring a diagnosis as part of the helping relationship. Suppose, however, that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong. This powerful idea is the philosophy behind the strengths-based approaches to social work. This groundbreaking practice handbook takes this concept one step further, combining the different strengths-based approaches into an overarching model of solution-oriented social work for greater impact. The strengths perspective emphasizes client strengths, goal-setting, and a shared definition of positive outcome. Solution-focused therapy approaches ongoing problems when they have temporarily abated, amplifying exceptions as solutions. This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors, two seasoned practitioners with over 50 years of combined experience. By integrating the most useful aspects of the major approaches, a step-by-step plan for action emerges. With this text in hand, you will:**

- Integrate elements from the strengths perspective, solution-focused therapy, narrative therapy, and the strategic therapy of the Mental Research Institute (the MRI approach) into an effective and eclectic framework
- Build and practice your skills using case examples, transcripts, and practical advice
- Equip yourself with the tools you need to emphasize clients' strengths
- Challenge the diagnosis-first medical model of behavioral health care
- Collaborate with clients to get past thinking (first-order change), and more to acting "outside

the box" (second-order change) - Learn to work with a wide variety of clients, including individuals, groups, and families; involuntary clients; clients with severe mental illness; and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change, this is the essential text.

Kinetic Processes

Crystal Growth, Diffusion, and Phase Transformations in
Materials

John Wiley & Sons **The formation of solids is governed by kinetic processes, which are closely related to the macroscopic behaviour of the resulting materials. With the main focus on ease of understanding, the author begins with the basic processes at the atomic level to illustrate their connections to material properties. Diffusion processes during crystal growth and phase transformations are examined in detail. Since the underlying mathematics are very complex,**

approximation methods typically used in practice are the prime choice of approach. Apart from metals and alloys, the book places special emphasis on the growth of thin films and bulk crystals, which are the two main pillars of modern device and semiconductor technology. All the presented phenomena are tied back to the basic thermodynamic properties of the materials and to the underlying physical processes for clarity.

Bible School

WestBow Press My book is not a substitute for reading the Bible; instead, it is a teaching tool of your knowledge of the Bible. It contains pop quizzes (fill in the blanks, true/false statements, and general questions) from all sixty-six books in the Bible. With that shared, please read a book in the King James Version of the Bible. Then, open my book and read the pop quizzes for that corresponding book. For example, read the book of Matthew. Then, read the pop quizzes for the book of Matthew in my book. I have faith that you will do phenomenally well!

Problems and Solutions in Human Assessment

Honoring Douglas N. Jackson at Seventy

Springer Science & Business Media The assessment of individual differences has generated shockwaves affecting sociology, education, and a number of other behavioral sciences as well as the fields of management and organizational behavior. In covering the assessment of individual differences, this book pays tribute to the interests and activities that Douglas N. Jackson has incorporated into his career as a psychologist. He continues to be a leader in putting academic findings to practical use. He has also inspired generations of students with his mastery of complex concepts and as a personal example of the ability to balance several simultaneous areas of research. Consistent with the focus of Jackson's research, the theme of this book will be how the use of deductive, construct-driven strategies in the assessment of individual differences leads to benefits in terms of the applicability of the assessment instruments and the clarity of the conclusions that can be drawn from the research.

Climate Change Solutions and Environmental Migration

The Injustice of Maladaptation and the Gendered 'Silent Offset' Economy

Routledge **This book lifts the taboo on maladaptation, a different driver of environmentally induced migration, which shines a light on the negative consequences arising from the solutions to climate change, adaptation and mitigation policies. Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change (UNFCCC) and international development community, and supplemented by a small empirical study in Indonesia, this book catalogues how maladaptation is manufactured under existing climate change solutions. It posits that customary communities in general- and women in particular- are disproportionately affected by the dominant market-driven logics that underscore current climate change solutions adopted by the UNFCCC. The injustice of maladaptation is highlighted as multi-faceted and explored using political, economic, social and ecological lenses, and the concept of environmental reintegration is also explored as a possible solution to this issue. Further possibilities are then presented in the Afterword, as a combination of what the new**

(post-neoliberalism) conjuncture could potentially look like. This volume will be of great interest to students, scholars and practitioners of climate change, environmental policy, environmental migration and displacement, development studies, I/NGOs and civil society actors and activists more broadly.

Ghazali's Politics in Context

Routledge Imam Abū Hamid al-Ghazalī is perhaps the most celebrated Muslim theologian of medieval Islam yet little attention has been paid to his personal theology. This book sets out to investigate the relationship between law and politics in the writings of Ghazalī and aims to establish the extent to which this relationship explains Ghazalī's political theology. Articles concerned with Ghazalī's political thought have invariably paid little attention to his theology and his thinking about God, neglecting to ask what role these have contributed to his definition of politics and political ethics. Here, the question of Ghazalī's politics takes into account his thinking on God, knowledge, law, and the Koran, in addition to political systems and ethics. Yazeed Said puts forward the convincing argument that if Ghazalī's legal and political epistemology provide a polemic analogous to his writings on philosophy, for which he is more famed, they would reveal to us a manifesto for an alternative order, concerned with a coherent definition of the community, or Ummah. This book will be an invaluable resource for students and scholars of the Middle East, political theology and Islamic studies.

Cosmetics and Dermatologic Problems and Solutions, Third Edition

CRC Press **Cosmetics for skin, hair, and nails play a vital part in the management and treatment of many dermatological conditions; unfortunately, they may also at times be the cause of some dermatological problems. They are therefore subjects where dermatologists need to be aware of the major commercial developments taking place, in addition to the many common Over The Counter products already available, in order to be vigilant in checking the possible benefits or disadvantages for patients. This text takes a serious look at the integration of skin care products, cosmetics, hair adornments, and nail cosmetics in the daily practice of dermatology, expanding the realm of disease treatment beyond diagnosis and treatment into the maintenance phase of healthy skin, hair, and nails.**

Mass Killing and Genocide in the 20th Century

Cornell University Press **Benjamin A. Valentino** finds that ethnic hatreds or discrimination, undemocratic systems of government, and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing, in his view, is a brutal political or military strategy designed to accomplish leaders' most important objectives, counter threats to their power, and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentino does not limit his analysis to violence directed against ethnic groups, or to the attempt to destroy victim groups as such, as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants, using the criteria of 50,000 or more deaths within five years as a quantitative standard. *Final Solutions* focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and "counter-guerrilla" campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.
