A Comparative Approach

Springer Science & Business Media *It is now apparent to many scholars and practitioners that research and development activities and innovation are the pathways to sustainable economic growth. One also recognizes that delving into a topic as such is rather challenging as it is a multidimensional task. We have learned quite a bit on the innovation-growth relationship of the developed countries based on the extensive research on the topic. However, we are yet to understand the very same process for the developing countries where the challenges are expected to be paramount. There obviously is few empirical and theoretical discussion on this topic. This book dares to provide a succinct discussion on a wide array of issues on the innovation and growth relationship for the developing countries. The book starts off by providing the reader with a promising - ternative to endogenous growth models that entails understanding the effect of variables, such as technological change on growth in considerable detail. The next step in the book involves a thorough analysis of economic growth models and how the investment climate affects innovation and entrepreneurship and hence economic growth. Against this background is examined the context of the telecommunications industry in Turkey. Following this, we delve into understanding the radical versus incremental innovation activities, where it is argued that developing nations are more likely to engage in radical innovation, whereas developing nations are engaged in incremental innovation.*
