Fundamentals of Environmental and Toxicological Chemistry

Sustainable Science, Fourth Edition

CRC Press Fundamentals of Environmental and Toxicological Chemistry: Sustainable Science, Fourth Edition covers university-level environmental chemistry, with toxicological chemistry integrated throughout the book. This new edition of a bestseller provides an updated text with an increased emphasis on sustainability and green chemistry. It is organized based on the five spheres of Earth's environment: (1) the hydrosphere (water), (2) the atmosphere (air), (3) the geosphere (solid Earth), (4) the biosphere (life), and (5) the anthrosphere (the part of the environment made and used by humans). The first chapter defines environmental chemistry and each of the five environmental spheres. The second chapter presents the basics of toxicological chemistry and its relationship to environmental chemistry. Subsequent chapters are grouped by sphere, beginning with the hydrosphere and its environmental chemistry, water pollution, sustainability, and water as nature's most renewable resource. Chapters then describe the atmosphere, its structure and importance for protecting life on Earth, air pollutants, and the sustainability of atmospheric quality. The author explains the nature of the geosphere and discusses soil for growing food as well as geosphere sustainability. He also describes the biosphere and its sustainability. The final sphere described is the anthrosphere. The text explains human influence on the environment, including climate, pollution in and by the anthrosphere, and means of sustaining this sphere. It also discusses renewable, nonpolluting energy and introduces workplace monitoring. For readers needing additional basic chemistry background, the book includes two chapters on general chemistry and organic chemistry. This updated edition includes three new chapters, new examples and figures, and many new homework problems.

In *The Nikon Autofocus System, 2nd Edition*, photographer Mike Hagen, author of the bestselling *The Nikon Creative Lighting System*, takes his deep knowledge of Nikon technology and concentrates on its focus features. Orson Welles

Interviews

Univ. Press of Mississippi This book brings together an exceptional array of interviews, profiles, and press conferences tracing the half century that Orson Welles (1915- 1985) was in the public eye. Originally published or broadcast between 1938 and 1989 in worldwide locations, these pieces confirm that Welles's career was multidimensional and thoroughly inter-woven with Welles's persona. Several of them offer vivid testimony to his grasp on the public imagination in Welles's heyday, including accounts of his War of the Worlds broadcast. Some interviews appear in English for the first time. Two transcriptions of British television interviews have never before appeared in print. Interviewers include Kenneth Tynan, French critic André Bazin, and Gore Vidal. The subjects center on the performing arts but also embrace philosophy, religion, history, and, especially, American society and politics. Welles confronts painful topics: the attempts to suppress Citizen Kane, RKO's mutilation of The Magnificent Ambersons, his loss of directorial authority, his regret at never having run for political office, and his financial struggles. "I would have sold my soul" to play Marlon Brando's role as Don Corleone in The Godfather, he tells a BBC interviewer. Welles deflates the notion of the film director's omnipotence, insisting that it is only in the editing studio that he possesses "absolute control." With scholarly erudition, Welles revels in the plays of Shakespeare and discusses their adaptation to stage and screen. He assesses rival directors and eminent actors, offers penetrating analyses of Citizen Kane, Touch of Evil, Chimes at Midnight, and The Third Man, and declares that he never made a film that lacked an ethical point-of-view. These conversations reveal the majestic mind and talent of Welles from a fresh perspective. Mark W. Estrin, a professor of English and film studies at Rhode Island College, is editor of Conversations with Eugene O'Neill (University Press of Mississippi) and Critical Essays on Lillian Hellman and the author of numerous articles on film and dramatic literature.

Kasher in the Rye

The True Tale of a White Boy from Oakland Who Became a Drug Addict, Criminal, Mental Patient, and Then

Turned 16

Grand Central Publishing Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *KASHER IN THE RYE* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carroll...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Ming Tea Murder

Berkley *"Includes recipes and tea time tips"--Page 4 of cover.*

The Book of L

Springer Science & Business Media *This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero)*

and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
