What Temperature Reveals about the Past and Future of Our Species, Planet, and Universe

Penguin **In a wonderful synthesis of science, history, and imagination, Gino Segrè, an internationally renowned theoretical physicist, embarks on a wide-ranging exploration of how the fundamental scientific concept of temperature is bound up with the very essence of both life and matter. Why is the internal temperature of most mammals fixed near 98.6°? How do geologists use temperature to track the history of our planet? Why is the quest for absolute zero and its quantum mechanical significance the key to understanding superconductivity? And what can we learn from neutrinos, the subatomic "messages from the sun" that may hold the key to understanding the birth-and death-of our solar system? In answering these and hundreds of other temperature-sensitive questions, Segrè presents an uncanny view of the world around us.**

Why had he not come home earlier? Where had he been? Why had he not told his own family that he had survived? Before Roy can begin to explain what he has gone through they are interrupted by a pair of men who seem intent on removing them both - and Jason's wife and child. Within the space of half an hour Jason's well-regulated, ordinary life is destroyed and his loyalty to his lost brother forces him to take his family on the run as he battles with the fact that the American government had 'hidden' hundreds of MIAs. Code Name Angel

In this book we look at the history of the South African Nuclear Weapons Program, long denied but always winked about, an open secret to many although the details were always vague with rumours of Israeli assistance in designing the bombs. In fact, the Israeli input was negligible as the South African nuclear weapons worked in an entirely unique way, yielding about what the Hiroshima bomb did and considered "sufficient" as a deterrent against a Soviet Union originated and supported conventional attack. This attack almost came to be in 1988 - 1989 via Angola into what was then South West Africa and today Namibia. Masses of conventional forces were gathered, and plans were made - in history the same as the attack on South Vietnam by North Vietnamese Forces the decade before. History always repeats itself. A brilliant South African "Maskirovka" from the Chief of Staff in Pretoria stopped the planned invasion as well as the very public mobilising order of 400,000 men from the Army Reserves. South Africa also had the means to deliver nuclear bombs accurately, all discussed in this book and may even have done so, although, we don't know. It is one of the big "ifs" in history. As said, the invasion never took place and in no small way due to the Battle of Cuito Cuanavale which is often written about in GMJ Books. It was the largest tank battle in Africa since the Second World War and South African Forces won hands down. It is beyond maddening to the author that no Western "Expert" today knows that in 1978, South Africa produced working nuclear weapons. They either don't know, forgot history, or are incompetent, or more probably, both. Just before Mr. Mandela took office as the newly democratically elected president, the atomic devices were handed over to the US Government for dismantling. That act was until now the only time in the world where a country willingly got rid of its nuclear arsenal. Everyone applauded. Yet, the means to manufacture such weapons did not disappear with the weapons, something no one in the West realises. If a place like Iran wants a nuclear weapon, they merely need to ask the South Africans that have the know-how and proven capability to produce them in record time. It is old technology. In Code Name Angel we deal with nuclear weapons and the risk of such weapons in the hands of terrorists using them against the West. You should not doubt that terrorists will use nuclear devices if they have them - they stated their intentions to do so many times in the past. The normal rules of MAD, retaliation, do not apply to them. There is no reason to doubt that they would flatten a Western city if given the opportunity and such opportunities can be created easily enough as this book explains. Description: Spymaster extraordinaire, Angelique Dawson and her team must recover lost or roguery manufactured South African nukes on their way to Iran or Al-Qaeda or both for all we know. The warheads are escorted by Zimbabwean Intelligence operatives in cahoots with Iranian Intelligence. This was one of the first major Egg Breaker operations that never made the newspapers and took place mostly in southern Mozambique, the chosen exfiltration point for the weapons. Major Geoffrey Foxtrot, under command of his handler, Angelique Dawson, later his wife and soul, tracks the weapons down in a combined operation with Mossad Agents but that is only the first step. Disarming the devices is another story as Angelique insists on doing so herself, plus the Zimbabweans are also around to prevent the bombs from being intercepted in the first place. A clash between the two groups is unavoidable. If you wish to read about Covert and Special Forces Operations in sub-Saharan Africa, the GMJ Books are the place to start. You will learn about covert

operations, Special Forces techniques, and military history not known outside the select few. Code Name Angel is the 7th book of the popular GMJ Series.

