National Incident Management System

Principles and Practice

Jones & Bartlett Learning In March 2004, the U.S. Department of Homeland Security implemented the National Incident Management System (NIMS), the country's first-ever standardized approach to incident management and response. Response agencies nationwide will need to become NIMS compliant in 2005. **National Incident Management System: Principles and Practice** translates the goals of the original NIMS document from concepts into capabilities, and provides responders with a step-by-step process to understanding and implementing NIMS. Through the use of case studies, readers will gain valuable insight on how to incorporate NIMS effectively into their departments or jurisdictions. As responders are faced with the tasks of reforming training curricula and incorporating NIMS into Standard Operating Procedures, it is essential that they have a practical resource to guide them through the nation's homeland security strategies, as well as to assist them with NIMS implementation in their own locality.

Introduction to Homeland Security: Policy, Organization, and Administration

Jones & Bartlett Learning Suitable for undergraduate students entering the field of Homeland Security, and for Criminal Justice students studying their role in a post-9/11 world, Introduction to Homeland Security is a comprehensive but accessible text designed for students seeking a thorough overview of the policies, administrations, and organizations that fall under Homeland Security. It grounds students in the basic issues of homeland security, the history and context of the field, and what the future of the field might hold. Students will come away with a solid understanding of the central issues surrounding Homeland Security, including policy concepts as well as political and legal responses to Homeland Security.

Cert Basic Training Participant Manual

Government Printing Office CERT (Community Emergency Response Team) is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community-- neighborhood associations, schools, workplaces, places of worship, and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved-- government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. Audience: Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. National Incident Management System Principles and Practice

Jones & Bartlett Publishers Completely updated to reflect the changes in the December 2008 release of the National Incident Management System. Developed and implemented by the United States Department of Homeland Security, the National Incident Management System (NIMS) outlines a comprehensive national approach to emergency management. It enables federal, state, and local government entities along with private sector organizations to respond to emergency incidents together in order reduce the loss of life and property and environmental harm. National Incident Management System: Principles and Practice, Second Edition translates the goals of the NIMS doctrine from theory into application, and provides straight-forward guidance on how to understand and implement NIMS within any private, emergency response, or governmental organization. The Second Edition features: Up-to-date coverage of the most current NIMS guidelines Progressive rural- and urban-based case studies, including completed ICS forms, help readers understand their roles within the various components of NIMS Helpful tables and graphics to simplify complex subject matter and reinforce important NIMS concepts National Incident Management System:

Principles and Practice is ideal for: • Fire, rescue, EMS, and law enforcement personnel • Federal, state, tribal, and local governmental employees • Health care professionals and hospital workers • Any employee working for a private company that may be directly involved in response operations

Managing Spontaneous Community Volunteers in
Disasters

A Field Manual

CRC Press While history has identified a need for improved coordination during emergencies, it has also demonstrated that community volunteers positively impact their neighborhoods during times of crisis. Laying out the rationale and process by which emergency managers, community leaders, and non-governmental aid organizations can effectively collaborate and integrate citizen response, *Spontaneous Community Volunteers in Disasters* explains how to engage, train, and utilize spontaneous unaffiliated community volunteers (SUCV). The book prepares leaders to integrate local volunteers into any scale emergency response. Protocols and flexible management solutions are outlined to ensure safe and effective planning and execution. Work templates provided can be modified to suit the needs of any community. This accessible manual provides the tools to: Assess your agency's role, tasks, and challenges to meet community needs in a disaster Build a plan for managing SUCVs by developing internal and external protocols Develop effective spot screening and selection methods Engage community members in information-sharing and outreach campaigns Consider policies and procedures that create relevant roles for volunteers and community groups to build a

resilient team for disaster recovery Provide National Incident Management System (NIMS) compliant answers to address common barriers to using SUCVs Combining field experience and psychosocial research, the book makes a strong case as to why community involvement in disaster response will have a positive impact on a community's resilient recovery. Praise for Spontaneous Community Volunteers in Disasters: All emergency management coordinators can benefit from this book. —Howard Butt, New Jersey State Police, State CERT Coordinator Lisa Orloff has done an excellent job in both identifying a significant opportunity in emergency response and meticulously outlining how that opportunity can best be leveraged. —Dr. Michael Chumer, New Jersey Institute of Technology The Alliance for Nonprofit Management has nominated the book for the Terry McAdam Award. This award is bestowed upon the Committee's choice for the most inspirational and useful new book published for the nonprofit sector.

