RADAR INSTRUCTION MANUAL

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime

Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. VIRTUAL ENVIRONMENTS '98

PROCEEDINGS OF THE EUROGRAPHICS WORKSHOP IN STUTTGART, GERMANY, JUNE 16-18, 1998

Springer Science & Business Media Ten years after Virtual Environment research started with NASA's VIEW project, these techniques are now exploited in industry to speed up product development cycles, to ensure higher product quality, and to encourage early training on and for new products. Especially the automotive industry, but also the oil and gas industry are driving the use of these techniques in their works. The papers in this volume reflect all the different tracks of the workshop: reviewed technical papers as research contributions, summaries on panels of VE applications in the automotive, the medical, the telecommunication and the geoscience field, a panel discussing VEs as the future workspace, invited papers from experts reporting from VEs for entertainment industry, for media arts, for supercomputing and productivity enhancement. Short industrial case studies, reporting very briefly from ongoing industrial activities complete this state of the art snapshot.

LONGMAN ADVANCED LEARNERS' GRAMMAR

A SELF-STUDY REFERENCE & PRACTICE BOOK WITH ANSWERS

PORTRAIT OF A YOUNG PAINTER

PEPE ZUNIGA AND MEXICO CITY'S REBEL GENERATION

Duke University Press In *Portrait of a Young Painter*, the distinguished historian Mary Kay Vaughan adopts a biographical approach to understanding the culture surrounding the Mexico City youth rebellion of the 1960s. Her chronicle of the life of painter Pepe Zúñiga counters a literature that portrays post-1940 Mexican history as a series of uprisings against state repression, injustice, and social neglect that culminated in the student protests of 1968. Rendering Zúñiga's coming of age on the margins of formal politics, Vaughan depicts midcentury Mexico City as a culture of growing prosperity, state largesse, and a vibrant, transnationally-informed public life that produced a multifaceted youth movement brimming with creativity and criticism of convention. In an analysis encompassing the mass media, schools, politics, family, sexuality, neighborhoods, and friendships, she subtly invokes theories of discourse, phenomenology, and affect to examine the formation of Zúñiga's persona in the decades leading up to 1968. By discussing the influences that shaped his worldview, she historicizes the process of subject formation and shows how doing so offers new perspectives on the events of 1968.

F.T.C. STATISTICAL REPORT ON MERGERS AND ACQUISITIONS

EVALUATION IN CONTEXT

John Benjamins Publishing Company It is now an acknowledged fact in the world of linguistics that the concept of evaluation is crucial, and that there is very little - if any - discourse that cannot be analyzed through the prism of its evaluative content. This book presents some of the latest developments in the study of this phenomenon. Released more than a decade later than Hunston and Thompson's (2000) *Evaluation in Text*, *Evaluation in Context* is designed as its sequel, in an attempt to continue, update and extend the different avenues of research opened by the earlier work. Both theoretical and empirical studies on the topic are presented, with the intention of scrutinizing as many of its dimensions as possible, by not only looking at evaluative texts, but also considering the aspects of the discursive context that affect the final evaluative meaning at both the production and reception stages of the evaluative act. The editors' main objective has been to gather contributions which investigate the manifold faces and phases of evaluation by presenting a wide variety of perspectives that include different linguistic theories (e.g. Axiological Semantics, Functionalism or Politeness Theory), different levels of linguistic description (e.g. phonological, lexical or semantic), and different text types and contexts (e.g. the evaluation found in ironic discourse, the multimodality of media discourse or the world of politics, just to name a few). The volume can be of use not only for scholars who study the evaluative function of language, but also for students who wish to pursue research in the area.

WHY HUMANAE VITAE WAS RIGHT

A READER

Ignatius Press For the 25th anniversary year of the historic document *Humanae Vitae* (1968), Janet Smith has gathered together twenty-one outstanding essays and articles by well-respected thinkers to provide the demonstration that Pope Paul VI was not simply correct, but prophetic. While this document is still widely neglected and misunderstood, the Church continues to proclaim that contraception is a moral evil and that the view of man, sexuality, and marriage that leads to the use of the Pill is not one that is compatible with human dignity, sexual responsibility and spousal love. Many are unaware that there have been energetic and persuasive worth defenses of this teaching. The general reader, as well as the ethicist and moral theologian, will find much here to stimulate his thinking on this issue. Contributors include William May, Paul Quay, Elizabeth Anscombe, Dietrich von Hildebrand, Carlo Caffara, Cormac Burke, Ralph McInerney, John Kippley, John Finnis and Janet Smith.

PROSODIC PHONOLOGY

WITH A NEW FOREWORD

Walter de Gruyter **Prosodic Phonology** by Marina Nespor and Irene Vogel is now available again. "Nespor & Vogel 1986" is a citation classic - even after twenty years, it is still recognized as the standard resource on Prosodic Phonology. This groundbreaking work introduces all of the prosodic constituents (syllable, foot, word, clitic group, phonological phrase, intonational phrase and utterance) and provides evidence for each one from numerous languages. Prosodic Phonology also includes a chapter in which experimental psycholinguistic data support the proposed hierarchy. A perceptual study provides evidence that prosodic constituent structure - not syntactic constituent structure - predicts whether listeners are able to disambiguate different types of ambiguous sentences. A chapter on the phonology of poetic meter examines portions of Dante's Divine Comedy. It is demonstrated that the constituents proposed for spoken language also make interesting predictions about literary metrical patterns. Prosodic Phonology is an important reference not only for phonologists, but for all linguists interested in the issue of interfaces among the components of grammar. It is also a basic resource for psycholinguists and cognitive scientists working on linguistic perception and language acquisition.
