But suddenly U.S. fighter jets disappear from radar screens for a full five minutes, and there's no explanation. Utilities across the Western states cease functioning, and all telecommunications abruptly stop, with devastating consequences. This is not the work of a clever hacker, although Washington, worried about a panic, assures the public it is. Only the enormous power and speed of a DNA computer could have caused such havoc. Following a trail that leads him across two continents, Smith uncovers a web of deception that threatens to wreck havoc and forever reshape the world.

## Journeys and Essays

*Bold Type Books* **"I did not, I wish to state, become a journalist because there was no other 'profession' that would have me. I became a journalist because I did not want to rely on newspapers for information." Love, Poverty and War: Journeys and Essays showcases America's leading polemicist's rejection of consensus and cliché, whether he's reporting from abroad in Indonesia, Kurdistan, Iraq, North Korea, or Cuba, or when his pen is targeted mercilessly at the likes of William Clinton, Mother Theresa ("a fanatic, a fundamentalist and a fraud"), the Dalai Lama, Noam Chomsky, Mel Gibson and Michael Bloomberg. Hitchens began the nineties as a "darling of the left" but has become more of an "unaffiliated radical" whose targets include those on the "left," who he accuses of "fudging" the issue of military intervention in the Balkans, Afghanistan and Iraq. Yet, as Hitchens shows in his reportage, cultural and literary criticism, and opinion essays from the last decade, he has not jumped ship and joined the right but is faithful to the internationalist, contrarian and democratic ideals that have always informed his work.**

# Information Hunters

## When Librarians, Soldiers, and Spies Banded Together in World War II Europe

*Oxford University Press, USA* **"Information Hunters examines the unprecedented American effort to acquire foreign publications and information in World War II Europe. An unlikely band of librarians, scholars, soldiers, and spies went to Europe to collect books and documents to aid the Allies' cause. They travelled to neutral cities to find enemy publications for intelligence analysis and followed advancing armies to capture records in a massive program of confiscation. After the war, they seized Nazi works from bookstores and schools and gather together countless looted Jewish books. Improvising library techniques in wartime conditions, they contributed to Allied intelligence, preserved endangered books, engaged in restitution, and participated in the denazification of book collections. Information Hunters explores what collecting meant to the men and women who embarked on these missions, and how the challenges of a total war led to an intense focus on books and documents. It uncovers the worlds of collecting, in spy-ridden Stockholm and Lisbon, in liberated Paris and devastated Berlin, and in German caves and mineshafts. The wartime collecting missions had lasting effects. They intensified the relationship between libraries and academic institutions, on the one hand, and the government and military, on the other. Book and document acquisition became part of the apparatus of national security, military planning, and postwar reconstruction. These efforts also spurred the development of information science and boosted research libraries' ambitions to be great national repositories for research and the dissemination of knowledge that would support American global leadership, politically and intellectually. military intelligence, librarians, archivists, Library of Congress, Office of Strategic Services."--**
