OPEN AND DISTANCE LEARNING IN SECONDARY SCHOOL EDUCATION IN INDIA

POTENTIALS AND LIMITATIONS

Taylor & Francis This book examines the state of the Open and Distance Learning (ODL)-based secondary education in India. ODL-based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic, health and disability, or other constraints. The volume uses large-scale empirical data collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency, and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS). Highlighting the roadblocks and barriers in terms of its reach, inclusion, and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus, it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy, and political studies.

QUALITY ASSURANCE AND ACCREDITATION IN DISTANCE EDUCATION AND E-LEARNING

MODELS, POLICIES AND RESEARCH

Routledge Quality assurance (QA) in open and distance learning (ODL) can be a contentious issue. Some argue that it should be judged by the same criteria and methods as face-to-face education, while others claim that it is so different in its organization, enrolments and operations that conventional QA mechanisms cannot apply. Some advocate the use of specific guidelines and standards for e-learning; others believe that, regardless of the technology, the basic principles of quality teaching and learning should apply. Providers who have enjoyed freedom from external scrutiny may resist attempts at external regulation and auditing and look upon QA as yet another imposition of corporatization and bureaucracy on education. Others see it as a means of establishing a culture of quality, self-reflection and self-improvement. There is little research-based literature to guide policy-makers, managers and practitioners in applying QA in education and training to ensure the right balance is found between accountability and autonomy, as well as assuring quality for the time and costs involved. In this respect, Quality Assurance and Accreditation in Distance Education and e-Learning is a book that is long overdue. It explains what is involved in QA and accreditation in education. It describes and analyzes applications of these practices in open, distance, dual-mode and conventional universities throughout Europe, North America, Africa, and the Asia-Pacific, looking at open schooling, e-learning in conventional schools, non-formal adult and community education, and corporate and small-to-medium enterprises. Quality Assurance and Accreditation in Distance Education and e-Learning is edited and authored by experts with extensive international experience in ODL, e-learning and QA who give careful

consideration to the possibilities and challenges involved. The book will be an invaluable guide for all policy-makers, managers, practitioners and researchers in the field.

THE REFLECTIVE LEARNER

SEEING 'MISSED TAKES' IN MISTAKES

Notion Press Is there a way of exploring the work of students beyond just 'right' and 'wrong'? If mistakes are an important part of the learning process, do they need to be explored deeply? Does a teacher stand to gain a better understanding of the workings of her students' minds if an attempt is made to systematically examine the thought process behind every mistake? What is the hidden takeaway (missed take) in every mistake, for a student as well as a teacher? Four teachers (two language, two maths) examined such questions as part of their action research into students' mistakes - and eventually effected a turnaround in the way that their 'struggling' students began to approach subjects like English and mathematics. In this compilation of four engaging journeys, the impact of such an investigation on both the teacher and the taught emerges: as teachers begin to gain new insights into their own mental biases and tacit assumptions, students, too, begin to loosen their grip on age-old fears and prejudices - the phobia(s) slowly giving way to the desire to look for stimulating challenges. There is also a roadmap for teachers who wish to try such an exploration in their own classes in order to empower students to turn into reflective learners.
