### Realizing Islam

### The Tijaniyya in North Africa and the Eighteenth-Century Muslim World

*Islamic Civilization and Musli* The Tijaniyya is the largest Sufi order in West and North Africa. In this unprecedented analysis of the Tijaniyya's origins and development in the late eighteenth century, Zachary Valentine Wright situates the order within the broader intellectual history of Islam in the early modern period. Introducing the group's founder, Ahmad al-Tijani (1737-1815), Wright focuses on the wider network in which al-Tijani traveled, revealing it as a veritable global Islamic revival whose scholars commanded large followings, shared key ideas, and produced literature read widely throughout the Muslim world. They were linked through chains of knowledge transmission from which emerged vibrant discourses of renewal in the face of perceived social and political corruption. Wright argues that this constellation of remarkable Muslim intellectuals, despite the uncertainty of the age, promoted personal verification in religious learning. With distinctive concern for the notions of human actualization and a universal human condition, the Tijaniyya emphasized the importance of the realization of Muslim identity. Since its beginnings in North Africa in the eighteenth century, the Tijaniyya has quietly expanded its influence beyond Africa, with significant populations in the Middle East, Southeast Asia, and North America. We are proud to offer this book in our usual print and ebook formats, plus as an open-access edition available through the Sustainable History Monograph Project.

### A Novel

*Bantam Shana Abé* has entranced countless readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of *The Secret Swan* delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell itself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That's what happens to Ruri Kell when she accepts Iain MacInnes's invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him. Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

# Arduino I

## Getting Started

*Morgan & Claypool Publishers* This book is about the Arduino microcontroller and the Arduino concept. The visionary Arduino team of Massimo Banzi, David Cuartielles, Tom Igoe, Gianluca Martino, and David Mellis launched a new innovation in microcontroller hardware in 2005, the concept of open-source hardware. Their approach was to openly share details of microcontroller-based hardware design platforms to stimulate the sharing of ideas and promote innovation. This concept has been popular in the software world for many years. In June 2019, Joel Claypool and I met to plan the fourth edition of Arduino Microcontroller Processing for Everyone! Our goal has been to provide an accessible book on the rapidly changing world of Arduino for a wide variety of audiences including students of the fine arts, middle and senior high school students, engineering design students, and practicing scientists and engineers. To make the book more accessible to better serve our readers, we decided to change our approach and provide a series of smaller volumes. Each volume is written to a specific audience. This book, Arduino I: Getting Started is written for those looking for a quick tutorial on the Arduino environment, platforms, interface techniques, and applications. Arduino II will explore advanced techniques, applications, and systems design. Arduino III will explore Arduino applications in the Internet of Things (IoT). Arduino I: Getting Started covers three different Arduino products: the Arduino UNO R3 equipped with the Microchip ATmega328, the Arduino Mega 2560 equipped with the Microchip ATmega2560, and the wearable Arduino LilyPad.

### With Instructions for the Connoisseur, and an Essay On Grace in Works of Art

## Muslim Networks from Hajj to Hip Hop

*Univ of North Carolina Press* Crucial to understanding Islam is a recognition of the role of Muslim networks. The earliest networks were Mediterranean trade routes that quickly expanded into transregional paths for pilgrimage, scholarship, and conversion, each network complementing and reinforcing the others. This volume selects major moments and key players from the seventh century to the twenty-first that have defined Muslim networks as the building blocks for Islamic identity and social cohesion. Although neglected in scholarship, Muslim networks have been invoked in the media to portray post-9/11 terrorist groups. Here, thirteen essays provide a long view of Muslim networks, correcting both scholarly omission and political sloganeering. New faces and forces appear, raising questions never before asked. What does the fourteenth-century North African traveler Ibn Battuta have in common with the American hip hopper Mos Def? What values and practices link Muslim women meeting in Cairo, Amsterdam, and Atlanta? How has technology raised expectations about new transnational pathways that will reshape the perception of faith, politics, and gender in Islamic civilization? This book invokes the past not only to understand the present but also to reimagine the future through the prism of Muslim networks, at once the shadow and the lifeline for the umma, or global Muslim community.
