## The Lens

# A Practical Guide for the Creative Photographer

Rocky Nook, Inc. **Which lens should I buy for my camera? It's such a simple question, but choosing the right lens or lenses is actually one of the most important photographic decisions you can make. Nothing affects the quality of a photo more than the lens. It's no longer just about the megapixels-it's the glass that makes all the difference! Many first-time buyers of DSLRs don't venture past the basic lens included in the box. While some are reluctant to spend more money, others are confused by all the buzzwords or are overwhelmed by all the choices out there. It's really a shame, because interchangeable lenses give you amazing scope for quality photography. Take in vast sweeping scenes with a wide angle lens. Capture faraway birds with a telephoto lens. Examine the tiniest detail of a flower with a macro lens. Record the perfect portrait with a prime lens. Anything is possible when you choose the right lens for the job! This book isn't a simple catalogue of available lenses. New products are coming out all the time, and comparing specific lenses can be difficult. Instead, author N.K. Guy gives you all the information you need to make smart buying decisions. Optical technology is demystified, arcane terminology is decoded, and practical tips are provided. The Lens will help you build the perfect lens collection to suit your needs-now and in the future.**

# Learn Step by Step How to Go from Empty Studio to Finished Image

New Riders **FOR THE FIRST TIME EVER, YOU'LL LEARN ALL THREE ASPECTS OF WHAT IT TAKES TO CREATE STUNNING PORTRAITS (HINT: IT'S NOT JUST THE LIGHTING)** Scott Kelby, the world's #1 best-selling author of photography books, Editor-in-Chief and Publisher of Photoshop User magazine, and Publisher of the just-released Light It magazine, has reinvented how lighting books are written by finally revealing the entire process from start to finish. You see everything from the complete lighting setup (and all the gear used), to the shoot (including all the camera settings and a contact sheet of the progression of the shoot), to the all-important part that most books don't dare include-the post-processing and retouching in Photoshop. This book also breaks new ground in the visual way it teaches you the lighting setup. There aren't any sketches or 3D models-you see the lighting layout in a full-page photo, taken from above during the live shoot, so you can see exactly where everything's positioned (the subject, the photographer, the lighting, the background-you name it-you see it all). Plus, you'll see side, over-the-shoulder, and more behind-the-scenes views, so you can absolutely nail the lighting every time. **LEARN THE LIGHTING SETUPS THE PROS USE** Each year, Scott trains thousands of professional photographers during his Light It. Shoot It. Retouch It. LIVE! seminar tour and now, for the first time ever, he's taken that incredibly popular style of learning and put in into book form. ## World Investment Report 2020

## International Production Beyond the Pandemic

United Nations **The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.**

## Reading the Rocks

# How Victorian Geologists

# Discovered the Secret of Life

Bloomsbury Publishing **A SUNDAY TIMES BOOK OF THE YEAR FOR 2017 A rich and exuberant group biography of the first geologists, the people who were first to excavate from the layers of the world its buried history. These first geologists were made up primarily, and inevitably, of gentlemen with the necessary wealth to support their interests, yet boosting their numbers, expanding their learning and increasing their findings were clergymen, academics - and women. This lively and eclectic collection of**

characters brought passion, eccentricity and towering intellect to geology and Brenda Maddox in *Reading the Rocks* does them full justice, bringing them to vivid life. The new science of geology was pursued by this assorted band because it opened a window on Earth's ancient past. They showed great courage in facing the conflict between geology and Genesis that immediately presented itself: for the rocks and fossils being dug up showed that the Earth was immeasurably old, rather than springing from a creation made in the six days that the Bible claimed. It is no coincidence that Charles Darwin was a keen geologist. The individual stories of these first geologists, their hope and fears, triumphs and disappointments, the theological, philosophical and scientific debates their findings provoked, and the way that as a group, they were to change irrevocably and dramatically our understanding of the world is told by Brenda Maddox with a storyteller's skill and a fellow scientist's understanding. The effect is absorbing, revelatory and strikingly original.

## Underwater Optics

The irradiance pattern was measured for the propagation of a collimated beam of light underwater. A neodymium-doubled green laser was transmitted horizontally at a six foot depth in Lake Winnepesaukee, N.H. The irradiance was measured at distances from 0 to 100 feet and for off-axis angles from 0 to 58 degrees. The water had an attenuation length of 4.54 ft/ln and an absorption coefficient of 0.0446 ln/ft. The ratio of attenuation coefficient to absorption coefficient was 4.94. The fractional power contained within a cone of various angles was computed. At 20 attenuation lengths only 10% of the total power is contained within a cone of 4 degrees whereas at 4 attenuation lengths this same cone contains 50% of the power. (Author).
