#### GLOBAL TAX FAIRNESS

---

*Oxford University Press* This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

#### THE CHEMISTRY OF SUPERHEAVY ELEMENTS

---

*Springer Science & Business Media* This book is the first to treat the chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those - students and novices -- who begin to work and those who are working in this fascinating and challenging field of the heaviest and superheavy elements, for their lecturers, their advisers and for the practicing scientists in the field - chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic. Superheavy elements - chemical elements which are much heavier than those which we know of from our daily life - are a persistent dream in human minds and the kernel of science fiction literature for about a century.

## THE LOWLANDS OF HEAVEN

---

*Lulu.com Softcover:* This book was originally published in England in 1920. The recorder is the Rev. G. Vale Owen, vicar of Orford, Lancashire. The famous Arthur Conan Doyle, someone who had a great deal of interest in Life after Death, contributed an introduction to all five volumes. The messages contained in this book were also published in a daily newspaper by the owner Lord Northcliffe. As such they were widely read, and widely acclaimed. Rev. George Vale Owen was even asked to go down to London to deliver a sermon on these communications. There did not appear to be any significant theological objections from the Church of England to what was set out, and in fact it was accepted that these communications were genuine "inspirational writings", that the Rev. G. Vale Owen was genuine, and that the writings were of great value. It is curious therefore that they have slipped into relative obscurity only 100 years later, even though they were widely accepted within the Church of England and beyond.

## SELLING THE AIR

## A CRITIQUE OF THE POLICY OF COMMERCIAL BROADCASTING IN THE UNITED STATES

---

*University of Chicago Press* In this interdisciplinary study of the laws and policies associated with commercial radio and television, Thomas Streeter reverses the usual take on broadcasting and markets by showing that government regulation creates rather than intervenes in the market. Analyzing the processes by which commercial media are organized, Streeter asks how it is possible to take the practice of broadcasting—the reproduction of disembodied sounds and pictures for dissemination to vast unseen audiences—and constitute it as something that can be bought, owned, and sold. With an impressive command of broadcast history, as well as critical and cultural studies of the media, Streeter shows that liberal marketplace principles—ideas of individuality, property, public interest, and markets—have come into contradiction with themselves. Commercial broadcasting is dependent on government privileges, and Streeter provides a searching critique of the political choices of corporate liberalism that shape our landscape of cultural property and electronic intangibles.
