Each chapter represents a different case completed by a different expert. Cases cover the lifespan from child, to adult, to geriatric, and the types of cases will represent a broad spectrum of prototypical cases of well-known and well-documented disorders as well as some rarer disorders. Chapter authors were specifically chosen for their expertise with particular disorders. When a practitioner is going to see a child or an adult with "X" problem, they can turn to the "case" and find up to date critical information to help them understand the issues related to the diagnosis, a brief synopsis of the literature, the patient's symptom presentation, the evaluation including neuropsychological test results and other results from consultants, along with treatments and recommendations. Clinical cases represent a long-established tradition as a teaching vehicle in the clinical sciences, most prominently in medicine and psychology. Case studies provide the student with actual clinical material - data in the form of observations of the patient, examination/test data, relevant history, and related test results - all of which must be integrated into a diagnostic conclusion and ultimately provide the patient with appropriate recommendations. Critical to this educational/heuristic process is the opportunity for the reader to view the thought processes of the clinician that resulted in the conclusions and recommendations offered. With the science of the disorder as the foundation of this process, readers learn how the integration of multiple sources of data furthers critical thinking skills. Advances in Web Based Learning - ICWL 2007 6th International Conference, Edinburgh, UK, August 15-17, 2007, Revised Papers Springer This year, we received a record high of about 180 submissions to ICWL 2007. From these, a total of 55 full papers plus one keynote paper were accepted for this LNCS proceedings volume, representing an acceptance rate of about 30%. The authors of these accepted papers were of a remarkable international diversity. We would like to thank all the reviewers for spending their precious time reviewing the papers and for providing valuable comments that aided significantly in the paper selection process. Authors of the best papers presented at this conference will be invited to submit extended versions of their papers for possible publication in 1) a special issue of IEEE Trans. on Knowledge and Data Engineering, for those papers relevant to knowledge and data engineering; and 2) a special issue of the International Journal of Distance Education Technologies (JDET), for papers of other areas. This was the first time that the ICWL conference was organized in Europe and 27 papers were from European researchers. We would like to thank our Organization Chair Dr. Taku Komura for spending an enormous amount of energy in coordinating the local

arrangements. In fact, we would like to thank the entire conference organization committee for their hard work in putting together the conference. In particular, we would like to express our appreciation to our Registration Chair Dr. STATISTICS FOR MANAGEMENT PHI Learning Pvt. Ltd. Designed to be consulted when learning formal statistical techniques, the text describes common instances of both correct and false statistical and probabilistic reasoning. Lauded for their contributions to statistics, psychology, and psychometrics, the authors make statistical methods relevant to readers' day-to-day lives by including real historical situations that demonstrate the role of statistics in reasoning and decision making. The historical vignettes encompass the English case of Sally Clark, breast cancer screening, risk and gambling, the Federal Rules of Evidence, "high-stakes" testing, regulatory issues in medicine, difficulties with observational studies, ethics in human experiments, health statistics, and much more. In addition to these topics, seven U.S. Supreme Court decisions reflect the influence of statistical and psychometric reasoning and interpretation/misinterpretation. Exploring the intersection of ethics and statistics, this comprehensive guide assists readers in becoming critical and ethical consumers and producers of statistical reasoning and analyses. It will help them reason correctly and use statistics in an ethical manner. **Excel Practice Selective Schools and Scholarship Tests Pascal Press** **Excel Test Skills - Selective Schools and Scholarship Tests Years 5-6** is a comprehensive study guide for the selective schools and scholarship tests (usually undertaken in Year 6). Educational Assessment Tests and Measurements in the Age of Accountability SAGE Publications Grounded in the real world of public schools and students, this engaging, insightful, and highly readable text introduces the inner-workings of K-12 educational assessment. There has never been a time when it is more important for educators to have an understanding of testing and assessments. Accountability is now a fact of life for all public school educators, and testing is at the core of all educational assessment programs. It is no longer prudent or even possible for educators to ignore this national zeitgeist. Educational Assessment: Tests and Measurements in the Age of Accountability addresses all of the constructs central to understanding the design, construction and evaluation of educational measures. It goes on to

