Frontier Encounters

Knowledge and Practice at the Russian, Chinese and Mongolian Border

Open Book Publishers China and Russia are rising economic and political powers that share thousands of miles of border. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. *Frontier Encounters* presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

Russia and China

A political marriage of convenience – stable and successful

Verlag Barbara Budrich This book depicts the sophisticated relationship between Russia and China as a pragmatic one, a political “marriage of convenience”. Yet at the same time the relationship is stable, and will remain so. After all, bilateral relations are usually based on pragmatic interests and the pursuit of these interests is the very essence of foreign policy. And, as often happens in life, the most long-lasting marriages are those based on convenience. The highly complex, complicated, ambiguous and yet, indeed, successful relationship between Russia and China throughout the past 25 years is difficult to grasp theoretically. Russian and Chinese elites are hard-core realists in their foreign policies, and the neorealist school in international relations seems to be the most adequate one to research Sino-Russian relations. Realistically, throughout this period China achieved a multidimensional advantage over Russia. Yet, simultaneously Russia-China relations do not follow the patterns of power politics. Beijing knows its limits and does not go into extremes. Rather, China successfully seeks to build a longterm, stable relationship based on Chinese terms, where both sides gain, albeit China gains a little more. Russia in this agenda does not necessary lose; just gains a little less out of this asymmetric deal. Thus, a new model of bilateral relations emerges, which may be called - by paraphrasing the slogan of Chinese diplomacy - as “asymmetric win-win” formula. This model is a kind of “back to the past” - a contemporary equivalent of the first model of Russia-China relations: the *modus vivendi* from the 17th century, achieved after the Nerchinsk treaty.

The Battle for China's Past

Mao and the Cultural Revolution

Pluto Press **Mao and his policies have long been demonized in the West, with the Cultural Revolution considered a fundamental violation of human rights. As China embraces capitalism, the Mao era is being denigrated by the Chinese political and intellectual elite. This book tackles the extremely negative depiction of China under Mao in recent publications and argues that most people in China, including the rural poor and the urban working class, actually benefited from Mao's policies. Under Mao there was a comprehensive welfare system for the urban poor and basic health and education provision in rural areas. These policies are being reversed in the current rush towards capitalism. Offering a critical analysis of mainstream accounts of the Mao era and the Cultural Revolution, this book sets the record straight, making a convincing argument for the positive effects of Mao's policies on the well-being of the Chinese people.**
