Proceedings of the 7th International Conference on Business and Finance

AOSIS Cape Town, South Africa, 9 Sept. 2015 - 10 Sept. 2015. Theme: 'Creating futures: Sustainable economies?', Purpose: To share continuous and collaborative research outputs that review existing strategies and to propose mechanisms for the likely achievement of a sustainable economy that is unique but inclusive to different entities in the world. Target audience: This year's 7th International Conference on Business and Finance (ICBF) continues its tradition of being the premier forum for presentation of research results and experience reports on contemporary issues of finance, accounting, entrepreneurship, business innovation, big data, e-Government, public management, development economics and information systems, including models, systems, applications, and theory. Editorial Policy: All papers were refereed by a double blind reviewing process in line with the South African, Department of Higher Education Training (DHET) refereeing standards. Papers were reviewed according to the following criteria: relevance to conference themes, relevance to audience, contribution to scholarship, standard of writing, originality and critical analysis.

Public Procurement Reform and Governance in Africa

Springer This book presents an interdisciplinary exploration of the governance of public procurement reform in Africa. Through a bottom-up approach to case studies and comparative analyses, scholars, practitioners, and social activists write about the organizational mechanisms and implementation gaps in public procurement governance in light of the general premises of national reform. Reforming the ways in which government purchases works, goods, and services from the private sector is one of the most sweeping policy reform undertaken in Africa in the past decade. Despite the transnational scope of policy change, very little is known about the mechanisms of public procurement governance at the subnational level. The argument in this volume is that policy reforms that mitigate contractual hazards along the three-dimensional “law-politics-business matrix” are more likely to bring about meaningful institutional transformation and broader social accountability. Key to substantive transformation of public procurement is the revitalization and professionalization of the public sector to meet the opportunities and challenges of development by contract.

The Autonomy of Labour Law

Bloomsbury Publishing To what extent is labour law an autonomous field of study? This book is based upon the papers written by a group of leading international scholars on this theme, delivered at a conference to mark Professor Mark Freedland's retirement from his teaching fellowship in Oxford. The chapters explore the boundaries and connections between labour law and other legal disciplines such as company law, competition law, contract law and public law; labour law and legal methodologies such as reflexive governance and comparative law; and labour law and other disciplines such as ethics, economics and political philosophy. In so doing, it represents a cross-section of the most sophisticated current work at the cutting edge of labour law theory.

Cambridge IGCSE® Business Studies Coursebook with CD-ROM

Cambridge University Press This revised set of resources for Cambridge IGCSE Business Studies syllabus 0450 (and Cambridge O Level Business Studies syllabus 7115) is thoroughly updated for the latest syllabus for first examinations from 2015. Written by experienced teachers, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; case studies contextualise the content making it relevant to the international learner. It provides thorough examination support for both papers with questions at the end of each chapter and an extensive case study at the end of each unit. The CD-ROM contains revision aids, further questions and activities. A Teachers CD-ROM is also available.

Russian Electricity and Energy Investment Law

BRILL This book analyzes the regulatory framework that Russia has developed to attract private capital and technology in the modernization of the electricity infrastructure. Comparing Russian and EU electricity law, the book identifies regulatory risks and examines investors' protection under Russian and international investment law.

Oswaal Books and Learning Private Limited • 5 Sample Papers in each subject. 2 solved & 3 Self-Assessment Papers • Includes all latest typologies of Questions • On-Tips Notes & Revision Notes for Quick Revision • Mind Maps for better learning

The International Business Environment

Oxford University Press, USA Will the expansion of the Chinese economy result in job losses in the USA? How can a natural disaster in Japan cause world stock markets to plummet? What impact does the Arab Spring have on the petroleum industry in the Middle East and North Africa? Adopting a clear global perspective, this textbook is an essential introduction to the challenges of the international business environment. The book begins by setting the global context and evaluating the idea of international industries, the world economy, and the threats and opportunities of global markets. The authors then identify the core issues faced by businesses and the dynamic socio-cultural, technological, political, legal, and ecological environments in which they operate. Case studies are sourced from almost every continent in the world, including a wealth of examples from the emerging markets of Africa, South America, and Asia. In addition, each chapter provides a range of learning tools designed to test and develop the reader's understanding. Questions

