The Chicago Guide to Writing about Multivariate Analysis, Second Edition

University of Chicago Press Many different people, from social scientists to government agencies to business professionals, depend on the results of multivariate models to inform their decisions. Researchers use these advanced statistical techniques to analyze relationships among multiple variables, such as how exercise and weight relate to the risk of heart disease, or how unemployment and interest rates affect economic growth. Yet, despite the widespread need to plainly and effectively explain the results of multivariate analyses to varied audiences, few are properly taught this critical skill. The Chicago Guide to Writing about Multivariate Analysis is the book researchers turn to when looking for guidance on how to clearly present statistical results and break through the jargon that often clouds writing about applications of statistical analysis. This new edition features even more topics and real-world examples, making it the must-have resource for anyone who needs to communicate complex research results. For this second edition, Jane E. Miller includes four new chapters that cover writing about interactions, writing about event history analysis, writing about multilevel models, and the "Goldilocks principle" for choosing the right size contrast for interpreting results for different variables. In addition, she has updated or added numerous examples, while retaining her clear voice and focus on writers thinking critically about their intended audience and objective. Online podcasts, templates, and an updated study guide will help readers apply skills from the book to their own projects and courses. This continues to be the only book that brings together all of the steps involved in communicating findings based on multivariate analysis—finding data, creating variables, estimating statistical models, calculating overall effects, organizing ideas, designing tables and charts, and writing prose—in a single volume. When aligned with Miller's twelve fundamental principles for quantitative writing, this approach will empower readers—whether students or experienced researchers—to communicate their findings clearly and effectively.

The Differentiated Classroom

Responding to the Needs of All Learners

ASCD Although much has changed in schools in recent years, the power of differentiated instruction remains the same—and the need for it has only increased. Today's classroom is more diverse, more inclusive, and more plugged into technology than ever before. And it's led by teachers under enormous pressure to help decidedly unstandardized students meet an expanding set of rigorous, standardized learning targets. In this updated second edition of her best-selling classic work, Carol Ann Tomlinson offers these teachers a powerful and practical way to meet a challenge that is both very modern and completely timeless: how to divide their time, resources, and efforts to effectively instruct so many students of various backgrounds, readiness and skill levels, and interests. With a perspective informed by advances in research and deepened by more than 15 years of implementation feedback in all types of schools, Tomlinson explains the theoretical basis of differentiated instruction, explores the variables of curriculum and learning environment, shares dozens of instructional strategies, and then goes inside elementary and secondary classrooms in nearly all subject areas to illustrate how real teachers are applying differentiation principles and strategies to respond to the needs of all learners. This book's insightful guidance on what to differentiate, how to differentiate, and why lays the groundwork for bringing differentiated instruction into your own classroom or refining the work you already do to help each of your wonderfully unique learners move toward greater knowledge, more advanced skills, and expanded understanding. Today more than ever, *The Differentiated Classroom* is a must-have staple for every teacher's shelf and every school's professional development collection.

Best Practices in Writing Instruction

Sliding into Home

Open Road Media An adolescent girl learns that realizing a dream requires a good deal more than stubborn, steely resolve as she risks everything to follow her heart. It's not fair! Thirteen-year-old Joelle Cunningham is passionate about baseball. She loves to watch it, read about it, and, most of all, play it. But when her family moves from Minneapolis to the small town of Greendale, Iowa, she quickly discovers that there are strict rules preventing her from playing on the school baseball team. At Hoover Middle School, only boys play baseball. Girls play softball. It's not the same sport! Joelle tries to tell everyone. But no one is listening. Not Coach Carlyle—even though his baseball team is at the bottom of the league, he doesn't want her on his team. Not Ms. Fenner, the softball coach—she wants Joelle to use her big-league swing to benefit the girls' team. Not her new friend, Elizabeth, who is growing tired of her complaints. Not even Jason, her older brother, who is too busy at college to be of much help. But Joelle is determined to play baseball. And through some creative problem-solving and surprising alliances, she finds a solution to her dilemma that brings the disputing sides together . . . and baseball to the girls of Greendale. Author Dori Butler has created a high-spirited, indomitable character that young girls will admire and root for in this story of frustrated ambition and ultimate triumph.

