WORDS FOR PICTURES

SEVEN PAPERS ON RENAISSANCE ART AND CRITICISM

Yale University Press He offers seven thought-provoking pieces, three of which are new and written specifically for this book. While Baxandall focuses on works of the fifteenth century, his essays transcend this period and show with fresh insight how words match the experience of looking at paintings and sculptures."--BOOK JACKET.

SMALL ANIMAL ENDOSCOPY - E-BOOK

Elsevier Health Sciences The latest edition of the critically acclaimed Small Animal Endoscopy presents informative, practical, and up-to-date guidance on endoscopic indications, instrumentation, patient preparation, and techniques. Todd R. Tams and Clarence A. Rawlings, the foremost experts in veterinary endoscopy, provide the novice as well as the advanced practitioner with the information needed to deliver the safest, high-quality endoscopic services for small animals, including avian and exotics. Chapters are organized consistently and lavishly illustrated to help you easily find and understand key concepts and procedures. This edition includes a companion website with expert demonstrations of techniques. Enables you to deliver the safest, high quality care and a wider range of services to the pets of increasingly concerned and savvy owners. Features cutting-edge information on minimally invasive procedures to improve diagnostic accuracy, reduce operating time, improve success, minimize post-operative stress and pain, and promote faster healing. Helps you recognize the many indications for endoscopy in everyday practice. Covers a vast range of topics in a clear, concise and readable style. Describes instrumentation, examination, and sample procurement techniques in detail. Shows both normal and abnormal findings you may encounter during a procedure in an atlas of images in relevant chapters. Provides minimally invasive examination and surgical options for veterinarians treating uniquely sensitive avian and exotic patients. Provides step-by-step instructions on specific techniques. Helps beginners master endoscopic diagnosis and treatment and more experienced endoscopists utilize their endoscopic equipment to its fullest capacity.

WALKER EVANS

CUBA

J Paul Getty Museum Publications "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

HOMETOWN FLAVORS

WHAT THE DOG SAID

Bloomsbury Publishing USA Ever since her police officer father was killed a few months ago, Grace Abernathy hasn't wanted to do much of anything. She's pulled away from her friends, her grades are plummeting . . . it's a problem. The last thing Grace wants is to be dragged into her older sister Regan's plan to train a shelter dog as a service dog. But Grace has no idea how involved she'll get- especially when a mangy mutt named Rex starts talking to her. Has Grace gone off the deep end? Or might this dog be something really special-an angel? A spirit? Either way, he is exactly the therapy that Grace needs.

COMMUNITY REHABILITATION IN NEUROLOGY

Cambridge University Press *Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.*

MANUAL OF PSYCHOSOCIAL REHABILITATION

John Wiley & Sons *Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.*

SURVEYING FOR CONSTRUCTION

Surveying for Construction 5e is an essential textbook for students of engineering new to surveying, and will also appeal to students of

building and environmental studies and archaeology. Offering a strong grounding in land and construction surveying, the authors clearly and comprehensively guide the reader through the principles, methods and equipment used in modern-day surveying. Taking into account recent advances in the field, the material has been fully updated and revised throughout including new and up-to-date coverage of levelling, total stations, detail surveys, and EDM. A new chapter on GPS technology has been added. In keeping with the practical nature of the book, there are chapters on setting out construction works and surveying existing buildings, which guide the reader step-by-step through the fundamental procedures. The clear and methodical nature of the explanations, supported by a wide range of exercises and examples, make *Surveying for Construction 5e* an invaluable and modern introduction to surveying. Key features include:

- Fully updated coverage and new material throughout, including a new chapter on GPS
- New Learning Objectives and Chapter Summaries which guide the student through the learning process and highlight the key principles and methods for each chapter
- Numerous diagrams and figures which give students a clear and detailed understanding of equipment and procedures
- Extensive boxed examples and exercises that guide students through real-world surveying methods and calculations
- Website material: online material for creating your own surveying project allows students to practice the methods and techniques they have learnt

