LEADERSHIP IN SCIENCE AND TECHNOLOGY: A REFERENCE HANDBOOK

SAGE Publications This 2-volume set within the SAGE Reference Series on Leadership tackles issues relevant to leadership in the realm of science and technology. To encompass the key topics in this arena, this handbook features 100 topics arranged under eight headings. Volume 1 concentrates on general principles of science and technology leadership and includes sections on social-scientific perspectives on S&T leadership; key scientific concepts about leading and innovating in S&T; characteristics of S&T leaders and their environments; and strategies, tactics, and tools of S&T leadership. Volume 2 provides case studies of leadership in S&T, with sections considering leadership in informal communities of scientists and engineers; leadership in government projects and research initiatives; leadership in industry research, development, and innovation; and finally, leadership in education and university-based research. By focusing on key topics within 100 brief chapters, this unprecedented reference resource offers students more detailed information and depth of discussion than typically found in an encyclopedia entry but not as much jargon, detail or density as in a journal article or a research handbook chapter. Entries are written in language and style that is broadly accessible, and each is followed by cross-references and a brief bibliography and further readings. A detailed index and an online version of the work enhances accessibility for today's student audience.

ISLAMIC HISTORY THROUGH COINS

AN ANALYSIS AND CATALOGUE OF TENTH-CENTURY IKHSHIDID COINAGE

American Univ in Cairo Press What can one discover through the study of medieval Islamic coins? It appears that the regular gold dinars and silver dirhams issued by the Ikhshidid rulers of Egypt and Palestine (935-69) followed a series of understood but unwritten rules. As the first part of this book reveals, these norms involved whose names could appear on the regular currency, where the names could be placed (based upon a strict hierarchical order), and even which parts of a Muslim name could be included. The founder of the dynasty, Muhammad ibn Tughj, could use the honorific al-Ikhshid; his eldest son and successor could use his teknonym Abu al-Qasim; his brother, the third ruler, could use only his name Ali; and the eunuch Kafur, effective ruler of Egypt for over twenty years, could never inscribe his name on the regular coinage. At the same time, each one of these rulers was named in the Friday sermon and most had their teknonym inscribed on textiles. Presentation coins, the equivalent of modern commemorative pieces, could break all these rules, and a wide variety of titles appeared, as well as a series of coins with human representation. The second half of the book is a catalogue of over 1,200 specimens, enabling curators, collectors, and dealers to identify coins in their own collections and their relative rarity. Throughout the book numismatic pieces are illustrated, along with commentary on their inscriptions, layout, and metallic content.
