Towards an Intelligent Learning Management System Under Blended Learning

Trends, Profiles and Modeling Perspectives

Springer Science & Business Media What are the key channels to change in blended instructional practice as they relate to the use of a learning management system (LMS)? What role LMS users' profiles play in facilitating change in practice? Can we model users' quality of interaction (QoI) with LMS? How inclusiveness and affectiveness could lead to a personalized intelligent LMS (iLMS)? If these questions sound intrinsic to you and to your own experience and circumstance, then this book fits absolutely to you. Here, the term Blended - viewed as a fuzzy concept - is understood as a stepping-stone on the way to the future, to explain the multiple ways human beings think/act/feel of society in the 21st century and to embrace the opportunity of humans to re/co-construct new knowledge through the intermediation role of the technology. Initially, based on an online learning environment' theoretical framework, some current issues of the educational processes in the digital age of Web 2.0 are analyzed. Then, after exploring the main methodological procedures, characteristic examples of research case studies follow, including LMS users' trends and profiles and modeling of their QoI using fuzzy logic. This book offers useful information that evokes initiatives towards rethinking of the value, efficiency, inclusiveness, affectiveness and personalization of the iLMS-based b-learning environment, both by the educators, the LMS designers and educational policy decision makers.

Change in Schools

Facilitating the Process

SUNY Press This book summarizes nearly fifteen years of research in schools--research geared toward understanding and describing the change process as experienced by its participants. It addresses the question: "What can educators and educational administrators do on a day-to-day basis to become more effective in facilitating beneficial change?" The book provides research-based tools, techniques, and approaches that can help change facilitators to attain this goal. The authors contend that, in order to be more effective, educators must be concerns-based in their approach to leadership. Early chapters deal with teachers' evolving attitudes, concerns, and perceptions of change, as well as their gradually developing skills in implementing promising educational innovations. The authors next turn to examine the role of the school principal and other leaders as change facilitators, and present ways that they can become better informed about the developmental state of teachers as well as how to use these diagnostic survey and data as the basis for facilitating the change process. The emphasis is on practical day-to-day skills and techniques, showing administrators how to design and implement interventions that are supportive of teachers and others. Each chapter presents not only the concepts and research of the authors but also translates the concepts in concrete applications which illustrate the ways they can be applied to obtain genuine and lasting improvements. The book also contains an important discussion and description of the change process, focusing on teachers, innovations, and the schools.

Higher Education in Asia

Expanding Out, Expanding Up : the Rise of Graduate Education and University Research

UNESCO As demand for tertiary education continues to rise across Asia, countries are expanding their higher education systems outwards by constructing new universities, hiring more faculty and encouraging private provision. Many of these systems are also moving upwards by introducing new graduate programmes to ensure that there are enough qualified professors and researchers for the future. Based on data from the UNESCO Institute for Statistics (UIS) and a diverse range of national and international sources, this report provides a comprehensive view to evaluate different strategies to expand graduate education. Special focus is given to middle-income countries in the region which have recently experienced the most dramatic growth through an innovative mix of policies. For example, interventions aimed at improving university rankings may be controversial but are nonetheless reshaping university reforms. The report highlights the pros and cons by comparing the three most commonly-used university ranking systems. Across the region, countries are not simply seeking to accommodate more students - they are striving to build top-quality universities that can produce the research and workforce needed for national economic development. So this report presents a range of data to better evaluate the economic benefits flowing from university research, as well as the spillover effects to the private sector. The authors also analyse the ways in which international collaboration can boost the productivity and quality of university-based research. Overall, this report provides the data and analysis to help countries weigh the balance of different policies to expand their higher education systems.

Kasher in the Rye

The True Tale of a White Boy from Oakland Who Became a Drug Addict, Criminal, Mental Patient, and Then Turned 16

Grand Central Publishing Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.