MORE EQUAL THAN OTHERS

AMERICA FROM NIXON TO THE NEW CENTURY

Princeton University Press During the past quarter century, free-market capitalism was recognized not merely as a successful system of wealth creation, but as the key determinant of the health of political and cultural democracy. Now, renowned British journalist and historian Godfrey Hodgson takes aim at this popular view in a book that promises to become one of the most important political histories of our time. *More Equal Than Others* looks back on twenty-five years of what Hodgson calls "the conservative ascendancy" in America, demonstrating how it has come to dominate American politics. Hodgson disputes the notion that the rise of conservatism has spread affluence and equality to the American people. Quite the contrary, he writes, the most distinctive feature of American society in the closing years of the twentieth century was its great and growing inequality. He argues that the combination of conservative ideology and corporate power and dominance by mass media obsessed with lifestyle and celebrity have caused America to abandon much of what was best in its past. In fact, he writes, income and wealth inequality have become so extreme that America now resembles the class-stratified societies of early twentieth-century Europe. *More Equal Than Others* addresses a broad range of issues, with chapters on politics, the new economy, immigration, technology, women, race, and foreign policy, among others. A fitting sequel to the author's critically acclaimed *America In Our Time*, *More Equal Than Others* is not only an outstanding synthesis of history, but a trenchant commentary on the state of the American Dream.

PERMISSIONS, A SURVIVAL GUIDE

BLUNT TALK ABOUT ART AS INTELLECTUAL PROPERTY

University of Chicago Press If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of "takes" that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does "fair use" really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

OF GODS AND MONSTERS

A CRITICAL GUIDE TO UNIVERSAL STUDIOS' SCIENCE FICTION, HORROR AND MYSTERY FILMS, 1929-1939

McFarland While Universal's *Dracula* and *Frankenstein* (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

MY TIME IN HEAVEN

Whitaker House Is there life after death? After a tragic accident, doctors pronounced Richard Sigmund legally dead. Eight hours later, God miraculously brought him back to life on the way to the morgue. During those hours, God allowed him to experience the glorious beauty, heavenly sounds, sweet aromas, and boundless joys of heaven that await every believer. God then returned him back to earth with a mission to tell the world what he saw. You will thrill to Sigmund's eyewitness accounts of strolling down heaven's streets of gold, seeing angels playing with children, talking with Jesus, meeting with people from the Bible, as well as departed family and friends, seeing the mansions, and much more! Through Sigmund's testimony, God restored sight to the blind, hearing to the deaf, and even raised several people from the dead. Also, glimpse into the horrifying reality of "the other place"—a place where no one wants to go.

MOLECULAR AND NANO ELECTRONICS: ANALYSIS, DESIGN AND SIMULATION

Elsevier The aim of *Molecular and Nano Electronics: Analysis, Design and Simulation* is to draw together contributions from some of the most active researchers in this new field in order to illustrate a theory guided-approach to the design of molecular and nano-electronics. The field of molecular and nano-electronics has driven solutions for a post microelectronics era, where microelectronics dominate through the use of silicon as the preferred material and photo-lithography as the fabrication technique to build binary devices (transistors). The construction of such devices yields gates that are able to perform Boolean operations and can be combined with computational systems, capable of storing, processing, and transmitting digital signals encoded as electron currents and charges. Since the invention of the integrated circuits, microelectronics has reached increasing performances by decreasing strategically the size of its devices and systems, an approach known as scaling-down, which simultaneously allow the devices to operate at higher speeds. * Provides a theory-guided approach to the design of molecular and nano-electronics * Includes solutions for researchers working in this area * Contributions from some of the most active researchers in the field of nano-electronics

MEAT IS FOR PUSSIES

A HOW-TO GUIDE FOR DUDES WHO WANT TO GET FIT, KICK ASS, AND TAKE NAMES

Harper Collins John Joseph wants men to know, in no uncertain terms, that they don't need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak. Because when your protein sources come from animals, you're missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy, and more manly. In *Meat is for Pussies*, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men's (and women's) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don't need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph's passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won't take no for an answer.
