A selection of the best papers - those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL (the Electronic Journal of e-Learning www.ejel.com). These will be chosen for their quality of writing and relevance to the Journal's objective of publishing papers that offer new insights or practical help into the application e-Learning.

UNDERSTANDING STATISTICS IN THE BEHAVIORAL SCIENCES

[Cengage Learning](#) Based on over 30 years of successful teaching experience in this course, Robert Pagano's introductory text takes an intuitive, concepts-based approach to descriptive and inferential statistics. He uses the sign test to introduce inferential statistics, empirically derived sampling distributions, many visual aids, and lots of interesting examples to promote student understanding. One of the hallmarks of this text is the positive feedback from students -- even students who are not mathematically inclined praise the text for its clarity, detailed presentation, and use of humor to help make concepts accessible and memorable. Thorough explanations precede the introduction of every formula, and the exercises that immediately follow include a step-by-step model that lets students compare their work against fully solved examples. This combination makes the text perfect for students taking their first statistics course in psychology or other social and behavioral sciences. RELIABILITY, MAINTAINABILITY AND RISK

PRACTICAL METHODS FOR ENGINEERS INCLUDING RELIABILITY CENTRED MAINTENANCE AND SAFETY-RELATED SYSTEMS

[Elsevier](#) Reliability, Maintainability and Risk: Practical Methods for Engineers, Eighth Edition, discusses tools and techniques for reliable and safe engineering, and for optimizing maintenance strategies. It emphasizes the importance of using reliability techniques to identify and eliminate potential failures early in the design cycle. The focus is on techniques known as RAMS (reliability, availability, maintainability, and safety-integrity). The book is organized into five parts. Part 1 on reliability parameters and costs traces the history of reliability and safety technology and presents a cost-effective approach to quality, reliability, and safety. Part 2 deals with the interpretation of failure rates, while Part 3 focuses on the prediction of reliability and risk. Part 4 discusses design and assurance techniques; review and testing techniques; reliability growth modeling; field data collection and feedback; predicting and demonstrating repair times; quantified reliability maintenance; and systematic failures. Part 5 deals with legal, management and safety issues, such as project management, product liability, and safety legislation. 8th edition of this core reference for engineers who deal with the design or operation of any safety critical systems, processes or operations Answers the question: how can a defect that costs less than \$1000 dollars to identify at the process design stage be prevented from escalating to a \$100,000 field defect, or a \$1m+ catastrophe Revised throughout, with new examples, and standards, including must have material on the new edition of global functional safety standard IEC 61508, which launches in 2010

INCLUSION AND EXCLUSION IN COMPETITIVE SPORT

SOCIO-LEGAL AND REGULATORY PERSPECTIVES

[Routledge](#) Society is obsessed with categorising and treating individuals and groups according to their physical and non-physical differences, such as sex, gender, disability and race. This treatment can lead to the inclusion or exclusion of an individual from the tangible and intangible benefits of society. Where this practice becomes discriminatory, legal frameworks can protect human rights and ensure that people are treated with due respect for their similarities and differences. In a sporting context, the inclusion and exclusion of athletes based upon their differences is often a necessary part of the essence of competitive sporting activity, arranged around rules and categories that can have an unequal exclusionary impact on certain classes of individual. Dominant sporting cultures can also have exclusionary effects. This important and innovative book seeks to investigate the socio-legal and regulatory balance between inclusion and exclusion in competitive sport. It critically analyses a range of legal and non-legal cases concerning sport-specific inclusion and exclusion in the areas of sex, gender, disability and race, including those cases involving Oscar Pistorius, Caster Semenya and Luis Suarez, to identify the extent to which the law and sport adopt a justifiable and legitimate inclusive or exclusive approach to participation. The book explores national and international regulatory frameworks, identifying deficiencies and good practice, and concludes with recommendations for regulatory reform. Inclusion and Exclusion in Competitive Sport is important reading for anybody with an interest in the relationship between sport and wider society, sports development, sport management, sports law, or socio-legal studies.

A YEAR OF PR

A COLLECTION FROM AN EDUCATIONAL SERVICE CENTER

[Dog Ear Publishing](#) A Year of PR: A Collection from an Educational Service Center is unlike any other public relations book for schools. It offers a year's worth of press releases involving real schools, their students, faculty, and administrators, and covers a plethora of

topics—from general operations and building upgrades to fund-raising and human interest features—all of which aim to inspire principals and superintendents to write and share their own positive public relations. With so much media coverage these days focusing on school violence, troubled youth, and funding issues, the general public may not be aware of all the good things happening within their local schools' walls: Students are working hard to surpass academic goals, perform athletic feats, embrace new technology, and help others—making the world a better place. Take a page from A Year of PR and highlight your own school district with a smart press release plan. Let the community know what your students are up to. Shine a light on teachers who go the extra mile, community leaders who get involved with the schools, and interesting people who have a positive impact on the district. By keeping people informed, you improve relations between schools and communities and keep residents invested in their district. Moreover, a good public relations strategy presents an opportunity to show stakeholders the positive impact that faculty, staff, administrators, board members, and most importantly, students make in our communities.

STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

[National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
