This multi-authored book intends to comprehensively introduce and showcase recent advances as well as established best practices concerning both theoretical and practical aspects of recurrence plot based analysis. Michael Fried argues that this immediately compelled photographers to grapple with issues centering on the relationship between the photograph and the viewer standing before it that until then had been the province only of painting. Fried further demonstrates that certain philosophically deep problems—associated with notions of theatricality, literalness, and objecthood, and touching on the role of original intention in artistic production, first discussed in his controversial essay “Art and Objecthood” (1967)—have come to the fore once again in recent photography. This means that the photographic “ghetto” no longer exists; instead photography is at the cutting edge of contemporary art as never before. Among the photographers and video-makers whose work receives serious attention in this powerfully argued book are Jeff Wall, Hiroshi Sugimoto, Cindy Sherman, Thomas Struth, Thomas Ruff, Andreas Gursky, Luc Delahaye, Rineke Dijkstra, Patrick Faigenbaum, Roland Fischer, Thomas Demand, Candida Höfer, Beat Streuli, Philip-Lorca diCorcia, Douglas Gordon and Philippe Parreno, James Welling, and Bernd and Hilla Becher. Future discussions of the new art photography will have no choice but to take a stand for or against Fried's conclusions. **Practical Watch Repairing** The Crowood Press Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. **Practical Watch Repairing** can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology. **Mixing a Musical Broadway Theatrical Sound Mixing Techniques** CRC Press When mixing a live show, for the first time or hundredth time, there are countless things running through your mind, foremost- this is live and you have to get it right! Homer Simpson Ponders Politics Popular Culture as Political Theory University Press of Kentucky It is often said that the poet Homer "educated" ancient Greece. Joseph J. Foy and Timothy M. Dale have assembled a team of notable scholars who argue, quite persuasively, that Homer Simpson and his ilk are educating America and offering insights into the social order and the human condition. Following Homer Simpson Goes to Washington (winner of the John G. Cawelti Award for Best Textbook or Primer on American and Popular Culture) and Homer Simpson Marches on Washington, this exceptional volume reveals how books like J. R. R. Tolkien's The Hobbit and J. K. Rowling's Harry Potter, movies like Avatar and Star Wars, and television shows like The Office and Firefly define Americans' perceptions of society. The authors expand the discussion to explore the ways in which political theories play out in popular culture. Homer Simpson Ponders Politics includes a foreword by fantasy author Margaret Weis (coauthor/creator of the Dragonlance novels and game world) and is divided according to eras and themes in political thought: The first section explores civic virtue, applying the work of Plato and Aristotle to modern media. Part 2 draws on the philosophy of Hobbes, Locke, Rousseau, and Smith as a framework for understanding the role of the state. Part 3 explores the work of theorists such as Kant and Marx, and the final section investigates the ways in which movies and newer forms of electronic media either support or challenge the underlying assumptions of the democratic order. The result is an engaging read for undergraduate students as well as anyone interested in popular culture. Setting the Record Straight A Material History of Classical Recording Wesleyan University Press The words surrounding music influence how we listen to it. Knowing Music, Making Music Javanese Gamelan and the Theory of Musical Competence and Interaction University of Chicago Press Using illustrative examples from a variety of traditions, Benjamin Brinner first examines the elements and characteristics of musical competence, the different kinds of competence in a musical community, the development of multiple competences, and the acquisition and transformation of competence through time. He then shows how these factors come into play in musical interaction, establishing four intersecting theoretical perspectives based on ensemble roles, systems of communication, sound structures, and individual motivations. These perspectives are applied to the dynamics of gamelan performance to explain the social, musical, and contextual factors that affect the negotiation of consensus in musical interaction. The discussion ranges from sociocultural norms of interpersonal conduct to links between music, dance, theater, and ritual, and from issues of authority and deference to musicians' self-perceptions and mutual assessments. wireless java programming for enterprise applications John Wiley & Sons