Unity of Command: An Answer to the Maritime Homeland Security Interagency Quagmire

Maritime Homeland Security (MHS) and Defense (MHD) of the United States have evolved since the tragic events of September 11, 2001. However, effective operational command and control (C2) to ensure unity of effort of the myriad federal and state agencies involved in MHS still does not exist to prevent or recover from a terrorist attack or natural disaster. This paper examines the development of current U.S. structure for MHS involving the Department of

Homeland Security (DHS), the Department of Defense (DoD), and other federal and civil agencies with often overlapping, confusing, and conflicting jurisdictions. A proposal is made to expand DHS's capability with an operational unified command structure comparable to the military. DHS would exercise increased authority under the National Response Framework (NRF) and National Incident Management System (NIMS) for disaster response (DR). A new combatant commander (CCDR) for DHS with two geographic maritime Joint Task Forces (JTFs) based on the Joint Inter Agency Task Force-South (JIATF-S) model would conduct counterterrorism (CT) and counternarcotics (CN) operations with support from all other federal, state, and local agencies.

Interface

A Guide for Professionals Supporting the Criminal Justice System

Springer Science & Business Media A wide variety of professionals find themselves intimately involved in the criminal justice system; firefighters, emergency medical providers, nurses, physicians, public health personnel, environmental professionals, public works personnel, and many others. No previous work has attempted to address the criminal justice system in terms relevant to these professionals. **Interface: A Guide for Professionals Supporting the Criminal Justice System** explains the system, provides the reader with guidance to documenting incidents so that the data is both of value to the professional in the future and for use by the other components of the system. Further, this volume presents evidence from the aspect of these professionals, their needs in handling evidence, and basics of collection and preservation for those instances where it falls to them to do so. Professionals, not familiar with safety issues outside of their fields of expertise, have been injured or died as a result of exposure to hazards; it also educates them to considerations for their safety when out of their area of comfort. In addition, this book considers the role of the professional as interviewer, and provides basic guidance to this often valuable skill. Finally, **Interface** attempts to make the professional knowledgeable and comfortable in the courts, especially on the stand, where the professional may appear as a witness or even as an expert.

Basic Guidance for Public Information Officers

Createspace Independent Publishing Platform This guidance was developed in coordination with Federal, State, tribal, and local Public Information Officers (PIOs). The goal of this publication is to provide operational practices for performing PIO duties within the Incident Command System (ICS). It offers basic procedures to operate an effective Joint Information System (JIS). During an incident or planned event, coordinated and timely communication is critical to effectively help the community. Effective and accurate communication can save lives and property, and helps ensure credibility and public trust. This Basic Guidance for Public Information Officers provides fundamental guidance for any person or group delegated PIO responsibilities when informing the public is necessary. The guidance also addresses actions for preparedness, incident response, Joint Information Centers (JICs), incident recovery, and Federal public information support. The guidance material is adaptable to individual jurisdictions and specific incident conditions.

School Security

How to Build and Strengthen a School Safety Program

Butterworth-Heinemann School Security: How to Build and Strengthen a School Safety Program, Second Edition emphasizes a proactive rather than reactive approach to school security. Readers are introduced to basic loss prevention and safety concepts, including how to communicate safety information to students and staff, how to raise security awareness, and how to prepare for emergencies. The book discusses how to positively influence student behavior, lead staff training programs, and write sound security policies. This book isn't just for security professionals and will help educators and school administrators without formal security training effectively address school risk. As school safety challenges continue to evolve with new daily stories surrounding security lapses, lockdowns, or violent acts taking place, this thoroughly revised edition will help explain how to make educational institutions a safer place to learn. Includes new tabletop exercises for managing emergencies Contains coverage of the new risks commonly facing schools today, from access control to social media Presents updated school security resources Serves as a comprehensive guide for building an effective security program at little or no cost Covers fundamental CPTED concepts Addresses bullying, teen suicide, harassment, and dating violence Takes a holistic approach to school security rather than focusing on a particular threat or event
