whether you're a tech startup founder, a small business owner, or part of a large corporation. No matter what your product or service, this book will help you reframe how it's presented to the world, in order to meaningfully connect with people who want it. Seth employs his signature blend of insight, observation, and memorable examples to teach you: * How to build trust and permission with your target market. * The art of positioning--deciding not only who it's for, but who it's not for. * Why the best way to achieve your goals is to help others become who they want to be. * Why the old approaches to advertising and branding no longer work. * The surprising role of tension in any decision to buy (or not). * How marketing is at its core about the stories we tell ourselves about our social status. You can do work that matters for people who care. This book shows you the way.

Laws of UX

Using Psychology to Design Better Products & Services

O'Reilly Media An understanding of psychology—specifically the psychology behind how users behave and interact with digital interfaces—is perhaps the single most valuable nondesign skill a designer can have. The most elegant design can fail if it forces users to conform to the design rather than working within the "blueprint" of how humans perceive and process the world around them. This practical guide explains how you can apply key principles in psychology to build products and experiences that are more intuitive and human-centered. Author Jon Yablonski deconstructs familiar apps and experiences to provide clear examples of how UX designers can build experiences that adapt to how users perceive and process digital interfaces. You'll learn: How aesthetically pleasing design creates positive responses The principles from psychology most useful for designers How these psychology principles relate to UX heuristics Predictive models including Fitts's law, Jakob's law, and Hick's law Ethical implications of using psychology in design A framework for applying these principles