provide students with insight into the link between today's high-stakes testing mandates and the traditions of the past 125 years of "scientific" measurement in the United States. It addresses the problem of understanding and correctly interpreting test scores on local, statewide, national, and international assessments. It also addresses how certain issues such as institutionalized cheating, test preparation, and individual differences among students and their families influence test score outcomes. Key Features Covers traditional topics in an approachable and understandable way: Reliability, validity, performance assessments, standardized achievement tests, and many more topics are included. Analyzes and interprets "hot-button" issues of today's complex measurement concerns: The score-gap, high-stakes testing, grade retention, drop-out crises, "academic redshirting," diversity, family influence, and educational technology, are examined. Relates theory to practice: Each chapter includes relevant real-life examples and case studies to demonstrate how the technical-measurement principles impact those involved. Addresses the needs of diverse students: Issues related to students with special needs and the testing of English Language Learners are discussed. Ancillaries Instructors' Resources on CD-Rom include PowerPoint slides, Web resources, suggested answers for each chapter's discussion questions, and a sample syllabus. The CD also includes Brownstone's Diploma Test Bank software so that instructors can create, customize, and deliver tests. Qualified instructors can contact Customer Care at 1-800-818-SAGE (7243) from 6am - 5pm PT to request a copy. A web-based Student Study Site at [www.sagepub.com/wrightstudy](http://www.sagepub.com/wrightstudy) provides chapter objectives, flash cards, and practice tests. Intended Audience: Educational Assessment: Tests and Measurements in the Age of Accountability has been written to meet the needs of students in graduate programs of special education, reading, school counseling, school social work, curriculum supervision, or administration. Providing grounding in all aspects of measurement, this book is perfect for undergraduate and graduate courses such as Educational Tests and Measurements, Assessment in Education, and Student Assessment. Executive Functions in Psychiatric Disorders Frontiers Media SA Executive Functions comprise a range of neuropsychological processes related to intentional behavior and cognitive control. There are several theoretical models defining and explaining the concept of Executive Functions. Most of these models consider that the term Executive Functions encompasses cognitive process as working memory, cognitive flexibility, inhibitory control and other complex functions as planning, problem-solving and abstract reasoning. Other models argue that motivational and emotional functions, such as affective decision-making, reside under the concept of Executive Function. Much evidence supports how complex cognitive functions are related to the physiological activity of brain networks, including the frontal cortex and its connections with subcortical structures. Several psychiatric disorders related to impairment in these brain networks (eg., bipolar disorder, schizophrenia, ADHD, obsessive-compulsive

disorder, and drug addiction) leading to deficits in Executive Functions. These cognitive deficits affect patients' everyday functioning, worsening the clinical course of the disease. For example, deficits in Executive Functions are related to suicide behavior in bipolar disorder patients. Furthermore, these deficits also relate to obesity, a lack of adherence to treatment and an underperformance in the workplace and educational settings. The understanding of the role of deficits in Executive Functions, including its neurobiological basis, developmental trajectories, and relationship with clinical outcomes, is fundamental to improve clinical management of psychiatric patients. This research topic includes 13 articles with interdisciplinary contributions related to the understanding of the deficits in Executive Functions and its relationship with clinical manifestations in psychiatric disorders. He then walks students through various statistical procedures, beginning with correlations and graphical representation of data and ending with inferential techniques and analysis of variance. Pedagogical features include sidebars offering additional technical information about the topic and set-off points that reinforce major themes. Finally, questions to chapter exercises, a complete glossary, and extensive Excel functionality are located at the back of the book. Impact of Gene Expression Profiling Tests on Breast Cancer Outcomes DIANE Publishing Assesses the evidence that three marketed gene expression-based assays improve prognostic accuracy, treatment choice, and health outcomes in women diagnosed with early stage breast cancer. Three gene expression assays were evaluated; Oncotype DX<sub>z</sub>, MammaPrint<sup>®</sup> and the Breast Cancer Profiling (BCP or H/I ratio) test, and for gene expression signatures underlying the assays. They sought evidence on: analytic performance of tests; clinical validity; clinical utility; harms; and impact on clinical decision making and health care costs. Conclusions: Oncotype DX is furthest along the validation pathway, with retrospective evidence that it predicts distant spread and chemotherapy benefit to a clinically relevant extent over standard predictors.
