ACHTUNG-PANZER!

THE DEVELOPMENT OF ARMOURED FORCES, THEIR TACTICS AND OPERATIONAL POTENTIAL

Arms & Armour *This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published*

in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

40 SONNETS

This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the s^hance, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the “sound that fades up from the hiss, / like a glass some random downdraught had set ringing, / now full of its only note, its lonely call.” In 40 Sonnets, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

THE MOBILE PHOTOGRAPHER

AN UNOFFICIAL GUIDE TO USING ANDROID PHONES, TABLETS, AND APPS IN A PHOTOGRAPHY WORKFLOW

Amherst Media It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't "real" cameras and that the people who use them aren't "real" photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more "serious" equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

THE KARMA OF VOCATION

Steiner reveals, based on rich details from Goethe's life, how our life can be determined by rhythms and cycles that are a result of earlier lives. He shows how destiny works into our routine vocational activity and how this activity releases forces that will bring about future worlds. Through these remarkable lectures, we can see that no human work is insignificant but all contributes to great cosmic processes.

DESTINIES OF INDIVIDUALS AND OF NATIONS

Steiner Books Steiner started each of these lectures, given during the war years, with a verse for those who had died. He begins this volume with a consideration of the destinies of nations from a spiritual point of view. He goes on to consider the Christ-Impulse and the Michaelic Spirits that serve him. Also included are lectures on the three stages of imaginative knowledge, the rhythm of sleeping and waking, the relation between our physical and etheric bodies, and the prophetic nature of dreams. The last lecture takes up the question of the cosmic meaning of our sense impressions and of our thinking, feeling, and willing.