and assignment tasks ensure students can apply their knowledge to real-world scenarios, while full colour diagrams throughout the book illustrate business environment theory and comparative examples with particular clarity. This unique combination of accessible theory, diverse case studies, and reflection points will prepare the reader for academic success and develop the professional skills required to excel in their future global business career. New to this edition New assignment tasks at the end of every chapter provide real-world scenarios to develop employability skills and apply understanding. New questions in the mini case studies and counterpoint boxes encourage critical thinking and reflection throughout the book. A wealth of new and updated case studies from around the world illustrate the challenges faced by contemporary organizations in regions as diverse as Africa, Europe, Asia, and the United States. Updated to reflect developments in the financial, political, legal, and technological environments since the publication of the previous edition, including the Arab Spring, economic sanctions on Russia, and changes in the global banking sector.

Global Governance and India's North-East Logistics, Infrastructure and Society

Taylor & Francis This book maps the convergence of governance and connectivity within Asia established through the spatial dynamics of trade, capital, conflict, borders and mobility. It situates Indian trade and governance policies within a broader Asian and global context. Focussing on India's North-East, in particular on India's Look and Act East Policy, the volume underscores how logistical governance in the region can bring economic and political transformations. It explores the projected development of the North-East into a gateway of transformative cultural interaction among people, just as the Silk Road became a conduit for Buddhism to travel along with musical instruments and tea. Comprehensive and topical, this book will be useful for scholars and researchers of political studies, international relations, governance studies, development studies, international trade and economics and for think tanks working on South and Southeast Asia.

Global Mindsets

Exploration and Perspectives

Routledge Global Mindsets seeks to tackle a topic that is relatively new in research and practice, and is considered by many to be critical for firms seeking to conduct global business. It argues that multiple mindsets exist (across and within organizations), that they operate in a global context, and that they are dynamic and undergo change and action. Part of the mindset(s) may depend upon place, situation and context where individuals and organizations operate. The book examines the notion of "mindset" is situational and dynamic, especially in a global setting, why it is important for future scholars and managers and how it could be conceptualized. The book includes conceptual chapters that push the current boundaries of research on the topic and empirical chapters that demonstrate how different organizations in different countries apply mindset perspectives in their management practices. It seeks to help academics, consultants, and researchers understand what has been said and studied about global mindsets in action and gain insights into possible directions and challenges that the field may face in the future.

The Changing Security Dynamics of the Persian Gulf

Oxford University Press The contradictory trends of the 'post-Arab Spring' landscape form both the backdrop to, and the focus of, this volume on the changing security dynamics of the Persian Gulf, defined as the six GCC states plus Iraq and Iran. The political and economic upheaval triggered by the uprisings of 2011, and the rapid emergence of the Islamic State of Iraq and Syria in 2014, have underscored the vulnerability of regional states to an intersection of domestic pressures and external shocks. The initial phase of the uprisings has given way to a series of messy and uncertain transitions that have left societies deeply fractured and ignited violence both within and across states. The bulk of the protests, with the notable exception of Bahrain, occurred outside the Gulf region, but Persian Gulf states were at the forefront of the political, economic, and security response across the Middle East. This volume provides a timely and comparative study of how security in the Persian Gulf has evolved and adapted to the growing uncertainty of the post-2011 regional landscape.

Peacemaking and the Extractive Industries

Towards a Framework for Corporate Peace

Routledge Peacemaking and the Extractive Industries addresses a significant gap in research on the political and diplomatic role of multinational corporations in peace processes in intrastate conflict: *Corporate Peacemaking*. The author focuses on corporations in the oil and mining sectors, supporting or participating in peace negotiations and mediation. The chapters explore national-level peace processes, as well as those at community and global levels. While the focus is on extractive companies, the findings are valuable to companies from all industries looking at peace-related processes. This ground-breaking book gives a comprehensive picture of how *Corporate Peacemaking* currently works, how it can be developed and implemented, and how it is likely to impact global governance and corporate culture in the future. The book demonstrates that *Corporate Peacemaking* has the potential to be a powerful element in international governance and peace efforts; and Ralph shows through the business case that companies, as well as communities, will benefit. Ralph presents a new framework for Corporate Peace that will assist companies from all sectors in countries experiencing violent conflict, in addition to instability, human rights abuses and poor governance. Based on rigorous academic research with practical case studies, it is essential reading for practitioners, academics, policy-makers and NGOs.

