The Manual for Manufactured / Mobile Home Repair and Upgrade

A Book for the Do-It-Yourselfer

Books on repairing manufactured homes are nearly impossible to find. If one is found, it's either outdated or lacking real information. This manual has changed all that. Designed for homeowners as well as contractors, "The manual for manufactured/mobile home repair and upgrade" is packed full of useful repair techniques. But it's more than just doing repairs, it's also about upgrading and improving a manufactured home. For instance, not only will you learn how to stop a metal roof from leaking, you'll also discover an inexpensive way to replace it. Want to relevel your own home? This manual gives you step by step instructions. Need to replace your waterlines? Then you can't miss the information found here. Even if you don't do your own repairs, this manual will give you invaluable knowledge of how a repair should be performed so when you do seek a contractor, you know the right questions to ask. Written by a contractor, this manual should be required reading for every owner of a manufactured home.

Problems in Breast Surgery

A Repair Manual

CRC Press **Problems in Breast Surgery: A Repair Manual** is destined to become a valued part of every plastic surgeon and breast surgeon's library. This unique book provides a virtual lifeline for addressing the challenges encountered in aesthetic and reconstructive breast surgery and avoiding possible problems and complications. This is not a traditional technique-oriented textbook; rather, it has a problem focus and provides different solutions for solving complex problems associated with secondary breast surgery. The book begins with chapters on the basic principles of corrective breast surgery and the key anatomic factors and mechanisms of failure that are key to accurate analysis. With this foundation in place, it proceeds to address the spectrum of potential problems that can occur with each of the different procedures, ranging from breast augmentation, reduction, and mastopexy to breast and nipple-areola reconstruction. Each chapter is introduced with a specific problem presented by Drs. Fisher and Handel. Then the second portion of the chapter features a variety of solutions from different experts for treating the problem. These experts provide case examples of similar problems with a step-by-step explanation of how they solved these problems and why they took the approach that they used. The book covers both aesthetic and reconstructive breast surgery. The goal of this text is not to judge which solution is the best (that decision is left to the reader). Rather, it is designed to provide a detailed road map explaining how to move from point A, the problem, to point B, the solution. Beautifully Illustrated Dramatic color illustrations and numerous preoperative, intraoperative, and postoperative images help readers visualize the steps of each operative solution. Unique Features This book's approach is unique and should be of great educational value to surgeons—both residents and practitioners—in solving challenging problems and complications. Even more important, it will help them avoid problems and complications in future cases.

The Complete Story 1951 to 1971

Minorities, Rights and the Law in Malaysia

Routledge This book analyses the mobilisation of race, rights and the law in Malaysia. It examines the Indian community in Malaysia, a quiet minority which consists of the former Indian Tamil plantation labour community and the urban Indian middle-class. The first part of the book explores the role played by British colonial laws and policies during the British colonial period in Malaya, from the 1890s to 1956, in the construction of an Indian "race" in Malaya, the racialization of labour laws and policies and labour-based mobilisation culminated in the 1940s. The second part investigates the mobilisation trends of the Indian community from 1957 (at the onset of Independent Malaya) to 2018. It shows a gradual shift in the Indian community from a "quiet minority" into a mass mobilising collective or social movement, known as the Hindu Rights Action Force (HINDRAF), in 2007. The author shows that activist lawyers and Indian mobilisers played a crucial part in organizing a civil disobedience strategy of framing grievances as political rights and using the law as a site of contention in order to claim legal rights through strategic litigation. Highly interdisciplinary in nature, this book will be of interest to scholars and researchers examining the role of the law and rights in areas such as sociolegal studies, law and society scholarship, law and the postcolonial, social movement studies, migration and labour studies, Asian law and Southeast Asian Studies.

The Art of Classic Planning

Building Beautiful and Enduring Communities

Harvard University Press "An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years—not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of L'Enfant's Washington, Haussmann's Paris, and Burnham's Chicago, Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities."

Schooling for Social Change

The Rise and Impact of Human Rights Education in India

A&C Black **Schooling for Social Change** offers fresh perspectives on the emerging field of human rights education in India. 60 years after independence, the Indian schooling system remains unequal. Building on over a year of fieldwork, including interviews and focus groups with policymakers, educators, parents and students, Monisha Bajaj examines different understandings of human rights education at the levels of policy, pedagogy and practice. She provides an in-depth study of the origins and effects of the Institute of Human Rights Education, a non-governmental program that operates in over 4,000 schools in India. This enlightening book offers an instructive case study of how international mandates and grassroots activism can work together. Bajaj shows how the Institute of Human Rights Education has gained significant momentum for school-based adoption, textbook reform, and policy changes in a nation-state still struggling to ensure universal access to education. *Schooling for Social Change* provides a wealth of analysis from the frontlines of education reform and will be of interest to all those working in international and comparative education, human rights, and South Asian development.
