### GUGLIELMO MARCONI'S SECRET WEAPON

**Independently Published** The Italian scientist Guglielmo Marconi was the real inventor of wireless communication, which includes, for example, radio, cellphones and even the new self-driving cars. The main characters of Maurizio Agostini's books are two 'accidental detectives': Marcello, an accountant without any notable qualities, and Francesca, a very feminine transgender person. They meet Eleonora, a distant descendant of the great Guglielmo, while she is investigating the last invention of Marconi: the Death Ray, a secret weapon that destroys weapons. Mussolini was convinced till his end that, if Marconi hadn't died, the war would have ended very differently. During their investigations, our protagonists encounter international intrigues, scientific mysteries, unbelievable accidents with 'zero probability' and discover the true Marconi, who was very different from his official image. And... they also remain involved in an intriguing 'menage a trois'. In the end, they succeed in discovering the

'musical secret' of the Death Ray, at present hidden in the most impenetrable archive in the world.

### **AUTO REPAIR FOR DUMMIES**

---

**John Wiley & Sons** Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