Vocabularies of International Relations After the Crisis in Ukraine

Taylor & Francis The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the de-legitimation of international institutions and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or, does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic vigour of conventional concepts? These questions are the starting points for this book covering conceptualisations from rationalist to reflectivist, and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multipolarity, spheres of influence, sovereignty, or even containment, are still cognitively valid, yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple, conceptual languages that

the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

Outward Foreign Direct Investment in ASEAN

Flipside Digital Content Company Inc. The level of outward foreign direct investment (OFDI) flows from ASEAN countries has increased rapidly in past two decades. This book examines OFDI trends and patterns in the ASEAN region including the impact of the ASEAN Economic Community. It also provides analyses of country policies affecting OFDI and the drivers of OFDI in Indonesia, Malaysia, Singapore and Vietnam. Myanmar is studied as an investment frontier for other ASEAN countries. "e;The dynamic economies of Southeast Asia have historically been very large recipients of foreign direct investment (FDI). As global capital markets have opened up, and these economies have developed their technological and commercial capabilities, in more recent years Southeast Asia has emerged as a significant source of outward FDI both within the region and beyond. This important volume, by a group of leading regional scholars, offers a timely, comprehensive, accessible and authoritative analysis of this phenomenon."e;-Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Arndt-Corden Department of Economics, Crawford School of Public Policy, Australian National University"e;A timely, rich and comprehensive study filling a major gap in the literature on the increasingly important phenomenon of foreign investment flowing out from regions including developing and middle-income countries."e; -Luke Nottage, Professor of Comparative and Transnational Business Law; Associate Director, Centre for Asian and Pacific Law at the University of Sydney

A New Scramble for Africa?

The Rush for Energy Resources in Sub-Saharan Africa

Routledge Global energy consumption will increase rapidly in the next decades. The discrepancy between demand and supply is worrisome within the old and new cores of the world-economy. Sub-Saharan Africa meanwhile possesses vast potential for energy resources to be further exploited. Whilst the Global North is a traditional player in the sub-Saharan energy sector, new actors from emerging economies - especially China's state-owned enterprises but also Brazilian, Indian and South African giants - have entered what appears to be a scramble for the largely untapped energy resources of the region. This book is the first to bring together comparative perspectives on: · The strategies of state and non-state actors involved in the exploitation of sub-Saharan energy

resources. · The potential and pitfalls of new forms of cooperation on energy southwards of the Sahara. · The domestic opportunities and challenges of the present energy resource boom. Dynamics on the international level are brought together with local developments to provide up-to-date insights on the scramble for energy resources in sub-Saharan Africa. This book also advances a materialist approach applicable in geographical and political-scientific research, showing that much insight can be gained by concentrating on the material environment that shapes economic and political phenomena.

Challenges and Opportunities of Educational Leadership Research and Practice

The State of the Field and Its Multiple Futures

IAP As the sixth volume in the International Research on School Leadership series, the contributing authors in this volume consider the history, challenges, and opportunities of the field of research and practice in educational leadership and administration in schools and districts. Ten years after the work of Firestone and Riehl (2005) and their contributing authors, our aim with the present volume was to summarize and update the work of the field, and provide a space to consider the multiple futures of educational leadership in schools and districts, as both challenges and opportunities. The first decade of the twenty-first century brought significant critiques, challenges, and competition to the research and practice of training leaders and administrators of schools and districts around the world. Congruently, the field experienced significant growth and change, as multiple new sub-domains flourished and were founded. Thus, in this volume we were delighted to include excellent chapters from multiple authors that considered the duality of the challenges and opportunities of:

- The work of the field of educational leadership and administration research to date.
- The opportunities and challenges of new visions of leadership in traditional and non-traditional schools.
- The evolving state of research evidence in educational leadership and the increasing sophistication of multiple methodologies, including qualitative research, quantitative modeling, the ability to test theory, and the increasing opportunities brought on by the intersection of data, research, and practice.
- The preparation of educational leaders.
- And the emerging trends in the professional development of school leaders.