The Crucible

"The Crucible" is a 1952 play by the American playwright Arthur Miller. It is a dramatization of the Salem witch trials that took place in the Province of Massachusetts Bay during 1692 and 1693. Miller wrote the play as an allegory of McCarthyism, when the US government blacklisted accused communists. Miller himself was questioned by the House of Representatives' Committee on Un-American Activities in 1956 and convicted of "contempt of Congress" for refusing to identify others present at meetings he had attended. It was first performed at the Martin Beck Theater on Broadway on January 22, 1953. Miller felt that this production was too stylized and cold and the reviews for it were largely hostile (although The New York Times noted "a powerful play in a driving performance"). Nonetheless, the production won the 1953 "Best Play" Tony Award. A year later a new production succeeded and the play became a classic. It is a central work in the canon of American drama. Fuji Books' edition of "The Crucible" contains supplementary texts: * "Tragedy And The Common Man", an essay by Arthur Miller. * Excerpts from Nathaniel Hawthorne's magnum opus "The Scarlet Letter", a narrative of the Salem Witch trials. * A few selected quotes of Arthur Miller.

Handbook of Automated Essay Evaluation

Current Applications and New Directions

Routledge This comprehensive, interdisciplinary handbook reviews the latest methods and technologies used in automated essay evaluation (AEE) methods and technologies. Highlights include the latest in the evaluation of performance-based writing assessments and recent advances in the teaching of writing, language testing, cognitive psychology, and computational linguistics. This greatly expanded follow-up to Automated Essay Scoring reflects the numerous advances that have taken place in the field since 2003 including automated essay scoring and diagnostic feedback. Each chapter features a common structure including an introduction and a conclusion. Ideas for diagnostic and evaluative feedback are sprinkled throughout the book. Highlights of the book's coverage include: The latest research on automated essay evaluation. Descriptions of the major scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ Engine, c-rater™, and LightSIDE. Applications of the uses of the technology including a large scale system used in West Virginia. A systematic framework for evaluating research and technological results. Descriptions of AEE methods that can be replicated for languages other than English as seen in the example from China. Chapters from key researchers in the field. The book opens with an introduction to AEEs and a review of the "best practices" of teaching writing along with tips on the use of automated analysis in the classroom. Next the book highlights the capabilities and applications of several scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ engine, c-rater™, and LightSIDE. Here readers will find an actual application of the use of an AEE in West Virginia, psychometric issues related to AEEs such as validity, reliability, and scaling, and the use of automated scoring to detect reader drift, grammatical errors, discourse coherence quality, and the impact of human rating on AEEs. A review of the cognitive foundations underlying methods used in AEE is also provided. The book concludes with a comparison of the various AEE systems and speculation about the future of the field in light of current educational policy. Ideal for educators, professionals, curriculum specialists, and administrators responsible for developing writing programs or distance learning curricula, those who teach using AEE technologies, policy makers, and researchers in education, writing, psychometrics, cognitive psychology, and computational linguistics, this book also serves as a reference for graduate courses on automated essay evaluation taught in education, computer science, language, linguistics, and cognitive psychology.

Back to School

Why Everyone Deserves a Second Chance at Education

The New Press It's a statistic that's sure to surprise: close to 45 percent of postsecondary students in the United States today do not enroll in college directly out of high school and many attend part-time. Following a tradition of self-improvement as old as the Republic, the "nontraditional" college student is becoming the norm. Back to School is the first book to look at the schools that serve a growing population of "second-chancers," exploring what higher education--in the fullest sense of the term--can offer our rapidly changing society and why it is so critical to support the institutions that make it possible for millions of Americans to better their lot in life. In the anecdotal style of his bestselling Possible Lives, Rose crafts rich and moving vignettes of people in tough circumstances who find their way; who get a second . . . or third . . . or even fourth chance; and who, in a surprising number of cases, reinvent themselves as educated, engaged citizens. Rose reminds us that our nation's economic and civic future rests heavily on the health of the institutions that serve millions of everyday people--not simply the top twenty universities in U.S. News and World Report--and paints a vivid picture of the community colleges and adult education programs that give so many a shot at reaching their aspirations.