The Third Path

Grow in Spiritual Awareness of Life Here and Hereafter

Agio Publishing House "When I finished reading this book, all I could say was WOW! What a stunning piece of literary work... It is concise, brilliantly written, backed by scientific findings, with clear human logic and intelligence. If this doesn't awaken the masses to delve into who and what they truly are, I can't imagine what will." ~ Jerry Issa, teacher of metaphysics, Trenton, Michigan This book will change your life if you let it. If we are accidental beings on a remote planet in a vast universe, existing for merely a blip in cosmic time, what's the point of living at all? Until we learn life is too significant to be a short-lived brilliance that rises out of nothing and ends in nothing, we will continue to live out our lives in, what Thoreau saw as, quiet desperation. We sense the materialistic wall when we ask the question, "Is that all there is?" Without resorting to miracles or magic, this book provides compelling evidence of life beyond the physical world by logically investigating the limitations of matter in the universe, by examining the gaps in scientific theories and by analyzing what the mystics already know about a spiritual existence. It takes a dedicated seeker with no preconceived ideas and no intent on arriving to see beyond the materialistic wall. This book is intended to expand your awareness of life here and hereafter, hopefully providing the spark that will start you on your own personal pilgrimage. The mystics tell us we will be guided to the next step along our spiritual path when we are ready. Are you ready? **AWARENESS:** The following might be the thoughts of those at different levels of awareness as they walk through a rose garden. I want - I wonder how much I could get for these roses. I believe - God created roses when He created the world and everything in it. I doubt - Roses evolved from wild flowering shrubs, but most garden varieties are hybrids. I seek - How could anything as beautiful as a rose happen purely by chance? I know - Roses, like all life on Earth, are physical manifestations of spirit.

Visual Electrodiagnosis in Systemic Diseases

[Springer Science & Business Media](#) The research workers at the Eye Clinic of the Medical Academy of Erfurt are proud of having been entrusted, for the second time, with the organization of the yearly ISCEV symposium. Twelve years ago the 6th Symposium was held in Erfurt. This time we turned to Reinhardsbrunn, an old castle situated in the vicinity of Erfurt on the fringes of the wonderful mountainscape of the Thuringian Forest. Reinhardsbrunn castle serves today as a holiday hotel and convention place. It seemed to us to be the right place for carrying on the discussions in a comfortable and informal way after the actual sessions were over. Comparing the scientific reports read at the 6th and 17th Symposium, both organized in Erfurt, one readily becomes aware of the impressive advances in our rapidly developing field of interest. The technical and, more specifically, the electronic advancements have been enormous, especially in the field of recording and processing the visually evoked cortical potentials. Adually, the addition of this special field of study to our realm, led to the renaming of the Society some years ago. Moreover, it became more and more obvious that interdisciplinary cooperation between ophthalmologists, physiologists, physi cists, technologists and mathematicians is essential. This is also reflected in the composition of our membership.

Radical Social Change in the United States

Badiou's Apostle and the Post-Factual Moment

[Springer](#) This book tackles the question of why the United States is so resistant to radical change towards economic justice and peace. Taking full stock of the despair that launched the popular support for Bernie Sanders and Donald Trump, Swanger historicizes the political paralysis of post-1974 United States that deepened already severe economic inequalities, asking how the terrain for social movements in the early twenty-first-century US differs from that of the 1960s. This terrain is marked by the entrenchment of neoliberalism, anti-intellectualism, and difficulties paradoxically posed by the ease of social media. Activists now must contend with a paralyzing “post-factual” moment. Alain Badiou’s thought informs this book on breaking through contemporary political paralysis.

The Psychic Hold of Slavery

Legacies in American Expressive Culture

[Rutgers University Press](#) What would it mean to “get over slavery”? Is such a thing possible? Is it even desirable? Should we perceive the psychic hold of slavery as a set of mental manacles that hold us back from imagining a postracist America? Or could the psychic hold of slavery be understood as a tool, helping us get a grip on the systemic racial inequalities and restricted liberties that persist in the present day? Featuring original essays from an array of established and emerging scholars in the interdisciplinary field of African American studies, *The Psychic Hold of Slavery* offers a nuanced dialogue upon these questions. With a painful awareness that our understanding of the past informs our understanding of the present—and vice versa—the contributors place slavery’s historical legacies in conversation with twenty-first-century manifestations of antiblack violence, dehumanization, and social death. Through an exploration of film, drama, fiction, performance art, graphic novels, and philosophical discourse, this volume considers how artists grapple with questions of representation, as they ask whether slavery can ever be accurately depicted, trace the scars that slavery has left on a traumatized body politic, or debate how to best convey that black lives matter. *The Psychic Hold of Slavery* thus raises provocative questions about how we behold the historically distinct event of African diasporic enslavement and how we might hold off the transhistorical force of antiblack domination.