The authors of the nine chapters in the present book volume took on this challenge of confronting the duality of not only including the past as we look to the future, but also the duality of the critique of the field in the midst of exciting and significant progress in our knowledge and understanding of leadership in schools. In the first section of the book (Chapters 2, 3 and 4), the authors examine the

interplay of educational leadership research and theory as it relates to reform in schools, especially as it relates to serving historically underserved populations globally. In section 2 (Chapters 5 and 6), the authors highlight the importance of methodological considerations in school leadership research as a means to understand theory and practice as well as providing interesting avenues that point to multiple exciting future possibilities through relying on current innovations noted within the chapters. Section 3, (Chapters 7 and 8) examine the research and practice of school leadership preparation, especially as it relates to university-district partnerships and non-traditional school settings. And in the final chapter, (Chapter 9), our capstone contributor provides a means to link the present volume with the past writings on these topics, while also providing a lens to view the exciting possibilities and promises of the multiple futures of the field of educational leadership research and practice.

Transnational Gas Markets and Euro-Russian Energy Relations

Springer This book analyses how transnational gas markets have evolved and impacted on EU-Russia energy relations. It examines how the political conflict surrounding Ukraine has accelerated a negative interdependence in the region, with energy interdependence increasingly used as an instrument of diplomacy.

Corporations and Disability Rights

Bridging the Digital Divide

Oxford University Press The emergence of a decentralized, fragmented, and low-cost Internet opened up possibilities for persons with disabilities to lead an independent and inclusive life, which had been denied to them in the physical world. The virtual world, unlike the physical world, was presumed to be devoid of physical, social, and attitudinal barriers that have historically led to the marginalization and exclusion of persons with disabilities. Yet with advancement in technology, concerns of persons with disabilities to access the Internet were relegated to the background. Since the Internet is largely dominated by corporations, this digital divide cannot be bridged without questioning their role; and corporations, as gatekeepers of the virtual world, need to proactively engage in dismantling barriers to accessing the Internet. *Corporations and Disability Rights* engages with the contemporary discourse on the

nature of the right to access the Internet and contextualizes this right within the framework of emerging disability rights jurisprudence. This book explores the interplay between human rights of persons with disabilities and corporate obligation in a technologically advanced society. It argues that under disability rights jurisprudence, the right to access the Internet is a human right and not merely an enabling right. It bridges the existing normative and regulatory gaps for the effective realization of the right to access the Internet.

Egypt

Revolution, Failed Transition and Counter-Revolution

Bloomsbury Publishing Azmi Bishara's seminal study of the 2011 Egyptian Revolution chronicles in granular detail the lead up to the momentous uprisings and the subsequent transition and coup. The book critically investigates the social and economic conditions that formed the backdrop to the revolution and the complex challenges posed by the transition from authoritarianism to democracy. Part One, 'From July Coup to January Revolution', goes back to what is called the '1952 revolution' or the '1952 Coup d'état' and traces events until 2011 when Hosni Mubarak stepped down as the president of Egypt after weeks of protest. It highlights the relationship between the presidency and the army to show that, contrary to popular belief, the presidency grew gradually stronger at the expense of other institutions, especially the army, and reached its apogee under Mubarak. Part Two 'From Revolution to Coup d'Etat', covers the critical stages from when the military junta took over the governing of Egypt as the Supreme Council of the Armed Forces (SCAF), and the election of Morsi, up until the coup to overthrow his presidency. Using a democratic transition theory perspective, Azmi Bishara explains the failure of the democratic transition and how it has impacted on Arab revolutions ever since. Written while the revolutions were taking place, this book conveys a sense of immediacy and urgency as Bishara makes wide-ranging assessments with many of his forecasts corroborated in later years. The book is renowned for its use of primary source material - including interviews, statistics and public opinion polls - thus preserving the memory of the revolution and remaining one of the most comprehensive reference books on the subject to date.

