Writing and Designing Manuals and Warnings, Fifth Edition CRC Press Technology is changing the way we do business, the way we communicate with each other, and the way we learn. This new edition is intended to help technical writers, graphic artists, engineers, and others who are charged with producing product documentation in the rapidly changing technological world. While preserving the basic guidelines for developing manuals and warnings presented in the previous edition, this new edition offers new material as well, including a much-expanded section on hazard analysis. Features Provides more explicit guidance on conducting a hazard analysis, including methods and documentation Offers in-depth discussion of digital platforms, including video, animations, and even virtual reality, to provide users with operating instructions and safety information Incorporates current research into effective cross-cultural communication—essential in today's global economy Explains new US and international standards for warning labels and product instructions Presents expanded material on user analysis, including addressing generational differences in experience and preferred learning styles Writing and Designing Manuals and Warnings, Fifth Edition explores how emerging technologies are changing the world of product documentation from videos to virtual reality and all points in between. The Coding Manual for Qualitative Researchers SAGE The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis -demonstrates the writing of analytic memos -discusses available analytic software -suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences. Weber's Big Book of Grilling Chronicle Books Provides advice for choosing a grill, tools, and safety, and contains recipes for sauces and marinades, meat, poultry, fish and seafood, vegetables, salads, and desserts. Manual on Hate Speech Council of Europe The right to freedom of expression entails duties and responsibilities and is subject to certain limits, provided for in Article 10.2 of the European Convention on Human Rights, which are concerned, among other things, with protecting the rights of others. Identifying what constitutes "hate speech" is especially difficult because this type of speech does not necessarily involve the expression of hatred or feelings. On the basis of all the applicable texts on freedom of expression and the case law of the European Court of Human Rights and other bodies, the author identifies certain parameters that make it possible to distinguish expressions which, although sometimes insulting, are fully protected by the right to freedom of expression from those which do not enjoy that protection. Manual of Digital Earth Springer Nature This open access book offers a summary of the development of Digital Earth over the past twenty years. By reviewing the initial vision of Digital Earth, the evolution of that vision, the relevant key technologies, and the role of Digital Earth in helping people respond to global challenges, this publication reveals how and why Digital Earth is becoming vital for acquiring, processing, analysing and mining the rapidly growing volume of global data sets about the Earth. The main aspects of Digital Earth covered here include: Digital Earth platforms, remote sensing and navigation satellites, processing and visualizing geospatial information, geospatial information infrastructures, big data and cloud computing, transformation and zooming, artificial intelligence, Internet of Things, and social media. Moreover, the book covers in detail the multi-layered/multi-faceted roles of Digital Earth in response to sustainable development goals, climate changes, and mitigating disasters, the applications of Digital Earth (such as digital city and digital heritage), the citizen science in support of Digital Earth, the economic value of Digital Earth, and so on. This book also reviews the regional and national development of Digital Earth around the world, and discusses the role and effect of education and ethics. Lastly, it concludes with a summary of the challenges and forecasts the future trends of Digital Earth. By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth, this book offers an essential introduction for an ever-growing international audience. In particular, how can outsiders facilitate durable conflict-managing institutions through statebuilding - a process that historically has been the outcome of bloody struggles to establish the state's authority over warlords, traditional authorities, and lawless territories? In this book, Timothy Sisk explores international efforts to help the world's most fragile post-civil war countries today build viable states that can provide for security and deliver the basic services essential for development. Tracing the historical roots of statebuilding to the present day, he demonstrates how the United Nations, leading powers, and well-meaning donors have engaged in statebuilding as a strategic approach to peacebuilding after war. Their efforts are informed by three key objectives: to enhance security by preventing war recurrence and fostering community and human security; to promote development through state provision of essential services such as water, sanitation, and education; to enhance human rights and democracy, reflecting the liberal international order that reaffirms the principles of democracy and human rights, . Improving governance, alongside the state's ability to integrate social differences and manage conflicts over resources, identity, and national priorities, is essential for long-term peace. Whether the global statebuilding enterprise can succeed in creating a world of peaceful, well-governed, development-focused states is unclear. But the book concludes with a road map toward a better global regime to enable peacebuilding and development-oriented statebuilding into the 21st century. *The New Spirit of Capitalism* Verso In this major work, the sociologists Eve Chiapello and Luc Boltanski go to the heart of the changes in contemporary business culture. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their organization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization which was founded on employee initiative and autonomy in the workplace - a 'freedom' that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and 'Ben and Jerry') arguing that they practice a more successful and subtle form of exploitation. In a work that is already a classic in Europe, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the Left's critique of the alienation of everyday life - a recuperation that simultaneously undermined the power of its social critique. *Nature Street Design Manual* "The Street Design Manual is New York City's comprehensive resource on street design guidelines, policies, and processes.
