## Feminist Critical Policy Analysis: A perspective from post-secondary education

*Psychology Press This text sets out to challenge the traditional power basis of the policy decision makers in education. It contests that others who have an equal right to be consulted and have their opinions known have been silenced, declared irrelevant, postponed and otherwise ignored. Policies have thus been formed and implemented without even a cursory feminist critical glance. The chapters in this text illustrate how to incorporate critical and feminist lenses and thus create policies to meet the lived realities, the needs, aspirations and values of women and girls. A particular focus is the primary and secondary sectors of education.*

# Science Fiction Film and Television in the Digital Age

Bloomsbury Publishing *In this remarkable and original book, Sean Redmond examines the issues and themes that are repeatedly found across a range of contemporary science fiction films and television programmes. He argues that they reveal the profound effects the digital age has had on our social lives. Through narratives that feature the 'post-human', genetic engineering and cloning, surveillance and data mining, space and time travel, artificial intelligence, online dating cultures and visions of catastrophe, they portray a world in which the material, and the stable, are being lost to the ever-more volatile and ephemeral idea of 'liquid space'. Redmond examines a wide selection of popular films and TV series such as Gravity, Under the Skin, The Lobster, Children of Men and Doctor Who, to locate how traditional values are being erased in favour of a new liquid modernity. Drawing on an eclectic range of approaches from phenomenology to critical race theory, and from close textual analysis to the revelations of eye-tracking technology, this book is an illuminating account of the digital age through the lens of science fiction.*

## Free from School

1st World Publishing It's not every day that a 16 year old writes a book. In fact, girls and boys of that age are supposed to spend their time studying what other people write. It is pre-sumed that at that age they do not themselves have anything significant or interesting to say. And the education system guarantees just that. The best rewards go to those who can parrot set answers to set questions in examination halls. Those who try to use their imagination or reply differently are often punished with low grades.

## Dictionary of British Arms

This book is designed to enable those with a working knowledge of heraldry to identify medieval British coats of arms. An Ordinary, in this context, is a collection of arms arranged alphabetically according to their designs, as opposed to an armory which is arranged alphabetically by surname. Listed in this volume are entries from Anchor to Bend. This present work is the first of a four-volume Ordinary covering the period before 1530, which is the point at which heraldic visitations for the purpose of collecting information about arms began, and which marks the appearance of the modern heraldic system. Its publication will mean that the wide range of people interested in medieval arms - historians, antiquaries, archaeologists, genealogist and those dealing in and collecting medieval objects - will be able to identify accurately the arms that occur in a medieval context. Arms were widely displayed in the middle ages and can be found not only on tombs, monuments and seals, but also on textiles, manuscripts, metalwork, glass, wall paintings and other medieval artefacts. The index acts as an armory, and allows the reader to discover the blazons of arms recorded for particular surnames in the medieval period. It will thus be a key tool for anyone researching medieval families and their history, and represents a remarkable achievement on the part of the many experts who have contributed to it.

### Exhibit A

Vintage Uk *Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion and, as Cecil Beaton described, 'his grotesque little gaminés', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era - glamorous, hard-edged, cleverly spiced with vulgarity.. .rich with implied narratives and strong erotic undercurrents'*

## Little Ida's Flowers

Lindhardt og Ringhof *Little Ida liked the student, who always had a tale to tell, a lot. So, one morning, when little Ida's flowers had all withered, she asked the student what could have happened to them. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.*
