THE BOAT GALLEY COOKBOOK: 800 EVERYDAY RECIPES AND ESSENTIAL TIPS FOR COOKING ABOARD

800 EVERYDAY RECIPES AND ESSENTIAL TIPS FOR COOKING ABOARD

McGraw Hill Professional No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there's no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we—Jan and Carolyn--both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore—and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for information that wasn't available--like when Jan ended up with a frozen chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients--maybe the result wasn't identical, but it was still tasty. We ended up with over 150 substitutions and dozens of “make it yourself” options. As we traded recipes and knowledge with each other, we realized we were compiling information that became The Boat Galley Cookbook: 800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbeque sauces, and so on. Step-by-step directions to give even “non-cooks” the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. The Boat Galley Cookbook is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals.

WORKSHOP MANUAL

THE NAKED FARMER

Macmillan Publishers Aus. Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. STORING FOOD WITHOUT REFRIGERATION

Blue River Press With a little planning and foresight, refrigeration is absolutely not necessary. In this book, the author discusses how to store food and make delicious meals without the use of a refrigerator. From milk and cheese to eggs and meat, the book lays out ways any boater, hiker, or camper can have home-cooked meals without artificially freezing or cooling their food. Broken down into handy categories, this reference guide gives techniques on how to properly wash, store, treat, and cook your food for maximum flavor and usability. Written by a dedicated sailor whose own skills were honed on months-long journeys, the tips in this guide can be put to use by anyone trying to avoid heavy, power-sucking refrigerators. Sailors, campers, and hikers all could benefit, and the books serves equally well for those in RVs, those with limited space, and those trying to live off the grid.

INTRODUCTION TO ORDINARY DIFFERENTIAL EQUATIONS

ACADEMIC PRESS INTERNATIONAL EDITION

Academic Press Introduction to Ordinary Differential Equations is a 12-chapter text that describes useful elementary methods of finding solutions using ordinary differential equations. This book starts with an introduction to the properties and complex variable of linear differential equations. Considerable chapters covered topics that are of particular interest in applications, including Laplace transforms, eigenvalue problems, special functions, Fourier series, and boundary-value problems of mathematical physics. Other chapters are devoted to some topics that are not directly concerned with finding solutions, and that should be of interest to the mathematics major, such as the theorems about the existence and uniqueness of solutions. The final chapters discuss the stability of critical points of plane autonomous systems and the results about the existence of periodic solutions of nonlinear equations. This book is great use to mathematicians, physicists, and undergraduate students of engineering and the science who are interested in applications of differential equation.

PHP & MYSQL: THE MISSING MANUAL

"O'Reilly Media, Inc." If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

CRUISING IN SERAFFYN

Lin and Larry Pardey A fun and exciting guide to the world of living out at sea. This book will teach you what you need to know in order to live safely, economically and cheaply when spending months at sea. If nothing else, this book will send you chasing for your dreams, whether it be to take an adventure at sea or just about anything else. This is the first of a four-book series which begins on the journey that Lin and Larry Pardey began 34 years ago in their self-built 24-foot engineless cutter, Seraffyn. In this journey, we explore places such as Mexico, Central America, the Caribbean, and the Islands of the Atlantic ocean. Throughout the book, we learn about people and customs, we learn about the tricks of boating, we learn about survival. This 25th anniversary edition includes a new forward, new appendixes, and a color photo album showing Lin, Larry and the Seraffyn during those months at sea.

PACIFIC MOTOR BOAT

BLADE-MOUNTED TRAILING EDGE FLAP CONTROL FOR BVI NOISE REDUCTION

Createspace Independent Publishing Platform Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. ULTIMATE SAILING

THE VEGA ADVENTURES

Equinox Publishing (Indonesia) Early in 1892, one of Norway's finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. With thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world's most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship restoration, and bush pilot, he has always come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.

THE BROTHERS GRIMM SPECTACULATHON

(A FULL-LENGTH VERSION) : A COMEDY

Two narrators attempt to recreate all 209 of the fairy tales of the Brothers Grimm in a wild, fast-paced extravaganza. To make it more difficult, they attempt to combine them into one gigantic fable using Rapunzel, Rumpelstiltskin, Hansel and Gretel, Snow White, Sleeping Beauty, Cinderella and other more obscure stories like Lean Lisa and The Devil's Grandmother.
