It's rare to book a plane ticket to visit the lifeless moonscape of Canada's oil sand strip mines, or to seek out the Chinese city of Linfen, legendary as the most polluted in the world. But in Visit Sunny Chernobyl, Andrew Blackwell embraces a different kind of travel, taking a jaunt through the most gruesomely polluted places on Earth. From the hidden bars and convenience stores of a radioactive wilderness to the sacred but reeking waters of India, Visit Sunny Chernobyl fuses immersive first-person reporting with satire and analysis, making the case that it's time to start appreciating our planet as it is—not as we wish it would be. Irreverent and reflective, the book is a love letter to our biosphere's most tainted, most degraded ecosystems, and a measured consideration of what they mean for us. Equal parts travelogue, expose, environmental memoir, and faux guidebook, Blackwell careens through a rogue's gallery of environmental disaster areas in search of the worst the world has to offer—and approaches a deeper understanding of what's really happening to our planet in the process. **Burn New Research Blows the Lid Off How We Really Burn Calories, Lose Weight, and Stay Healthy** *Penguin* One of the foremost researchers in human metabolism reveals surprising new science behind food and exercise. We burn 2,000 calories a day. And if we exercise and cut carbs, we'll lose more weight. Right? Wrong. In this paradigm-shifting book, Herman Pontzer reveals for the first time how human metabolism really works so that we can finally manage our weight and improve our health. Pontzer's groundbreaking studies with hunter-gatherer tribes show how exercise doesn't increase our metabolism. Instead, we burn calories within a very narrow range: nearly 3,000 calories per day, no matter our activity level. This was a brilliant evolutionary strategy to survive in times of famine. Now it seems to doom us to obesity. The good news is we can lose weight, but we need to cut calories. Refuting such weight-loss hype as paleo, keto, anti-gluten, anti-grain, and even vegan, Pontzer discusses how all diets succeed or fail: For shedding pounds, a calorie is a calorie. At the same time, we must exercise to keep our body systems and signals functioning optimally, even if it won't make us thinner. Hunter-gatherers like the Hadza move about five hours a day and remain remarkably healthy into old age. But elite athletes can push the body too far, burning calories faster than their bodies can take them in. It may be that the most spectacular athletic feats are the result not just of great training, but of an astonishingly efficient digestive system. Revealing, irreverent, and always entertaining, Pontzer has written a book that will change how you eat, move, and live. **Ulysses A Way to Garden A Hands-On Primer for Every Season** *Timber Press* "A Way to Garden prods us toward that ineffable place where we feel we belong; it's a guide to living both in and out of the garden." —The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it's a calling. "Taut and tense. Inspiring and terrifying in its timelessness." (Colson Whitehead, Pulitzer Prize-winning author of *The Underground Railroad*) Named a most anticipated book of 2021 by O. The Oprah Magazine Named a "must-read" by the Chicago Review of Books One of CNN's most anticipated books of 2021 After moonrise on the cold night of January 21, 1897, a mob of twenty-five white men gathered in a patch of woods near Big Road in southwestern Simpson County, Kentucky. Half carried rifles and shotguns, and a few tucked pistols in their pants. Their target was George Dinning, a freed slave who'd farmed peacefully in the area for 14 years, and who had been wrongfully accused of stealing livestock from a neighboring farm. When the mob began firing through the doors and windows of Dinning's home, he fired back in self-defense, shooting and killing the son of a wealthy Kentucky family. So began one of the strangest legal episodes in American history — one that ended with Dinning becoming the first Black man in America to win damages after a wrongful murder conviction. Drawing on a wealth of never-before-published material, bestselling author and Pulitzer Prize finalist Ben Montgomery resurrects this dramatic but largely forgotten story, and the unusual convergence of characters — among them a Confederate war hero-turned-lawyer named Bennett H. Young, Kentucky governor William O'Connell Bradley, and George Dinning himself — that allowed this unlikely story of justice to unfold in a time and place where justice was all too rare. **English Mechanic and World of Science My Secrets of Beauty The Native Tribes of South Australia The Red Circle My Life in the Navy SEAL Sniper Corps and How I Trained America's Deadliest Marksmen** *St. Martin's Press* **The Red Circle: My Life in the Navy SEAL Sniper Corps and How I Trained America's Deadliest Marksmen** Now including an excerpt from *The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF*. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, *The Red Circle* provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy "sniper cell" and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors—including Marcus Luttrell and Chris Kyle—that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military. Explosive, revealing, and intelligent, *The Red Circle* provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. **A Collection of Familiar Quotations With Complete Indices of Authors and Subjects The Highlands of Central India Notes on Their Forests and Wild Tribes, Natural History, and Sports Ecodefense A Field Guide to Monkeywrenching Men Like Gods A Novel** *Macmillan Company of Canada* The hero of the novel, Mr. Barnstaple, is a depressive journalist working for the newspaper "The Liberal." Drawing from literature in media studies and geography - and the work of Michel Foucault and Doreen Massey - it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, Mobile Mapping offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched. **The Life and Adventures of James P.
