Crafting Interpreters

Genever Benning Despite using them every day, most software engineers know little about how programming languages are designed and implemented. For many, their only experience with that corner of computer science was a terrifying "compilers" class that they suffered through in undergrad and tried to blot from their memory as soon as they had scribbled their last NFA to DFA conversion on the final exam. That fearsome reputation belies a field that is rich with useful techniques and not so difficult as some of its practitioners might have you believe. A better understanding of how programming languages are built will make you a stronger software engineer and teach you concepts and data structures you'll use the rest of your coding days. You might even have fun. This book teaches you everything you need to know to implement a full-featured, efficient scripting language. You'll learn both high-level concepts around parsing and semantics and gritty details like bytecode representation and garbage collection. Your brain will light up with new ideas, and your hands will get dirty and calloused. Starting from main(), you will build a language that features rich syntax, dynamic typing,

garbage collection, lexical scope, first-class functions, closures, classes, and inheritance. All packed into a few thousand lines of clean, fast code that you thoroughly understand because you wrote each one yourself.

Francois Ozon

University of Illinois Press In just over a decade, François Ozon has earned an international reputation as a successful and provocative filmmaker. A student of Eric Rohmer and Jean Douchet at the prestigious *Fémis*, Ozon made a number of critically acclaimed shorts in the 1990s and released his first feature film *Sitcom* in 1998. Two additional shorts and eleven feature films have followed, including international successes *8 femmes* and *Swimming Pool* and more recent releases such as *Angel*, *Ricky*, and *Le refuge*. Ozon's originality lies in his filmmaking style, which draws on familiar cinematic traditions (the crime thriller, the musical, the psychological drama, the comedy, the period piece) but simultaneously mixes these recognizable genres and renders them unfamiliar. Despite tremendous diversity in cinematic choices, Ozon's oeuvre is surprisingly consistent in its desire to blur the traditional frontiers between the masculine and the feminine, gay and straight, reality and fantasy, auteur and commercial cinema. Thibaut Schilt provides an overview of François Ozon's career to date, highlighting the director's unrestrained, voracious cinephilia, his recurrent collaborations with women screenwriters and actresses, and the trademarks of his cinema including music, dance, and the clothes that accompany these now typically Ozonian episodes. Schilt contextualizes Ozon's filmmaking within the larger fields of French filmmaking and international queer cinema, and he discusses several major themes running through Ozon's work, including obsessions with inadequate fathers, various types of mourning, and a recurring taste for "the foreign." The volume also includes an insightful interview with the director.

Free the Children recounts Craig's remarkable odyssey across South Asia, meeting some of the world's most disadvantaged children and learning the truth behind the headlines. Be there with him as he explores slums and sweatshops, fighting to rescue children from the chains of inhumane conditions.