Financial Underpinnings of Europe's Financial Crisis

Liberalization, Integration, and Asymmetric State Power

Edward Elgar Publishing This book analyzes how financial liberalization affected the development of the financial crisis in Europe, with particular attention given to the ways in which power asymmetries within Western Europe facilitated financial liberalization and distributed the costs and gains from it. The author combines institutional narrative analysis with empirical surveys and econometrics, as well as country-level studies of financial liberalization and its consequences before and after the 2008 Global Financial Crisis.

Dalit Capital

State, Markets and Civil Society in Urban India

Taylor & Francis Dalit Capital explores the relation between caste and Indian capitalism. It explores the ways in which caste and social discrimination reinvent themselves under the guise of modern capitalism. It demonstrates how 'inclusion' holds Dalits at a disadvantage, perpetrated by the state, markets and the civil society.

The Price of Time

The Real Story of Interest

Grove Press A comprehensive and profoundly relevant history of interest from one of the world's leading financial writers, The Price of Time explains our current global financial position and how we got here In the beginning was the loan, and the loan carried interest. For at least five millennia people have been borrowing and lending at interest. The practice wasn't always popular—in the ancient world, usury was generally viewed as exploitative, a potential path to debt bondage and slavery. Yet as capitalism became established from the late Middle Ages onwards, denunciations of interest were tempered because interest was a necessary reward for lenders to

part with their capital. And interest performs many other vital functions: it encourages people to save; enables them to place a value on precious assets, such as houses and all manner of financial securities; and allows us to price risk. All economic and financial activities take place across time. Interest is often described as the “price of money,” but it is better called the “price of time:” time is scarce, time has value, interest is the time value of money. Over the first two decades of the twenty-first century, interest rates have sunk lower than ever before. Easy money after the global financial crisis in 2007/2008 has produced several ill effects, including the appearance of multiple asset price bubbles, a reduction in productivity growth, discouraging savings and exacerbating inequality, and forcing yield starved investors to take on excessive risk. The financial world now finds itself caught between a rock and a hard place, and Edward Chancellor is here to tell us why. In this enriching volume, Chancellor explores the history of interest and its essential function in determining how capital is allocated and priced.

Hybrid Securities

Structuring, Pricing and Risk Assessment

Springer Hybrid capital securities or 'hybrids' offer various benefits. They offer flexibility equity without shareholder dilution, provide protection to senior creditors, are a stable source of long-term funding for healthy companies, and help insurers and banks meet regulatory and rating agency capital requirements. Risks and features of hybrid securities are expressed in the credit spread of some

relatively new financial instruments, but no structural fundamentals exist for to price hybrids precisely. This book proposes a model for the pricing of hybrids. It begins by explaining the concept of hybrids as well as their equity- and debt-like characteristics. Different types of hybrids are presented, including preference shares, convertible bonds, contingent convertibles (CoCos) and bail-in bonds. The authors then present analysis of regulatory regimes' impact on hybrids. They discuss the types of hybrid bonds that are contemplated in the Capital Requirements Regulation (CRR) and Banking Union mechanism. They then present an in-depth examination of hybrids pricing and risk assessment techniques. The book provides a comprehensive analysis from mathematical, legal and financial perspectives in order to look at relatively new financial instruments and address problems with the pricing models of hybrids which are as yet unsolved.

The UK Challenge to Europeanization

The Persistence of British Euroscepticism

Springer This timely contribution pulls no punches and views the UK as institutionally Eurosceptic across politics and society, from the press to defence. It represents a rich and original contribution to the emerging field of Eurosceptic studies, and a key contribution to this important issue.

Current and Emerging Trends in Cyber Operations

Policy, Strategy and Practice

Springer This book explores current and emerging trends in policy, strategy, and practice related to cyber operations conducted by states and non-state actors. The book examines in depth the nature and dynamics of conflicts in the cyberspace, the geopolitics of cyber conflicts, defence strategy and practice, cyber intelligence and information security.
