Boatowner's Mechanical and Electrical Manual : How to Maintain, Repair, and Improve Your Boat's Essential Systems

How to Maintain, Repair, and Improve Your Boat's Essential Systems

McGraw Hill Professional The boatowner's foremost troubleshooting guide, now better than ever If it's on a boat and it has screws, wires, or moving parts, it's covered in Boatowner's Mechanical and Electrical Manual. When you leave the dock with this book aboard, you have at your fingertips the best and most comprehensive advice on: Battery technologies 12- and 24-volt DC systems Corrosion, bonding, and lightning protection Generators, inverters, and battery chargers Electric motors and electric lights Marine electronics, antennas, and RFI Diesel engines Transmissions, shaft brakes, and propellers Refrigeration and air-conditioning Tanks, plumbing, and through-hulls Pumps and watermakers Steering, autopilots, and wind vanes Stoves and heaters Winches, windlasses, and bow thrusters Spars, rigging, and roller reefing "If you had to choose a single book to help you assess and maintain your boat gear, this would be it."—Practical Sailor "A truly remarkable bible. . . . This book is the best of its kind."—WoodenBoat "A major achievement. . . . It would be hard to imagine anything going wrong on a boat that couldn't be figured out with this book."—Sailing World "The world's best technical reference and troubleshooting book."—Sailing Inland and Offshore "This manual will be of lasting interest to anyone who wants to know how their boat works, what has gone wrong when it doesn't, and how it could be fixed."—Classic Boat "Without becoming too complex, the book covers almost every imaginable mechanical or electrical matter in the marine environment."—Work Boat World "Calder lives what he writes, . . . [and] what he offers . . . is practical solutions to problems associated with increasingly complex marine systems. . . . [A] bargain for anyone in the construction and repair side of the boat business."—Professional Boatbuilder

All 2-stroke & 4-stroke Models

Seloc Publications Provides a guide to the Nissan and Tohatsu outboard motor, featuring step-by-step illustrated procedures, trouble-shooting, and wiring diagrams.

Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Pounder's Marine Diesel Engines and Gas Turbines

Butterworth-Heinemann Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines

The Shock Doctrine

The Rise of Disaster Capitalism

Metropolitan Books The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

Teach Me To Love / Man On The Make

As a college professor, the town respected him. As a husband who could not pay his way - his wife despised him. As Peter Waring said bitterly after she walked out on him, "Maybe I'm a college teacher - but damn it all, I'm also a man! I want to live like a man . . . love like a man . . ." Yet how could he? Like most faculty members, he had to burn the midnight oil doing extra assignments to improve his lot in the world. For although his wife was rich, she wanted Peter to pay - or to play! When a college campus is rocked by violent revolt, it isn't always the students who are to blame. In this case, it started with Viviam Temple, a highly respectable English teacher - whose husband could no longer satisfy her erotic appetites. It spread quickly to Eric Bentley, another normally staid member of the faculty, who knew a good thing when he saw it - and saw Vivian at her naked best. Then it touched Barry Holmes, an A student who just happened to like doing nude studies instead of his homework!

The Flower of Battle

MS Ludwig Xv13

The Flower of Battle is Colin Hatcher's translation of Fiore dei Liberi's art of combat from the early 15th century. The work included high-resolution images and English text laid out in the manner of the original.

The Boat Repair Manual

Taylor Pub This book opens with a maintenance survey to help identify likely problems and to guide the reader to the appropriate specialized sections. A chapter devoted to tools and techniques precedes the coverage of hull types.
