MASTERCLASS IN HISTORY EDUCATION

TRANSFORMING TEACHING AND LEARNING

Bloomsbury Publishing MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading, research and reflection can support the development of history teaching and learning in the classroom. At the heart of the book is a series of professional enquiries carried out by experienced history teachers, working in a range of contexts. Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection, data analysis and argument. These history teachers also show how they drew on diverse scholarship in history and history education, including many publications by other history teachers. In eight further chapters, other experts, ranging from practitioner-scholars to researchers in diverse fields (such as history, history education, teacher education, teacher research and curriculum theory) reflect on the distinctive insights that these teachers offer and explore connections with their own fields. The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between 'theory' and 'practice'. The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice.

INFORMATION TECHNOLOGY IN THE TEACHING OF HISTORY

INTERNATIONAL PERSPECTIVES

Routledge Information technology offers powerful tools to facilitate and to assist learning across the whole curriculum; the computer is certainly the most significant development in educational technology in the twentieth century. History may be thought of as a staid and perhaps tradition-bound subject, more resistant to change than some areas. Yet in history too, information technology is making an impact. This volume shows how information technology is currently contributing to, and bringing about changes in the way history is taught and learned. The international selection of the contributions shows that these phenomena are not restricted to just one country. The impact of information technology on history curricula is explored in depth in one section of the book, whilst other sections

focus on classroom activities and issues, on the development of software for history, and on the relevance of current information technology developments. But the question which lies at the heart of it all remains that of how information technology can enhance the teacher's ability to offer situations in which learners can form and develop a real understanding of the nature of historical processes, and the ways in which they can be studied.

DARKNESS VISIBLE

A STUDY OF ISAIAH 14:3-23 AS CHRISTIAN SCRIPTURE

Wipf and Stock Publishers How does one read the Old Testament as Christian Scripture? This question, voiced in both academic and ecclesial settings, invites a reflection on how to take these texts with both hermeneutical alertness and sustained imaginative seriousness. While scholars have recently engaged in robust discussion about theological hermeneutics, there have been relatively few worked examples with particular Old Testament texts. This book seeks to meet this need by providing a close reading of Isaiah 14:3-23, a text with a complex amalgam of textual, historical-critical, history-of-reception, and theological issues.

TEACHING BIG HISTORY

Univ of California Press Big History is a new field on a grand scale: it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.

THE SOCIAL AND POLITICAL THOUGHT OF R. G. COLLINGWOOD

Cambridge University Press This is the first comprehensive study of the political philosophy of the British philosopher R. G. Collingwood, best known for his contributions to aesthetics and the philosophy of history. However his political thought, and in particular his book *The New Leviathan*, have been neglected, even dismissed in some quarters. Professor Boucher argues for the importance of this political theory and provides a perspicuous account of its development and originality. He contends that *The New Leviathan* is an attempt to reconcile philosophy and history, theory and practice. Collingwood's distinctive contribution to modern political and social thought is seen as his sustained project of distinguishing utility from right, and right from duty; the passion for history coincides with the ethical thought because Collingwood wishes to identify dutiful, or moral, action with a historical civilization. Drawing on a wealth of manuscript material, this book will prove invaluable to political philosophers and intellectual historians.

THE WAYS OF OUR GOD

AN APPROACH TO BIBLICAL THEOLOGY

Wm. B. Eerdmans Publishing At a time when Old Testament and New Testament studies are considered to be two very different tasks, this major new work by Charles Scobie offers an approach to biblical theology meant to take in the entire sweep of divine revelation. Comprehensive in scope, this book covers every aspect of biblical theology. Chapters are devoted first to the nature and task of biblical theology and then to major themes within the biblical message -- God's order, God's servant, God's people, and God's way. Each section of the book also features an extensive system of helpful cross-references. Not only is Scobie's attempt to bridge the biblical testaments admirable, but he also takes great care to present scholarship that is at the same time informed by, and relevant to, the daily life and work of the church. The result is a book that is relevant to readers everywhere. Accessible to teachers, clergy, students, and general readers alike, this book will reinvigorate the study of the Bible as the unified word of God.

THE PHILOSOPHY, POLITICS AND ECONOMICS OF FINANCE IN THE 21ST CENTURY

FROM HUBRIS TO DISGRACE

Routledge Since 2008, the financial sector has been the subject of extensive criticism. Much of this criticism has focused on the morality of the actors involved in the crisis and its extended aftermath. This book analyses the key moral and political philosophical issues of the crisis and relates them to the political economy of finance. It also examines to what extent the financial sector can or should be reformed. This book is unified by the view that the financial sector had been a self-serving and self-regulating elite consumed by greed, speculation and even lawlessness, with little sense of responsibility to the wider society or common good. In light of critical analysis by authors from a variety of backgrounds and persuasions, suggestions for reform and improvement are proposed, in some cases radical reform. By placing the world of finance under a microscope, this book analyses the assumptions that have led from hubris to disgrace as it provides suggestions for an improved society. Rooted in philosophical reflection, this book invites a critical reassessment of finance and its societal role in the 21st century. This book will be of interest to academics, politicians, central bankers and financial regulators who wish to improve the morality of finance.

TRANSPARENCY IN ASSESSMENT - EXPLORING THE INFLUENCE OF EXPLICIT ASSESSMENT CRITERIA

Frontiers Media SA In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented, as opposed to learning oriented, when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together, in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.