The Worst Journey in the World

Antarctic 1910-1913

Simon and Schuster "And I tell you, if you have the desire for knowledge and the power to give it physical expression, go out and explore," wrote Apsley Cherry-Garrard in the opening chapters of his now classic exploration narrative, The Worst Journey in the World. The incredible tale that he tells is of the fated last voyage of Captain Robert Scott and his crew to the outermost reaches of the South Pole on the Terra Nova. Chronicling the journey of the Terra Nova from England in 1910 to New Zealand in 1913, The Worst Journey in the World vividly describes the entirety of Scott's harrowing and tragic final expedition. Driven by a lust to investigate the untold scientific knowledge contained within the South Pole, these courageous pioneers embarked on a journey into previously unexplored territory, subjecting themselves to the ultimate physical and mental limits as they traveled the massive

expanses of the icy tundra. Cherry-Garrard was a key member of the Terra Nova crew that, in addition to the desire to uncover scientific data, desperately sought to be the first Europeans to reach the South Pole. But the expedition was thwarted at every turn by punishing weather, extreme bad luck, and the intense physical and mental decline of the crew on the final stages of their journey. Confronted by the shattering knowledge that rival explorer Roald Amundsen had reached the South Pole only a few weeks before them, Scott's team then had to negotiate the last stage of their voyage, a doomed attempt which has no equal in peril, disaster, and tragedy. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Swimming to Antarctica

Tales of a Long-Distance Swimmer

Knopf NATIONAL BESTSELLER • In this extraordinary book, the world's most extraordinary distance swimmer writes about her emotional and spiritual need to swim and about the almost mystical act of swimming itself. Lynne Cox trained hard from age nine, working with an Olympic coach, swimming five to twelve miles each day in the Pacific. At age eleven, she swam even when hail made the water "like cold tapioca pudding" and was told she would one day swim the English Channel. Four years later—not yet out of high school—she broke the men's and women's world records for the Channel swim. In 1987, she swam the Bering Strait from America to the Soviet Union—a feat that, according to Gorbachev, helped diminish tensions between Russia and the United States. Lynne Cox's relationship with the water is almost mystical: she describes swimming as flying, and remembers swimming at night through flocks of flying fish the size of mockingbirds, remembers being escorted by a pod of dolphins that came to her off New Zealand. She has a photographic memory of her swims. She tells us how she conceived of, planned, and trained for each, and re-creates for us the experience of swimming (almost) unswimmable bodies of water, including her most recent astonishing one-mile swim to Antarctica in thirty-two-degree water without a wet suit. She tells us how, through training and by taking advantage of her naturally plump physique, she is able to create more heat in the water than she loses. Lynne Cox has swum the Mediterranean, the three-mile Strait of Messina, under the ancient bridges of Kunning Lake, below the old summer palace of the emperor of China in Beijing. Breaking records no longer interests her. She writes about the ways in which these swims instead became vehicles for personal goals, how she sees herself as the lone swimmer among the waves, pitting her courage against the odds, drawn to dangerous places and treacherous waters that, since ancient times, have challenged sailors in ships.

The Boy Who Loved Words

Schwartz & Wade In this Parents' Choice Gold Award-winning book, Selig collects words, ones that stir his heart (Mama!) and ones that make him laugh (giggle). But what to do with so many luscious words? After helping a poet find the perfect words for his poem (lozenge, lemon, and licorice), he figures it out: His purpose is to spread the word to others. And so he begins to sprinkle, disburse, and broadcast them to people in need.
