METALLURGICAL AND CERAMIC PROTECTIVE COATINGS

Springer Science & Business Media Surface engineering is an increasingly important field and consequently those involved need to be aware of the vast range of technologies available to modify surfaces. This text provides an up-to-date, authoritative exposition of the major condensed phase methods used for producing metallurgical and ceramic coatings. Each method is discussed thoroughly by an expert in that field. In each chapter the principle of the method, its range of applications and technical aspects involved are described. The book not only informs the reader about established technologies familiar only to specialists, but also details activity on the frontier of coating technology providing an insight into those potential technologies not yet fully developed but which should emerge in the near future.

ON S. 864 ... JUNE 14, 1978**

**FEATURE AND NARRATIVE STORYTELLING FOR MULTIMEDIA
JOURNALISTS**

CRC Press Feature and Narrative Storytelling for Multimedia Journalists is the first text that truly focuses on the multimedia and documentary production techniques required by professional journalists. Video and audio production methods are covered in rich detail, but more importantly, various storytelling techniques are explored in depth. Likewise, author Duy Linh Tu tackles the latest topics in multimedia storytelling, including mobile reporting, producing, and publishing, while also offering best practices for using social media to help promote finished products. Whether you're a student, a professional seeking new techniques, or simply looking to update your skills for the new digital newsroom, this book will provide you with the information and tools you need to succeed as a professional journalist. **Integrated:** The lessons in this book deftly combine traditional media production principles with storytelling craft. It is written with the perspective of modern professional journalists in mind. **Practical:** While rich with theory, this text is based on the real-world work of the author and several of his colleagues. It features Q&As with some of the best editors and video producers from top publications, including NPR, Vice, and Detroit Free Press, as well as profiles of leading video news organizations such as Frontline, Mediastorm, and Seattle Times. **Proven:** The author uses pedagogy from the world-renowned Columbia Journalism School as well as case studies from his own award-winning work. **Interactive:** The text is exercise- and drill-based, and the companion website provides multimedia examples and lesson files, as well as tutorials, case studies, and video interviews.

SENSORS AND TRANSDUCERS

Elsevier In this book Ian Sinclair provides the practical knowhow required by technician engineers, systems designers and students. The focus is firmly on understanding the technologies and their different applications, not a mathematical approach. The result is a highly readable text which provides a unique introduction to the selection and application of sensors, transducers and switches, and a grounding in the practicalities of designing with these devices. The devices covered encompass heat, light and motion, environmental sensing, sensing in industrial control, and signal-carrying and non-signal switches. Get up to speed in this key topic through this leading practical guide Understand the range of technologies and applications before specifying Gain a working knowledge with a minimum of maths

ANNUAL EDITION

RADAR INSTRUCTION MANUAL

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting

techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

A WINTER ALONE IN THE WILDERNESS

Macmillan The author relates his experiences when he took a job with the Idaho Department of Fish and Game to watch millions of salmon eggs one winter in an isolated area of the Selway-Bitterroot Wilderness. Reprint. 10,000 first printing.

THE TAB BOOK OF ARDUINO PROJECTS: 36 THINGS TO MAKE WITH SHIELDS AND PROTO SHIELDS

McGraw Hill Professional The ultimate collection of DIY Arduino projects! In this easy-to-follow book, electronics guru Simon Monk shows you how to create a wide variety of fun and functional gadgets with the Arduino Uno and Leonardo boards. Filled with step-by-step instructions and detailed illustrations, *The TAB Book of Arduino Projects: 36 Things to Make with Shields and Proto Shields* provides a cost estimate, difficulty level, and list of required components for each project. You'll learn how to design custom circuits with Proto Shields and solder parts to the prototyping area to build professional-quality devices. Catapult your Arduino skills to the next level with this hands-on guide. Build these and many more innovative Arduino creations: Persistence-of-vision (POV) display High-power LED controller Color recognizer RFID door lock Fake dog Person counter Laser alarm Theramin-like instrument FM radio receiver Email notifier Network temperature and humidity sensor Seven segment LED clock Larson scanner Conway's game of life Singing plant Ultrasonic rangefinder Temperature and light logger Autoranging capacitance meter Geiger counter

WHO'S WHO IN THE EAST

Includes names from the States of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, Vermont, and West Virginia, and in Canada, from the Provinces of New Brunswick, Newfoundland, Nova Scotia, Prince Edward Island, and Quebec; also includes the eastern half of Ontario and no longer includes West Virginia, 1994-.

ACOUSTIC & DIGITAL PIANO BUYER

SPRING 2013 SUPPLEMENT TO THE PIANO BOOK

The latest supplement to the pianist's must-have reference *The Piano Book*, this comprehensive guide provides list prices for more than 4,000 currently manufactured acoustic and digital piano brands and models, as well as advice on how to estimate actual street prices to help negotiate the lowest possible price. Summarizing the essentials of *The Piano Book*, this new resource goes beyond the basics to offer extensive details on digital pianos and reveals all the information

necessary to differentiate between a good deal and a great deal when buying a piano. Anyone in the market for a new or used piano—including teachers, technicians, students, and aficionados—can make a more informed purchase using this definitive guide. Updated twice a year with the most accurate information, the manual fully covers piano manufacturers, instrument models, prices, and current trends and conditions in the piano market.

CONCEPTUALIZING THE REGULATORY THICKET

CHINA'S FINANCIAL MARKETS AFTER THE GLOBAL FINANCIAL CRISIS

Routledge This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China's financial market after the global financial crisis. The book provides an in-depth analysis of China's contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China's banks into more market-oriented institutions and increased public sector growth. However, China's financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China's financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese government achieves its political and economic objectives. More fundamentally, according to the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China's financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.
