LAND-ROVER

SERIES I, II, IIA & III

Herridge & Sons Limited There has rarely been a British success story like the Land-Rover. Developed in a short time and on a small budget, it was launched in 1948 and having passed through many revisions is still a world leader today. The Series detailed in Land Rover takes the reader from the beginning to 1985, and the many surviving examples, supported by a comprehensive parts and restoration industry, are seeing a solid increase in values. Here James Taylor, the premier historian of the marque, provides a detailed study of the Land-Rover's evolution through the period and the variants and special-purpose versions that were produced. Uniquely, it is the manufacturer's own sales brochures and advertising that supply the illustrations, which number some 400 images and serve not only to correctly depict the vehicles but also to re-create the atmosphere of the times when they were made.
